Rethinking Residential Real Estate

TRICON

2017 ANNUAL REPORT

The Selby
Toronto, ON

About Us

Tricon is a principal investor and asset manager focused on the North American residential real estate industry. We manage $4.6 billion (C$5.8 billion) of assets, including $1.2 billion managed on behalf of third-party investors. Our portfolio of investments is comprised of land and homebuilding assets, single-family rental homes and multi-family development projects.

Tricon's business objective is to invest for investment income and capital appreciation through our Principal Investment business, and to earn fee income through our Private Funds and Advisory business. Since its inception in 1988, Tricon has invested $19 billion in residential real estate in the United States and Canada.

This document contains forward-looking statements and information relating to expected future events and the Company's financial and operating results and projections. This document also presents key performance indicators used by the Company to measure its performance that are not recognized under International Financial Reporting Standards (IFRS). Please refer to the enclosed Management's Discussion and Analysis for further information and disclaimers concerning these forward-looking statements and non-IFRS measures.

Dear shareholders:

2017 was a transformative year for Tricon, as strong operational execution and supportive housing fundamentals propelled the company to achieve record results. Tricon generated Adjusted EBITDA of $269.7 million and Adjusted Diluted EPS of $1.10, up 135% and 90% year-over-year, respectively, driven by improved operations and greater scale at our Tricon American Homes ("TAH") single-family rental platform, embedded home price appreciation, and generally steady performance in our other businesses. Our housing-centric investment strategy is underpinned by a favourable economic backdrop marked by robust job growth, solid rent growth and above average home price appreciation, particularly in the U.S. Sun Belt states where we have invested approximately 90% of our assets under management.

Over the course of 2017, we further refined our strategy and simplified our business model to focus solely on housing verticals where we can build scale and obtain a leadership position. Our goals are to improve our return prospects, increase our recurring revenues, and make the company easier to understand for investors. A major catalyst in our quest for scale, simplification and predictability of cash flow was the $1.4 billion acquisition of Silver Bay Realty Trust, an NYSE-listed company with a highly complementary portfolio of single-family rental ("SFR") homes across the U.S. Sun Belt. This acquisition, which closed in May 2017, contributed significantly to this year's earnings outperformance and elevated Tricon's profile in the public and private capital markets, positioning us well for future success.

The Silver Bay acquisition was the product of solid execution on many fronts by our management team and our capital markets partners. The transaction was facilitated by well-received public offerings of common stock and convertible debentures totaling approximately $323 million. The offerings were substantially oversubscribed and attracted many new shareholders to Tricon, which in turn resulted in strong follow-on demand for our stock, contributing to healthy share price performance for the balance of the year.

The expected operational synergies flowing from the acquisition were achieved ahead of schedule, while the expected G&A synergies are on pace to be realized by mid-2018.

In November 2017, TAH sold over 1,500 non-core homes ahead of schedule for $153 million and used the proceeds to repay debt and begin an orderly process of reducing Tricon's leverage to historical levels. TAH has also been proactive in refinancing the $1.2 billion acquisition facility used to partially fund the Silver Bay transaction. The acquisition financing has been almost entirely replaced with a series of very successful securitization transactions and a first-of-its-kind term loan that collectively have reduced TAH's cost of debt by approximately 60 basis points, to 3.75%, and meaningfully extended the term structure of its debt.

In a relatively short time frame, many investors have embraced single-family rental as a new asset class – a business that I believe may be the most exciting thing to happen to real estate since the invention of REITs. SFR stocks have dramatically outperformed other real estate asset classes over the last two years and Tricon, albeit with a more diversified business model, has similarly benefited with strong stock returns over a five-year period. Notwithstanding Tricon's improved operational results and a much more consistent income profile resulting from our entry into the SFR business, we often ask ourselves whether investors fully understand or appreciate the potential of our TAH platform, its long-term growth prospects and, more specifically, the technological innovations that are driving its operations.

"Tricon generated Adjusted EBITDA of $269.7 million and Adjusted Diluted EPS of $1.10, up 135% and 90% year-over-year, respectively"

> “
> **we plan to organically grow TAH’s portfolio by 1,600 to 2,000 homes per year**
> ”

The acquisition, leasing and ongoing maintenance activities required to run an institutional SFR business involve coordinating hundreds of complex activities that would not be possible without advanced technology. Essentially, the technologies that have launched companies such as Amazon, Uber and Airbnb – namely, cellular mobility (access anywhere), broadband (speed) and cloud computing (data analytics/artificial intelligence) – have enabled TAH to turn “scattered site multi-family” property management into a remarkably efficient business with operating margins that rival the best and most established multi-family operators. In a sense, TAH has transformed itself into a technology company that happens to rent single-family homes. The once-in-a-lifetime opportunity to acquire distressed homes after the Great Recession of 2007–2009, coupled with the investments we have made in people, culture and technology, have enabled us to establish an operating platform that would be difficult for new entrants to replicate today. This platform provides TAH with a significant competitive advantage, as we continue to participate in the roll-up of what is still a highly fragmented industry.

Going forward, Tricon will remain focused on three core investment verticals: single-family rental (Tricon American Homes), land and homebuilding (Tricon Housing Partners, “THP”) and Canadian multi-family development (Tricon Lifestyle Rentals, “TLR”). We enjoy a leadership position in all of these businesses and see compelling opportunities to add scale and achieve attractive risk-adjusted returns. In fact, as a result of a wave of consolidation in the single-family rental industry, TAH is now the third-largest publicly-owned company in the sector with over 15,000 homes. Using existing capital, we plan to organically grow TAH’s portfolio by 1,600 to 2,000 homes per year through a disciplined home-by-home acquisition program. If larger portfolios become available, we would consider growing even faster. With approximately $1.4 billion of assets under management, our THP business is one of the largest providers of equity to local builders and developers in Canada and the U.S., while our land development subsidiary, The Johnson Companies LP, is the only master-planned community (“MPC”) developer in the U.S. to have five MPCs ranked in the top 50 by home sales, and is well-positioned to acquire additional MPCs when strategic opportunities present themselves. And TLR, although still in its infancy, has quickly emerged as a leading player in the purpose-built rental business in Toronto. With three developments underway and a plan to add approximately two new sites per year, our long-term goal is to build the leading class A multi-family portfolio in Canada.

As part of our simplification strategy, we announced in mid-2017 that we intend to exit from our manufactured housing community business, Tricon Lifestyle Communities (“TLC”), in 2018. At the same time, we announced our plan to liquidate our U.S. multi-family development projects in early 2019 once they reach stabilization. All of these assets are performing well, but a number of factors, including increased competition and lower projected returns, have made it difficult to obtain scale at acquisition prices that enable us to meet our return criteria. Accordingly, we have elected to opportunistically sell these businesses and use the proceeds to repay debt. We are currently in the market to sell our TLC investments and believe that we will be able to sell the entire portfolio and realize net proceeds significantly greater than our original cost basis.

Over a period of just a few years, we have quietly transformed Tricon from an investment manager focused on land and homebuilding into a diversified residential platform with investments in vertically integrated operating businesses. With in-house development and property management teams in place, we believe we will be able to offer better service to our customers, obtain better control over our business, and ultimately generate higher returns for shareholders and private investors alike. Our investment approach is crystallizing into a model where day-to-day operations are run by our operating platforms, while our corporate team

maintains responsibility for overall investment strategy, capital allocation, oversight of major decisions and investor reporting. This approach allows us to keep our corporate team lean while driving growth at our individual operating platforms.

As part of our business strategy, we require our investment verticals to generate and distribute cash flow to the corporate "mothership", where we then allocate capital to the best risk-adjusted investment opportunities, which of course can include buying back our own stock, reducing leverage or adjusting our dividend. As an illustration of this approach, in the last few months we bought back approximately 1% of our stock and recently announced a nearly 8% increase in our dividend to reward shareholders and signal our confidence in the future. That said, we remain squarely focused on creating long-term shareholder value so, as a growth company, most of our capital will continue to be allocated to growing our housing verticals in areas where we continue to see good investment opportunities. We believe that the discipline driving this capital allocation process, combined with our ability to manage third-party capital and the prudent use of leverage in our investment entity structure, should give us an advantage over pure-play real estate companies over the long term.

In preparation for the next phase of our growth, we took important steps in 2017 to strengthen our corporate senior management team to bring additional expertise to a more operationally intensive business model. In hiring Andy Carmody (Managing Director, THP) and Alexandra Blum (Chief Marketing Officer), we have added seasoned industry leaders who have deep operating experience and the ability to manage consumer-centric businesses. Our decision to add Evelyne Dubé (Managing Director, Private Funds) signifies our commitment to continue building out our private funds business and to source additional third-party capital. Since entering SFR, we have intended to build up our balance sheet and add business lines in order to become a bigger and better asset manager. We have been successful in raising money for our development businesses (THP and TLR) but would like to bring third-party capital into our single-family rental business as well.

Along with the enhancements to our management team, and in keeping with our overall theme of simplification, we are embarking on an overhaul of our executive compensation program, which is expected to be completed in 2018. The goal of this new program is to improve transparency and provide better alignment with shareholders by eliminating the existing defined bonus pool (15–20% of adjusted base EBITDA), which was more suitable for a smaller pure asset manager. The new program will also reduce the use of deferred stock units, introduce performance-based compensation and establish minimum share ownership guidelines for top executives. We recognize that public market investors have many investment options and that by practicing good governance and building a business that is relatively easy to understand, we will ultimately attract more institutional investment interest and create more value for our shareholders.

As we enter 2018, we prepare to celebrate Tricon's 30th anniversary. Our collective success has come from standing on the shoulders of those who have come before us, and our team remains incredibly fortunate that co-founders David Berman and Geoff Matus, as well as long-time investment committee member Saul Shulman, continue to play a meaningful role in approving investment decisions, acting in an advisory role with respect to strategic decisions, and helping to mentor our talented team of managers and investment professionals. Our strong growth has also required that we move out of our historic building in Toronto's Rosedale neighbourhood and into a modern new building in mid-town Toronto. The new office was designed around the concept of wellness and was configured to facilitate work flow and internal communication, improve productivity, and foster a transparent and healthy corporate culture.

"

8%

increase in our dividend to reward shareholders and signal our confidence in the future

"

I am incredibly proud of the performance of our company and the growth we have achieved over the past few years – and especially this last record-setting year. We have established a strong team culture focused on investing in communities and improving the way people live, work and interact. Our strong results are a testament to the hard work, commitment and passion that our employees (nearly 600 of them, including our operating subsidiaries) bring to work every day, and their belief that Tricon is making the world a better place by providing much-needed housing to communities across North America. In conclusion, I would like to thank our board of directors, shareholders and private investors for their continued support and belief in our management team. It is both my commitment and management's commitment to reward your faith in us with even stronger performance in the years to come.

Gary Berman

Tricon American Homes

A leading owner and operator of single-family rental homes in the U.S.

TAH is our largest investment vertical, accounting for nearly 60% of our asset base.

The past year saw TAH more than double in size as a result of a single transformative event: the purchase of Silver Bay Realty Trust in May 2017. With over 15,000 homes, TAH is now the third-largest publicly-owned company in the single-family rental sector, with a unique focus on the middle market.

The Silver Bay purchase has created substantial cost savings and operational synergies, has led to the simplification of our business and has been a meaningful catalyst in our quest for scale and industry leadership. We plan to continue growing the TAH portfolio by 1,600 to 2,000 homes per year, and TAH will continue to use the latest technologies to make its property management activities more efficient and to deliver superior service to its residents.

Just five years ago, the single-family rental sector was a cottage industry. Today, it has grown into an institutional asset class, with TAH playing a leading role.

What makes us different

TAH provides high-quality homes to hard-working American families, and its focus on customer service, innovation and technology allows it to improve the lives of its residents and employees. With a culture-driven organization that puts customers first, TAH has grown to become the largest middle-market focused SFR company in the U.S.

Tricon Housing Partners

The rocket fuel that propels us

THP is one of the largest providers of equity or equity-type financing to local builders in the U.S. and Canada. It is Tricon's bedrock, a business we've grown since day one in 1988. Our reputation allows us to seek out the best partners and properties across the U.S. Sun Belt. Our successful land development subsidiary, Johnson, is the only developer of master-planned communities ("MPCs") in the United States to have five MPCs ranked in the Top 50 by home sales in 2017. Through Johnson, we have accelerated our growth as a fully integrated investment, development and asset management business.

THP is a key source of cash flow used to expand our company as a whole. In 2017, THP distributed $35 million back to Tricon and we expect net distributions over the next 8 to 10 years to exceed $600 million. Today, THP accounts for over 30% of Tricon's $4.6 billion in assets under management, including more than $1 billion in third-party investments from some of the world's most respected pension funds and financial institutions.

What makes us different

THP is a fully integrated investment, development and asset management business that supports the development of differentiated communities. We are also passionate about integrating design, architecture and livability so that THP communities rise beyond their peers. As a result, we can be highly selective about THP investments and seek out only the best partners and properties.

Tricon Lifestyle Rentals

The rental lifestyle reimagined

TLR builds class A multi-family rental communities that inspire comfort, connection and a sense of belonging.

Our current focus is on Toronto, where three developments are already underway – all three are architecturally compelling and contain a wealth of amenities that reimagine the definition of a rental lifestyle. Our long-term plan is to add two new sites each year in order to create the largest portfolio of class A rental living in Canada. TLR also has two investments in the greater Dallas area, which it plans to sell in 2019 once the buildings are stabilized.

The Toronto market is not only the fastest-growing in North America, it is a market we know well. Over the past 15 years, Tricon has provided equity for numerous successful Toronto developments. The city's rental stock is old and the vacancy rate for rental accommodation is at historically low levels as families seek new ways to bridge the affordability gap presented by high condo and home prices.

What makes us different

We have a deeply-rooted pride in developing architecturally-compelling buildings that elevate design standards in Toronto. As long-term owners and stewards of our assets, we are committed to long-term building performance and insist on durable finishes, energy efficiency and highly functional suites. In the end, TLR buildings put people first, and are designed to promote human interaction and bring people together.

Tricon Lifestyle Communities

Crystallizing our investment

TLC owns a portfolio of 14 manufactured housing properties totaling 3,065 rental sites in Arizona and California.

In early 2017, we announced a plan to simplify our business and focus solely on investment verticals where we believe we can achieve scale and leadership. We decided to exit TLC, as we believe we can generate similar returns and recurring cash flows from our Tricon American Homes vertical, where we see greater room for growth.

The proposed sale illustrates a key aspect of our investment approach: that our structure and philosophy enable us to be opportunistic in allocating capital to areas of greater growth.

What makes us different

We invest in manufactured housing communities to improve the lives of residents and create a strong sense of pride. All of this – from improved landscaping and new clubhouses, to refinished playing courts, perimeter fences and programmed cross-park resident events – helps build communities.

Private Funds and Advisory

In 1988 we began raising private capital as the primary source of funding for our land and homebuilding business. In the 30 years since, our private investment verticals have increased substantially (accounting for 27% of our assets under management in 2017) and we now partner with some of the U.S. and Canada's most respected institutional investors in multiple business verticals.

Leveraging third-party capital has a number of advantages. It helps augment our returns by earning fees. It also enables us to build scale and expand all of our business verticals more quickly. Ultimately, it helps us create greater shareholder value through more efficient use of our balance sheet.

Given the growing attention of highly reputable capital partners and our performance track record, we intend to expand our use of third-party capital in the years to come as part of our broader growth strategy.

NON-IFRS MEASURES AND FORWARD-LOOKING STATEMENTS

The Company has included herein certain supplemental measures of key performance, including, but not limited to, adjusted EBITDA, adjusted net income and adjusted earnings per share ("EPS"), as well as certain key indicators of the performance of our investees. We utilize these measures in managing our business, including performance measurement and capital allocation. In addition, certain of these measures are used in measuring compliance with our debt covenants. We believe that providing these performance measures on a supplemental basis is helpful to investors in assessing the overall performance of the Company's business. However, these measures are not recognized under International Financial Reporting Standards ("IFRS"). Because non-IFRS measures do not have standardized meanings prescribed under IFRS, securities regulations require that such measures be clearly defined, identified, and reconciled to their nearest IFRS measure. The definition, calculation and reconciliation of the non-IFRS measures used in this MD&A are provided in Sections 6 and 7 and the key performance indicators presented are discussed in detail in Section 8.

The supplemental measures presented herein should not be construed as alternatives to net income (loss) or cash flow from the Company's activities, determined in accordance with IFRS, as indicators of Tricon's financial performance. Tricon's method of calculating these measures may differ from other issuers' methods and, accordingly, these measures may not be comparable to similar measures presented by other publicly-traded entities.

Certain statements in this MD&A may be considered "forward-looking information" as defined under applicable securities laws ("forward-looking statements"). Statements other than statements of historical fact contained in this document may be forward-looking statements. Wherever possible, words such as "may", "would", "could", "will", "anticipate", "believe", "plan", "expect", "intend", "estimate", "aim", "endeavour", "project", "continue" and similar expressions have been used to identify these forward-looking statements. These statements reflect management's expectations, intentions and beliefs concerning anticipated future events, results, circumstances, economic performance or expectations with respect to Tricon and its investments and are based on information currently available to management and on assumptions that management believes to be reasonable.

This MD&A includes forward-looking statements pertaining to: anticipated investment performance including, in particular, project timelines and sales expectations, projected Internal Rate of Return ("IRR"), Returns on Investment ("ROI"), expected performance fees and expected future cash flows; anticipated demand for homebuilding, lots, single-family rental homes, manufactured housing communities and luxury apartment suites; the pace of acquisition and the ongoing availability of single-family rental homes at prices that match Tricon American Home ("TAH")'s underwriting model; the intentions to build portfolios and attract investment in TAH, Tricon Lifestyle Communities ("TLC") and Tricon Lifestyle Rentals (formerly Tricon Luxury Residences) ("TLR") and the Company's investment horizon and exit strategy for each investment vertical, including the anticipated divestiture of TLC and TLR U.S. The assumptions underlying these forward-looking statements and a list of factors that may cause actual investment performance to differ from current projections are discussed in the Company's Annual Information Form dated February 27, 2018 (the "AIF") which is available on SEDAR at www.sedar.com and in Section 9.7 of this MD&A.

Forward-looking statements involve significant known and unknown risks, uncertainties and assumptions. Should one or more of these risks or uncertainties materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results, performance or achievements could vary materially from those expressed or implied by the forward-looking statements contained in this MD&A. See the AIF and Section 9.7 for a more complete list of risks relating to an investment in the Company and an indication of the impact the materialization of such risks could have on the Company, and therefore cause actual results to deviate from the forward-looking statements.

Although the forward-looking statements contained in this MD&A are based upon what management currently believes to be reasonable assumptions, there can be no assurance that actual results, performance or achievements will be consistent with these forward-looking statements. The forward-looking statements contained in this document are expressly qualified in their entirety by this cautionary statement.

When relying on our forward-looking statements to make decisions with respect to the Company, investors and others should carefully consider the foregoing factors and other uncertainties and potential events. The forward-looking statements in this MD&A are made as of the date of this document and the Company does not intend to, or assume any obligation to, update or revise these forward-looking statements or information to reflect new information, events, results or circumstances or otherwise after the date on which such statements are made to reflect the occurrence of unanticipated events, except as required by law, including securities laws.

1. INTRODUCTION

This Management's Discussion and Analysis ("MD&A") is dated as of February 27, 2018, the date it was approved by the Board of Directors of Tricon Capital Group Inc. ("Tricon," "us," "we" or the "Company"), and reflects all material events up to that date. It should be read in conjunction with the Company's audited consolidated financial statements and related notes for the year ended December 31, 2017.

Additional information about the Company, including our 2017 Annual Information Form, is available on our website at www.triconcapital.com, and on the Canadian Securities Administrators' website at www.sedar.com.

The Company's audited consolidated financial statements for the year ended December 31, 2017 were prepared using International Financial Reporting Standards ("IFRS") accounting policies consistent with the Company's audited annual consolidated financial statements for the year ended December 31, 2016.

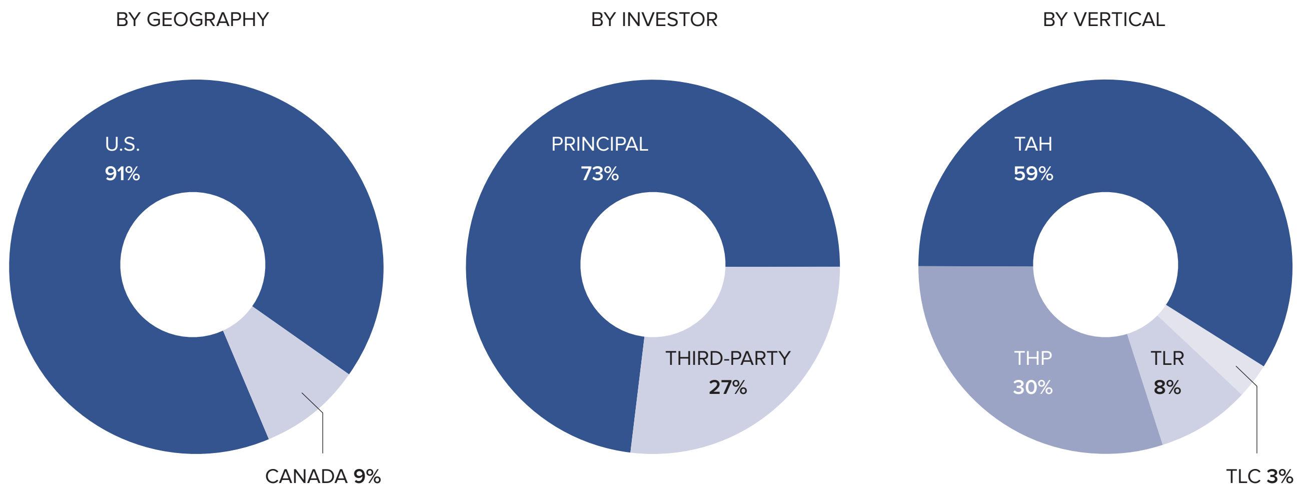
All dollar amounts in this MD&A are expressed in U.S. dollars unless otherwise indicated.

1.1 Who we are and what we do

Tricon Capital Group (TSX: TCN) is a principal investor and asset manager focused on the residential real estate industry in North America with approximately $4.6 billion (C$5.8 billion) of assets under management as of December 31, 2017. Tricon owns, or manages on behalf of third-party investors, a portfolio of investments in land and homebuilding assets, single-family rental homes, manufactured housing communities and purpose-built rental apartments. Our business objective is to invest for investment income and capital appreciation through our principal investments and to earn fee income through the third-party asset management and advisory activities of our Private Funds and Advisory business. Since its inception in 1988, Tricon has invested in real estate and development projects valued at approximately $19 billion.

$4.6 BILLION

Assets Under Management (AUM)



THP: Land and homebuilding
TAH: Single-family rental homes
TLC: Manufactured housing communities
TLR: Purpose-built rental apartments

1. Principal Investments

As a principal investor, the Company currently invests in four related and complementary residential investment verticals, with the objective of generating investment income and capital appreciation, as follows:

(i) Tricon Housing Partners ("THP") – Investment in for-sale housing through land development, homebuilding, for-sale multi-family construction and ancillary commercial development.

(ii) Tricon American Homes ("TAH") – Investment in single-family rental properties, where homes are renovated to a common standard and then leased to predominantly working class families.

(iii) Tricon Lifestyle Communities ("TLC") – Investment in manufactured housing communities ("MHC"), where land parcels are leased to owners of prefabricated homes.

(iv) Tricon Lifestyle Rentals ("TLR") – Investment or co-investment alongside institutional investors to develop and manage a portfolio of Class A purpose-built rental apartments.

A detailed description of our investment verticals is included in our 2017 Annual Information Form, available on SEDAR at www.sedar.com, and more information about the revenue recognized from our investments is included in Section 9.1.

2. Private Funds and Advisory

Tricon manages an investment portfolio of residential real estate assets on behalf of third-party investors in the U.S. and Canada. Our business objective in our Private Funds and Advisory business is to earn income through:

(i) Asset management of third-party capital invested through private investment vehicles, including private commingled funds, separate accounts, side-cars and syndicated investments ("Investment Vehicles"). The Company's asset management business includes investments in land and homebuilding assets through Tricon Housing Partners, and investments in Class A purpose-built rental apartments through Tricon Lifestyle Rentals.

The following is a list of the active private commingled funds, separate accounts, side-cars and syndicated investments managed by the Company:

- Tricon Housing Partners US LP ("THP1 US")
- Tricon Housing Partners US II LP ("THP2 US")
- Tricon Housing Partners Canada LP ("THP1 Canada")
- Tricon Housing Partners Canada II LP ("THP2 Canada")
- Tricon Housing Partners Canada III LP ("THP3 Canada")
- Separate accounts include:
  - THP – Cross Creek Ranch, Fulshear Farms, Grand Central Park, Trilogy at Verde River, Viridian, THP US SP1 and THP US SP2
  - TLR Canada – The Selby, 57 Spadina and Scrivener Square
- U.S. side-cars include Trilogy at Vistancia West, Trilogy Lake Norman and Arantine Hills
- Canadian syndicated investments include 5 St. Joseph, Heritage Valley and Mahogany

As manager and sponsor of private Investment Vehicles, Tricon typically receives annual contractual fees of 1–2% per annum based on committed or invested capital during the life of these Investment Vehicles. After the return of capital and a contractual preferred return percentage, Tricon may receive additional performance fees based on terms outlined in the various Investment Vehicles' definitive agreements. Commingled funds typically have a life of eight years (before extension provisions) and separate accounts typically have maturity dates timed to coincide with the underlying investment.

(ii) Development management and related advisory services for master-planned communities through Tricon's 50.1% investment in The Johnson Companies LP ("Johnson") and development management services performed by Tricon Development Group Ltd. ("TDG") in respect of TLR projects in Canada.

A more detailed description of the sources of fee income from Private Funds and Advisory activities is included in Section 9.1 and in our 2017 Annual Information Form, available on SEDAR at www.sedar.com.

1.2 How we invest and create value

A description of each of the principal investments in which we invest is discussed below.

Tricon Housing Partners

The Company's THP vertical co-invests in commingled funds, separate accounts, and other private Investment Vehicles which make investments in the following five core categories: (1) master-planned communities ("MPCs"); (2) land development; (3) homebuilding; (4) infill condominiums and attached housing; and (5) active-adult communities. Occasionally, the Company will make such investments directly, with a view to possibly syndicating a portion of the investment to one or more institutional investors to increase diversification for the Company and/or to bolster investment returns with additional Private Funds and Advisory fees, a strategy which Tricon has successfully employed through certain of its co-investments and syndicated investments. THP's investments involve providing financing to developers of the projects, either by way of equity investment or participating loans. The majority of THP's investments are situated in the U.S. Sun Belt and adjacent states where THP currently sees the best opportunities to maximize risk-adjusted returns.

The core investment types described above are structured as self-liquidating transactions generally with cash flows generated as land, lots or homes are sold to third-party buyers (typically large homebuilders in the case of land and master-planned communities and end consumers in all other cases). In select cases, a property may also be sold in bulk to a third-party buyer in situations where THP determines that it can achieve sufficient returns from the sale without participating in the full build-out of the property. With the exception of larger land investments and master-planned communities, the majority of core investments made by THP are typically expected to be substantially completed within a three- to six-year time horizon, providing THP with an opportunity to reinvest realized proceeds on an ongoing basis.

Through its investment in Houston-based Johnson, Tricon has the ability to leverage an integrated development platform with expertise in land entitlement, infrastructure, municipal bond finance and place making, and deep relationships with public and regional homebuilders and commercial developers. Johnson is an active development manager of master-planned communities in the United States and the only development manager in the United States to have five MPCs ranked in the top 50 in 2017 (source: Robert Charles Lesser & Co. Real Estate Advisors and John Burns Real Estate Consulting). Tricon uses Johnson's platform to (i) invest in cash flowing MPCs that generate proceeds from lot sales, commercial pad sales and the issuance of municipal bonds, and to (ii) earn development management fee income and sales commissions from the development and sale of residential lots and commercial land within the master-planned communities that Johnson manages (regardless of whether they are owned by Tricon or managed on behalf of third-party investors), thereby enhancing its investment returns.

Tricon American Homes

Our single-family rental home investment vertical, Tricon American Homes, has an integrated platform responsible for the acquisition, renovation, leasing, ongoing maintenance and property management of single-family rental homes within major U.S. cities, predominantly in the U.S. Sun Belt. TAH is headquartered in Orange County, California and is operationally distinct from the investment management activities of the Company. TAH employs its own senior management team and approximately 390 employees that oversee all aspects of TAH's day-to-day business activities.

TAH's investment objective is to generate a recurring cash flow stream from its portfolio of single-family rental homes and capture home price appreciation within attractive U.S. housing markets. TAH adheres to specific investment criteria for each of its target markets and has local on-the-ground staff who are responsible for underwriting, acquiring and overseeing the renovation of single-family rental homes. Homes are acquired through multiple channels, including the Multiple Listing Service, trustee sales and foreclosures, and selective portfolio acquisitions.

TAH is focused on providing high-quality rental homes to the broad middle market demographic, which management defines as working class households earning between $50,000 and $95,000 per year, with stable jobs and who may face difficulties in buying a home for a variety of reasons. TAH offers these middle market families a compelling value proposition of living in a high-quality, renovated home at a fixed monthly price without other costly overhead expenses such as maintenance and property taxes and with a high level of customer service. Targeting qualified middle market families who are likely to be long-term renters generally results in lower turnover rates, thereby reducing turn costs and providing stable cash flow for TAH.

On May 9, 2017, TAH completed the acquisition of Silver Bay Realty Trust Corp. ("Silver Bay"). Silver Bay was a U.S. single-family rental Real Estate Investment Trust ("REIT") which owned 9,054 homes (as of May 9, 2017) and had a similar investment strategy to TAH whereby it targeted the Sun Belt and middle market households. With approximately 15,200 homes as of December 31, 2017, TAH is the third largest publicly-owned single-family rental company in the U.S.

TAH's growing institutional-quality portfolio may in time garner the interest of third-party investors, which could provide the Company with an opportunity to wholly or partially exit its investment. Other potential exit strategies in the long term could include a public offering of TAH.

Tricon Lifestyle Communities

Tricon Lifestyle Communities is focused on enhancing and managing existing three- to four-star manufactured housing communities ("MHC") in the United States through its investment in a joint venture with its third-party operating partner, Cobblestone Real Estate LLC ("Cobblestone"), a vertically integrated asset and property manager.

Tricon's strategy for TLC has been to assemble a high-yielding, institutional-quality portfolio of largely age-restricted communities in a highly-fragmented market that is primarily dominated by private owners. Notwithstanding that TLC assembled a portfolio of 14 parks in Arizona and California in approximately two years, challenges to building sufficient scale remain and have been exacerbated by the recent influx of new capital into the industry. Accordingly, in an effort to simplify the overall business model and focus on housing sectors where Tricon can achieve scale and industry leadership, the Company has announced that it will be pursuing an orderly exit of the TLC manufactured housing business. In the interim, TLC has been executing on its existing value-added business plan, which includes implementing an ongoing capital expenditure program to enhance the quality of the parks and prepare them for sale. TLC's capital improvement program includes upgrading existing infrastructure and amenities, improving existing home quality by refurbishing in-place home inventory, purchasing new homes and professionally rebranding all communities. TLC believes the impact of these improvements will be an increase in occupancy and rental rates over time. The Company launched a formal sale process for the TLC portfolio in January 2018 (see Section 3.4).

Tricon Lifestyle Rentals (formerly Tricon Luxury Residences)

Tricon Lifestyle Rentals, our multi-family "build to core" investment vertical, is focused on developing and managing a portfolio of Class A purpose-built rental apartments across Canada and the United States.

TLR's investment objective is to add value through the development and construction process and ultimately generate stable cash flow from its portfolio of luxury rental apartment buildings. Tricon intends to leverage its expertise in multi-family development in assembling a high-yielding, institutional-quality portfolio of Class A rental apartments over time. Tricon currently expects to monetize its original investment in TLR properties within five to seven years from the stabilization of each property.

In Canada, TLR acts as the sponsor or general partner of each project and typically provides 15–50% of the project equity alongside institutional investment partners. The Company earns management fees and potentially performance fees on the private capital it manages in this vertical as a means of enhancing its investment returns.

In its existing U.S. investments (both in the Dallas-Fort Worth MSA), TLR has partnered with a local developer which acts as a general partner and developer for TLR's current U.S. portfolio. TLR is participating as a limited partner in each investment and has provided 90% of the project equity, with the balance being invested by the developer.

As with its TLC business, Tricon has also announced that it will be pursuing an orderly exit from TLR's U.S. business by divesting its two current projects following completion of their development. Management has made this decision because the U.S. multi-family development industry is currently experiencing a number of headwinds, including cost inflation as well as tighter financing conditions and, as a result, management believes there are better return opportunities in Tricon's other investment verticals. Tricon plans to retain the Canadian TLR business as a core investment.

Once Tricon has exited its TLC manufactured housing business and its U.S. multi-family developments in TLR, it will be left with three core investment verticals, namely land and homebuilding (THP), single-family rental (TAH) and Canadian purpose-built multi-family development (TLR Canada). It is management's intention to remain focused on its housing-centric investment strategy, but to simplify the overall business model and corporate structure, and only focus on sectors where Tricon can achieve sufficient scale and industry leadership, as mentioned above. Tricon believes that its THP and TAH businesses are well-positioned to capitalize on the large millennial cohort (those born between 1980 and 2000) who are in the early stages of forming families, having children and ultimately moving to the suburbs where they can find relatively affordable single-family housing and good schools. The more affluent will continue to buy homes, benefiting Tricon's land and homebuilding investments, whereas the workforce may be more likely to rent single-family homes from institutional landlords such as TAH. In Canada, major housing affordability issues in cities such as Toronto and Vancouver will ultimately require more purpose-built rental supply, which TLR Canada intends to capitalize on.

2. HIGHLIGHTS

Financial highlights

Selected financial information in thousands of U.S. dollars (except per share amounts which are in U.S. dollars, unless otherwise indicated)

	Three months		Twelve months	
For the periods ended December 31	2017	2016	2017	2016

Weighted average shares outstanding – basic	**134,369,333**	**112,840,046**	**21,529,287**	**127,152,721**	**112,490,019**	**14,662,702**
Weighted average shares outstanding – diluted[1]	**136,567,369**	**124,060,472**	**12,506,897**	**129,302,655**	**123,646,532**	**5,656,123**

(1) For the three and twelve months ended December 31, 2017, both of the Company's convertible debentures are anti-dilutive, as debentures interest expense, net of tax, and the net change in fair value of derivative financial instruments would have resulted in increased earnings per share upon conversion. Therefore, in computing the diluted weighted average shares outstanding and the associated earnings per share amounts for the three and twelve months ended December 31, 2017, the impact of the convertible debentures was excluded (2016 – included).

The following discussion is based on selected line items of the consolidated statements of income for the three and twelve months ended December 31, 2017.

Contractual fees

The following table provides further details regarding contractual fees for the three and twelve months ended December 31, 2017.

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars)	2017	2016	Variance	2017	2016	Variance
Management fees – private Investment Vehicles	$ 2,987	$ 3,173	$ (186)	$ 11,621	$ 12,443	$ (822)
Development fees – TDG	404	385	19	1,586	1,488	98
Development fees – Johnson	3,524	3,931	(407)	10,279	10,587	(308)
Contractual fees	**$ 6,915**	**$ 7,489**	**$ (574)**	**$ 23,486**	**$ 24,518**	**$ (1,032)**

Contractual fees for the three months ended December 31, 2017 totaled $6.9 million, a decrease of $0.6 million from the same period in the prior year. The variance is attributable to:

- A decrease of $0.4 million in advisory fee revenue from Johnson due to a shift in sales mix. While the number of lot sales at Johnson communities increased year-over-year, Johnson made an active decision to sell smaller lots in response to a growing need for entry-level homes in light of rising affordability concerns, which in turn resulted in lower development fees per lot.
- A decrease of $0.2 million in management fees for the three months ended December 31, 2017 compared to the same period in the prior year, mainly attributable to lower investment balances in THP investments.

Contractual fees for the twelve months ended December 31, 2017 totaled $23.5 million, a decrease of $1.0 million from the prior year, largely attributable to the factors listed above that impacted the quarterly variance.

Investment income – Tricon Housing Partners

The following table provides details regarding investment income from THP for the three and twelve months ended December 31, 2017.

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars)	2017	2016	Variance	2017	2016	Variance
THP1 US	$ 840	$ 2,924	$ (2,084)	$ 7,627	$ 14,587	$ (6,960)
THP2 US	(973)	582	(1,555)	400	2,123	(1,723)
THP3 Canada	164	(572)	736	528	439	89
Trinity Falls	4,958	1,862	3,096	10,422	3,330	7,092
Separate accounts[1]	4,401	4,827	(426)	6,436	6,176	260
Side-cars[2]	(8,154)	475	(8,629)	(7,204)	895	(8,099)
Investment income – THP	**$ 1,236**	**$ 10,098**	**$ (8,862)**	**$ 18,209**	**$ 27,550**	**$ (9,341)**

(1) Includes Cross Creek Ranch, Fulshear Farms, Grand Central Park, Trilogy at Verde River, Viridian, THP US SP1 and THP US SP2.

(2) Includes Trilogy at Vistancia West, Trilogy Lake Norman and Arantine Hills.

Investment income for the three months ended December 31, 2017 was $1.2 million, a decrease of $8.9 million compared to $10.1 million for the same period in 2016. The variance is mainly attributable to:

- A decrease of $8.6 million and $0.4 million in side-cars and separate accounts, respectively, as a result of fair value losses recorded for investments in three active-adult community developments. These projects are performing below THP's expectations as a result of a number of factors, including: (i) increased competition in the active-adult community segment; (ii) lower demand for premium-priced active-adult product (which is the market segment that THP is targeting), resulting in slower absorption and lengthened project timelines; and (iii) increased construction labour costs. As a result of these challenges, long-term cash flow projections were extended and adjusted downwards this quarter, which resulted in appraised values declining year-over-year. In addition, a fair value loss was recorded at the Arantine Hills master-planned community in Southern California as a result of a delayed development timeline and lower-than-anticipated initial lot sale prices.
- A decrease of $2.1 million in investment income from THP1 US as significant distributions were made throughout 2016 and 2017, thereby reducing the outstanding investment balance.
- A decrease of $1.6 million in investment income from THP2 US as a result of the aforementioned budget revisions to its co-investments in two active-adult community developments and Arantine Hills (see Section 4.1).
- An offsetting increase of $3.1 million from Trinity Falls resulting from a higher fair value gain due to the project's revised budget, which takes into account the acquisition of an additional 300 acres of adjacent land for future development, which is projected to substantially increase cash flow (see Section 4.1).

Investment income for the twelve months ended December 31, 2017 was $18.2 million, a net decrease of $9.3 million compared to $27.6 million for 2016. The variance is mainly attributable to the reasons discussed above.

Investment income – Tricon American Homes

The following table provides details regarding the components of investment income from TAH for the three and twelve months ended December 31, 2017.

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars)	2017	2016	Variance	2017	2016	Variance
Total revenue	$ 55,118	$ 26,731	$ 28,387	$ 186,881	$ 94,610	$ 92,271
Total operating expenses	(20,393)	(10,815)	(9,578)	(72,337)	(38,236)	(34,101)
Net operating income (NOI)[1,2]	**34,725**	**15,916**	**18,809**	**114,544**	**56,374**	**58,170**
Fair value gain[3]	51,307	9,099	42,208	143,993	41,061	102,932
Other expenses[3,4]	(20,748)	(15,101)	(5,647)	(83,188)	(26,482)	(56,706)
Interest expense	(19,575)	(6,475)	(13,100)	(62,282)	(20,872)	(41,410)
Investment income – TAH	**$ 45,709**	**$ 3,439**	**$ 42,270**	**$ 113,067**	**$ 50,081**	**$ 62,986**

(1) KPI measure; see Section 8.1.

(2) Includes $798 and $1,790 of non-recurring storm-related expenses for the three and twelve months ended December 31, 2017, respectively. Excluding the impact of storm-related expenses, the NOI would have been $35,523 and $116,334, respectively. See Section 4.2.

(3) Fair value gain is net of projected future disposition fees. Comparative periods have been reclassified to conform with the current period presentation.

(4) Other expenses are comprised of:

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars)	2017	2016	Variance	2017	2016	Variance
Corporate overhead	$ (2,557)	$ (8,371)	$ 5,814	$ (18,302)	$ (19,182)	$ 880
Transaction costs and non-recurring costs	(17,880)	(10,560)	(7,320)	(62,217)	(13,878)	(48,339)
Depreciation of fixed assets	(361)	(131)	(230)	(1,179)	(451)	(728)
Deferred tax recovery (expense)	50	3,961	(3,911)	(1,490)	7,029	(8,519)
Other expenses	**$ (20,748)**	**$ (15,101)**	**$ (5,647)**	**$ (83,188)**	**$ (26,482)**	**$ (56,706)**

TAH's investment income for the three months ended December 31, 2017 was $45.7 million, an increase of $42.3 million compared to $3.4 million for the same period in 2016. Excluding the impact of transaction costs and non-recurring costs, investment income for the quarter would have been $63.6 million, an increase of $49.6 million compared to $14.0 million for the same period in the prior year. The increase is attributable to:

- An increase of $18.8 million in net operating income ("NOI", a key performance indicator ("KPI"); refer to Section 8.1 for a description), largely as a result of the NOI contribution of the Silver Bay homes acquired in the second quarter of 2017 and improved operating performance of the legacy TAH portfolio.
- An increase of $42.2 million in fair value gain as a result of home price appreciation (determined by using Broker Price Opinions ("BPOs") on 2,518 homes and the Home Price Index ("HPI") methodology on the remaining homes (see Section 9.1)), net of capital expenditures. The HPI increase this quarter was 1.4% (5.6% annualized) compared to a 0.9% (3.6% annualized) increase in the fourth quarter of 2016, and was applicable to a larger portfolio given the inclusion of the Silver Bay homes.
- The aforementioned increases were offset by a $13.1 million increase in interest expense, attributable to a higher outstanding debt balance resulting from growth in the portfolio size, combined with an increase in weighted average interest rate (3.8% for Q4 2017 versus 3.1% for Q4 2016). The higher interest rate was largely driven by a 75 basis point increase in LIBOR over the last twelve months, which serves as the base rate for TAH's floating rate debt instruments. TAH has been actively refinancing short-term floating rate debt instruments with longer-term fixed-rate instruments, which reduces ongoing exposure to LIBOR fluctuations (see Section 4.2).
- Lastly, investment income increases were also offset by a $5.6 million increase in other expenses, mainly non-recurring transaction costs, as a result of TAH's multiple debt financing and refinancing activities during the quarter (see Section 4.2).

Investment income for the twelve months ended December 31, 2017 was $113.1 million, an increase of $63.0 million from $50.1 million for 2016. Excluding the impact of transaction costs and non-recurring costs, investment income for the year would have been $175.3 million, an increase of $111.3 million compared to $64.0 million for the prior year. The variance is attributed to the same reasons described above, including an increase in fair value gain, additional NOI contribution from the acquisition of Silver Bay, and NOI growth in the legacy TAH portfolio, which were offset primarily by the higher interest expense and non-recurring transaction costs related to the acquisition of Silver Bay and financing/refinancing activities (see Section 4.2).

Investment income – Tricon Lifestyle Communities

The following table provides details regarding investment income from TLC for the three and twelve months ended December 31, 2017.

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars)	2017	2016	Variance	2017	2016	Variance
Total revenue	$ 3,577	$ 2,825	$ 752	$ 14,019	$ 9,591	$ 4,428
Total operating expenses	(1,604)	(1,284)	(320)	(6,050)	(4,159)	(1,891)
Net operating income (NOI)[1]	**1,973**	**1,541**	**432**	**7,969**	**5,432**	**2,537**
Other income (expenses)	(22)	863	(885)	(741)	455	(1,196)
Fair value gain	90	54	36	3,536	1,766	1,770
Interest expense	(854)	(727)	(127)	(3,383)	(2,545)	(838)
Investment income – TLC	**$ 1,187**	**$ 1,731**	**$ (544)**	**$ 7,381**	**$ 5,108**	**$ 2,273**

(1) KPI measure; see Section 8.1.

For the three months ended December 31, 2017, investment income from TLC was $1.2 million compared to $1.7 million for the same period in the prior year. This was primarily attributable to the effect of:

- An increase of $0.4 million in NOI associated with a greater number of properties owned (14 properties at the beginning of Q4 2017 compared to 11 properties at the beginning of Q4 2016), along with rental rate increases and occupancy improvements following successful capital enhancement programs at the existing communities.
- Other income decreased by $0.9 million in this quarter compared to the same period in the prior year, resulting from a decrease in deferred tax recovery, along with increased home sales expenses and non-recurring professional fees related to preparation for Tricon's exit from the TLC manufactured housing business.

Investment income from TLC for the twelve months ended December 31, 2017 was $7.4 million compared to $5.1 million for the prior year. This $2.3 million increase was primarily attributable to the factors noted above, as well as a $1.8 million increase in fair value gain as a result of NOI growth and the substantial completion of capital enhancement programs at Longhaven and Glenhaven, which positively impacted their fair value. This was offset by an increase in home sales expenses and non-recurring professional fees, included in other expenses, along with an increase in interest expense associated with financing the acquisition of communities in 2016.

Investment income – Tricon Lifestyle Rentals

The following table provides details regarding investment income from TLR for the three and twelve months ended December 31, 2017.

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars)	2017	2016	Variance	2017	2016	Variance
Rental revenue	$ 249	$ 233	$ 16	$ 1,131	$ 618	$ 513
Other income (expenses)[1]	(2,959)	445	(3,404)	(1,413)	(1,453)	40
Fair value gain	8,660	(1,924)	10,584	12,673	2,901	9,772
Investment income – TLR	**$ 5,950**	**$ (1,246)**	**$ 7,196**	**$ 12,391**	**$ 2,066**	**$ 10,325**

(1) Other income (expenses) are comprised of:

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars)	2017	2016	Variance	2017	2016	Variance
Non-controlling interests	$ 242	$ 1,048	$ (806)	$ 82	$ (1,200)	$ 1,282
Corporate overhead	(81)	–	(81)	(357)	(27)	(330)
Interest expense	(32)	(31)	(1)	(128)	(67)	(61)
Translation adjustment	(157)	(572)	415	1,921	(159)	2,080
Deferred tax expense	(2,931)	–	(2,931)	(2,931)	–	(2,931)
Other income (expenses)	**$ (2,959)**	**$ 445**	**$ (3,404)**	**$ (1,413)**	**$ (1,453)**	**$ 40**

For the three months ended December 31, 2017, investment income from TLR was $6.0 million, which was $7.2 million higher than the same period in the prior year. The main drivers of this variance include:

- An increase of $10.6 million attributable to a fair value gain of $8.7 million in the fourth quarter compared to a fair value loss of $1.9 million in the comparative period in 2016. The fair value gain in the current period included $8.2 million from TLR Canada projects as a result of a significant increase in land values and the achievement of development milestones. In comparison, the fair value loss experienced in the fourth quarter of 2016 related to a change in the construction budget and a revision to the timeline of completion for The McKenzie investment in TLR U.S.
- This was offset by a $3.4 million increase in other expenses, which was driven by an income tax expense of $2.9 million related to the fair value gains recognized on TLR Canada projects.

Investment income from TLR for the year was $12.4 million, an increase of $10.3 million compared to $2.1 million in the prior year.

- This was primarily attributable to fair value gains of $8.2 million in TLR Canada and $4.4 million in TLR U.S., compared to $1.4 million and $1.5 million, respectively, in 2016 as noted above.
- Other income increased by $2.1 million from a favourable currency translation adjustment in TLR Canada due to the strengthening Canadian dollar. Additionally, non-controlling interest expense was reduced by $1.3 million as a result of a greater proportion of construction costs being contractually allocated to the minority partner.
- These increases were offset by a higher income tax expense of $2.9 million as discussed above; as a result, other expenses remained consistent compared to 2016.

Compensation expense

The table below provides a breakdown of compensation expense.

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars)	2017	2016	Variance	2017	2016	Variance
Salaries and benefits	$ 3,901	$ 3,403	$ 498	$ 14,169	$ 12,207	$ 1,962
Annual incentive plan ("AIP")	(1,499)	749	(2,248)	11,205	7,474	3,731
Long-term incentive plan ("LTIP")	2,350	1,703	647	3,726	3,116	610
Total compensation expense	**$ 4,752**	**$ 5,855**	**$ (1,103)**	**$ 29,100**	**$ 22,797**	**$ 6,303**

Compensation expense for the three months ended December 31, 2017 decreased by $1.1 million compared to the same period in the prior year, largely attributable to decreases in AIP. AIP expense was estimated at 15% of EBITDA for Bonus Purposes (see Section 9.6) throughout the year and final bonuses were determined in the fourth quarter based on Company, departmental and individual performance. The $1.5 million reversal to AIP expense in the fourth quarter represents the final adjustment to the initial estimation, resulting in a full-year AIP expense equal to 9% of EBITDA for Bonus Purposes. The decrease in AIP was offset by a $0.6 million increase in LTIP expense, reflecting changes in fair values for separate accounts. Additionally, the Company incurred an increase in payroll costs in the quarter attributable to staffing increases to accommodate the Company's ongoing growth plans and normal course salary adjustments.

Compensation expense for the twelve months ended December 31, 2017 increased by $6.3 million compared to the prior year. The increase was primarily due to a $3.7 million increase in AIP expense, which was driven by better performance across various investment verticals, thus resulting in higher EBITDA for Bonus Purposes, as well as higher salaries expense of $2.0 million caused largely by staffing additions and an increase in LTIP as described above.

General and administration expense

General and administration expense for the year ended December 31, 2017 showed a marginal increase of $0.6 million compared to the same period in the prior year, in line with expectations.

Interest expense

The table below provides a summary of interest expense.

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars)	2017	2016	Variance	2017	2016	Variance
Credit facility interest	$ 2,087	$ 1,636	$ 451	$ 6,580	$ 6,138	$ 442
Debentures interest	3,909	1,007	2,902	13,156	3,879	9,277
Debentures discount amortization	1,175	462	713	3,949	1,781	2,168
Mortgage interest	36	–	36	36	–	36
Total interest expense	**$ 7,207**	**$ 3,105**	**$ 4,102**	**$ 23,721**	**$ 11,798**	**$ 11,923**

Interest expense was $7.2 million for the three months ended December 31, 2017 compared to $3.1 million for the same period last year, an increase of $4.1 million. The increase was primarily driven by incremental debentures interest expense of $2.9 million and debentures discount amortization of $0.7 million in respect of the extendible convertible unsecured subordinated debentures issued on March 17, 2017 (the "2022 convertible debentures" – refer to Section 3.2, Debt).

Similarly, interest expense for the twelve months ended December 31, 2017 increased by $11.9 million to $23.7 million, primarily as a result of the incremental $9.3 million debentures interest expense and $2.2 million debentures discount amortization associated with the 2022 convertible debentures.

Other expenses (income)

The table below provides a breakdown of other expenses (income).

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars)	2017	2016	Variance	2017	2016	Variance
Net change in fair value of derivative financial instruments	$ 13,413	$ (1,032)	$ 14,445	$ 23,276	$ (8,607)	$ 31,883
Transaction costs	832	85	747	3,167	1,829	1,338
Amortization expense	1,299	1,404	(105)	5,375	5,818	(443)
Total other expenses (income)	**$ 15,544**	**$ 457**	**$ 15,087**	**$ 31,818**	**$ (960)**	**$ 32,778**

There was a net increase in the fair value of the conversion feature of the Company's outstanding convertible debentures for the three and twelve months ended December 31, 2017 (2016 – net decrease), which is reflected as an expense (2016 – income) of the Company. The value of the conversion feature increased largely because of a meaningful increase in Tricon's share price on the TSX for the three and twelve months ended December 31, 2017. The share price of the Company is one of the key drivers affecting the value of the derivative.

Income tax expense

Income tax expense for the twelve months ended December 31, 2017 increased by $1.4 million as a result of an increase in the current tax expense of $3.3 million, which was offset by a decrease in the deferred tax expense of $1.9 million. The increase in current tax expense over the prior year was the result of non-capital losses utilized in 2016 against taxable income in prior years, resulting in current tax recoveries. The decrease in deferred tax expense over the prior year was the result of higher non-capital losses that are available to apply against taxable income in future periods.

Investments – Tricon Housing Partners

As shown in the table below, investments in THP increased by $4.9 million to $306.6 million as at December 31, 2017, from $301.8 million as at December 31, 2016. The increase is a result of investment income of $18.2 million combined with aggregate advances to Investment Vehicles of $21.5 million across the portfolio. These increases were partially offset by distributions of $34.9 million, of which $26.6 million was distributed from THP1 US.

(in thousands of U.S. dollars)	As at December 31, 2016	Advances	Investment income (loss)	Distributions	As at December 31, 2017
THP1 US	$ 111,744	$ –	$ 7,627	$ (26,640)	$ 92,731
THP2 US	25,260	1,351	400	(28)	26,983
THP3 Canada	9,537	224	528	(638)	9,651
Trinity Falls	77,195	7,684	10,422	–	95,301

Side-cars[2]	17,125	3,344	(7,204)	(429)	12,836
Investments – THP	**$ 301,787**	**$ 21,496**	**$ 18,209**	**$ (34,855)**	**$ 306,637**

(1) Includes Cross Creek Ranch, Fulshear Farms, Grand Central Park, Trilogy at Verde River, Viridian, THP US SP1 and THP US SP2.
(2) Includes Trilogy at Vistancia West, Trilogy Lake Norman and Arantine Hills.

Investments – Tricon American Homes

Investments in TAH increased by $404.2 million to $884.1 million as at December 31, 2017, from $479.9 million as at December 31, 2016. The increase was driven by advances of $354.1 million, primarily for the acquisition of Silver Bay, and investment income of $113.1 million (consisting of $144.0 million of fair value gains and $114.5 million of NOI, offset by $62.2 million of non-recurring transaction costs, $62.3 million of interest expense and $20.9 million of other expenses). This increase was partly offset by cash distributions of $63.0 million.

(in thousands of U.S. dollars)	As at December 31, 2016	Advances	Investment income	Distributions	As at December 31, 2017
Investments – TAH	**$ 479,938**	**$ 354,110**	**$ 113,067**	**$ (63,000)**	**$ 884,115**

Investments – Tricon Lifestyle Communities

Investments in TLC increased by $9.5 million to $62.1 million as at December 31, 2017, from $52.6 million as at December 31, 2016, primarily as a result of net operating income and fair value gains (see Section 3.1), along with $2.1 million of advances for ongoing capital enhancement initiatives.

(in thousands of U.S. dollars)	As at December 31, 2016	Advances	Investment income	Distributions	As at December 31, 2017
Investments – TLC	**$ 52,591**	**$ 2,102**	**$ 7,381**	**$ –**	**$ 62,074**

Investments – Tricon Lifestyle Rentals (formerly Tricon Luxury Residences)

Investments in TLR increased by $26.8 million to $89.2 million as at December 31, 2017, from $62.4 million as at December 31, 2016. The investment balance is comprised of $35.5 million invested in TLR Canada and $53.7 million invested in TLR U.S. The overall increase during the year ended December 31, 2017 was mainly driven by $12.7 million of fair value gains (see Section 3.1) and by advances made to existing projects in the U.S.

(in thousands of U.S. dollars)	As at December 31, 2016	Advances	Investment income	Distributions	As at December 31, 2017
Investments – TLR	**$ 62,410**	**$ 14,424**	**$ 12,391**	**$ –**	**$ 89,225**

Debt

The following table summarizes the consolidated debt position of the Company.

	Terms				Debt balance (in thousands of U.S. dollars)[1]	
(in thousands of dollars)	Currency	Total principal amount	Maturity date	Interest rate terms	December 31, 2017	December 31, 2016
Revolving term credit facility	USD	$ 365,000	June 2020	LIBOR+3.25%	$ 161,500	$ 113,750
2020 convertible debentures	CAD	$ 85,693	March 2020	5.60%	60,951	55,107
2022 convertible debentures	USD	$ 172,500	March 2022	5.75%	153,196	–
Mortgage	CAD	$ 10,000	November 2024	4.38%	7,957	–
					$ 383,604	**$ 168,857**

(1) Balances shown are presented in U.S. dollars and exclude the fair value of derivative financial instruments embedded in the convertible debentures (see Section 3.1, Other expenses (income)). The 2020 convertible unsecured subordinated debentures are denominated in Canadian dollars. USD/CAD exchange rates used to present debt balances in U.S. dollars are at December 31, 2017: 1.2545 and at December 31, 2016: 1.3427.

The Company has access to a $365.0 million corporate revolving credit facility provided by a syndicate of lenders. As of December 31, 2017, $161.5 million was drawn from the facility.

As of December 31, 2017, there was C$85.7 million in outstanding aggregate principal amount of 5.60% convertible unsecured subordinated debentures of the Company (the "2020 convertible debentures") which, in the aggregate, are convertible into 8,744,184 common shares of the Company at a conversion price of C$9.80 per common share. The 2020 convertible debentures are due on March 31, 2020, bear interest at 5.60% per annum and are redeemable by the Company, provided certain conditions are met. In 2017, $28,000 (C$38,000) of 2020 convertible debentures were converted into 3,877 common shares.

As of December 31, 2017, there was $172.5 million in outstanding aggregate principal amount of 5.75% extendible convertible unsecured subordinated debentures of the Company (the "2022 convertible debentures"). The 2022 convertible debentures bear interest at 5.75% per annum and are convertible into 16,491,397 common shares of the Company at a conversion rate of 95.6023 common shares per $1,000 principal amount, or a conversion price of approximately $10.46 per common share (equivalent to C$13.12 as of December 31, 2017). In 2017, there were no conversions of the 2022 convertible debentures.

On November 22, 2017, the Company obtained an $8.0 million (C$10.0 million) mortgage loan to purchase a commercial condominium, which will serve as the Company's new head office in Toronto. The mortgage carries a fixed interest rate of 4.38% and has a seven-year term to maturity.

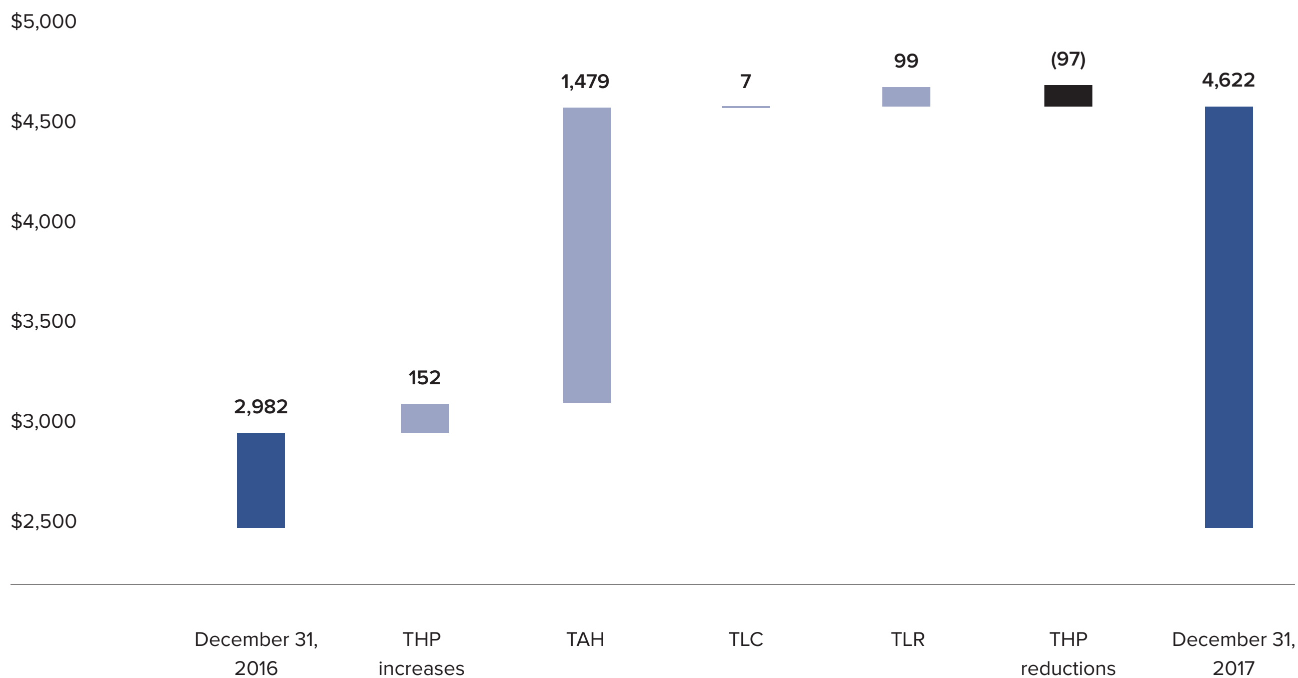
3.3 Assets under management

Assets under management ("AUM") (KPI measure; refer to Section 8.1) were $4.6 billion as at December 31, 2017, representing an increase of $1.6 billion since December 31, 2016. Refer to Section 8.2 for a detailed description of AUM.

As shown in the chart below, which summarizes the changes in AUM over the period on a vertical-by-vertical basis, the changes in AUM since December 31, 2016 were:

- A $151.9 million increase in THP AUM as a result of $123.3 million of advances primarily to separate accounts, side-cars, THP2 US and Trinity Falls, as well as $28.6 million of fair value gains.
- An increase of $1.5 billion in TAH AUM primarily driven by the $1.4 billion acquisition of Silver Bay, $176.5 million of fair value adjustments related to home price appreciation in the portfolio (which excludes projected future disposition fees), offset by $186.8 million of non-core homes disposed.
- An increase of $7.2 million in TLC AUM primarily due to $3.5 million of fair value gains recognized during the year and ongoing enhancement capital expenditures.
- An increase of $99.4 million in TLR AUM resulting from additional construction expenditures and fair value gains recognized.
- A decrease of $97.0 million in THP AUM, predominantly as a result of $67.5 million of capital distributions from THP1 US, separate accounts, side-cars and THP2 US. The remaining decrease is attributable to a $15.0 million reduction in commitment for Cross Creek Ranch and $12.5 million of unfavourable fair value adjustments from separate account and side-car investments (see Section 4.1).

CHANGES IN ASSETS UNDER MANAGEMENT



The following table provides a further breakdown of the components of principal investment and Private Funds and Advisory AUM.

(1) USD/CAD exchange rates used at each balance sheet date are: at Dec 31, 2017: 1.2545; Sep 30, 2017: 1.2480; Jun 30, 2017: 1.2977; Mar 31, 2017: 1.3299; Dec 31, 2016: 1.3427.

(2) Tricon American Homes and Tricon Lifestyle Communities assets under management are equal to the aggregate fair value of investment properties and investment properties held for sale before projected future disposition fees and therefore may differ from total capitalization in the verticals.

3.4 Subsequent events

On February 27, 2018, the Board of Directors of the Company declared a dividend of seven cents per share in Canadian dollars payable on or after April 15, 2018 to shareholders of record on March 31, 2018.

Subsequent to year-end, the Company repurchased 431,931 of its common shares for C$4.6 million under its normal course issuer bid (see Section 5.3).

Subsequent to year-end, the Company classified its investment in TLC as held for sale as a result of TLC initiating an active program to dispose of all of its underlying assets and liabilities. TLC has committed to a plan for the sale of the underlying parks, and it launched an official marketing process on January 8, 2018.

4. OPERATIONAL REVIEW OF INVESTMENT VERTICALS AND PRIVATE FUNDS AND ADVISORY BUSINESS

Management believes that information concerning the underlying activities within each of the Company's investment verticals is useful for investors in understanding the Company's overall performance, and this section presents key operating highlights for the quarter on a vertical-by-vertical basis. Although the Company's performance is primarily measured by investment income and changes in fair value of its various investments, management also monitors the underlying activities within those investments using key performance indicators to provide a better understanding of the performance of the Company's investments. A list of these key performance indicators, together with a description of what information each measure reflects and the reasons why management believes the measure to be useful or relevant in evaluating the underlying performance of the Company's investments, is set out in Section 8.1, Key performance indicators. The supplemental measures presented herein are not recognized under IFRS and should not be construed as alternatives to investment income determined in accordance with IFRS as indicators of Tricon's financial performance. Tricon's method of calculating these measures may differ from other issuers' methods and, accordingly, these measures may not be comparable to similar measures presented by other publicly-traded entities.

4.1 Tricon Housing Partners

A summary of THP's principal investments is presented in the following table with a reconciliation of the investment balances to AUM (KPI measure; refer to Section 8.1). The table also summarizes historical and projected cash flows to Tricon arising from the sale of finished lots, homes and condominium units from THP's projects generally over the next eight to ten years (forward-looking information; refer to page 1).

	THP principal investments					Tricon's cash flows		
(in thousands of U.S. dollars)	THP's share of Investment Vehicle	Outstanding invested capital (at cost)	Investment at fair value A	Unfunded commitment B	Principal investment AUM A + B	Advances to date	Distributions to date[1]	Projected distributions net of advances remaining
THP1 US	68.4%	$ 56,391	$ 92,731	$ 10,975	$ 103,706	$ 269,676	$ 275,474	$ 120,347
THP2 US	7.5%	20,970	26,983	3,875	30,858	21,125	28	28,713
THP3 Canada	10.2%	9,804	9,651	6,139	15,790	9,804	2,854	12,023

Investment income – 2017 (12 months)	$ 18,209
As a % of invested capital at December 31, 2017	7.4%

(1) Distributions include repayments of preferred return and capital.

(2) Separate accounts include Cross Creek Ranch, Grand Central Park, Fulshear Farms, Trilogy at Verde River, Viridian, THP US SP1 and THP US SP2.

(3) Side-cars include Trilogy at Vistancia West, Trilogy Lake Norman and Arantine Hills.

For the year ended December 31, 2017, investment income of $18.2 million represented a 7.4% net return on outstanding invested capital. This metric may fluctuate quarter to quarter or year over year based on the timing of development milestones and cash flows, and project budget revisions. For the year ended December 31, 2017, investment income underperformed management's target return of a 9%–11%, largely as a result of decreases in projected future cash flows from side-car investments (which have a co-investment by THP2 US), as discussed below.

From an operational perspective, highlights for THP's principal investments include:

THP1 US

Over the course of 2017, THP1 US distributed $39.0 million to its investors, including $26.6 million to Tricon. Of the total distributions, $25.6 million was generated from the closing of units at the Rockwell condominium project in San Francisco. Of the remainder, the two largest contributors were the Eskaton Placerville homebuilding project in Sacramento, California and the Greater Bay Portfolio in Northern California. THP1 US is expected to continue to generate meaningful cash distributions of approximately $120 million to Tricon through 2020.

THP2 US

In 2017, THP2 US distributed $14.9 million to its investors including $7.3 million from home closings at Smyrna Grove, a homebuilding project in Atlanta, Georgia, and $4.3 million from projects in Phoenix, Arizona, namely Santa Rita Ranch, Trilogy at Vistancia West and Wigwam at Litchfield Park.

In spite of positive cash flow distributions from assets being harvested, the fund's performance was negatively impacted by its co-investments in two active-adult projects (Trilogy Vistancia West and Trilogy Lake Norman) and in Arantine Hills, which have undergone unfavourable budget revisions this quarter. These projects are discussed in detail in the Side-cars section below.

THP3 Canada

THP3 Canada distributed $8.4 million (C$10.5 million) to its investors during 2017, including $0.8 million (C$1.1 million) to Tricon, mainly from the Mahogany master-planned community development in Calgary, Alberta. These distributions are largely attributable to infrastructure recovery proceeds. This project has continued to register strong sales with 430 home sales in 2017, an increase of 9% from 2016. Other investments in the fund performed in line with the budget.

Trinity Falls

At the Trinity Falls master-planned community in Dallas, Texas, the project continued its development and sales success during the year. A total of 177 lots were sold to homebuilders and 220 homes were sold by homebuilders to end consumers in 2017, compared to 95 lots and 75 homes sold in the prior year (following the acquisition in July 2016). In October 2017, the project closed the acquisition of the Frazier Tract, a 300-acre parcel of adjacent land that is expected to add approximately 950 lots to the project. Additionally, the project received approvals from the City Council of McKinney, which had a favourable impact on the project plan and budget. As a result, Trinity Falls now expects to generate significant cash distributions of approximately $288 million to Tricon through 2035.

Separate accounts

Viridian in Dallas-Fort Worth, Texas distributed $12.7 million to its investors during 2017, including $2.3 million to Tricon. At Viridian, 350 lots were sold to homebuilders in 2017 and 291 homes were sold by homebuilders to end consumers, compared to 345 lot sales and 46 home sales in 2016. During the fourth quarter of 2017, the Viridian Lake Club amenity centre was completed, which is expected to positively impact future lot prices and home sales. The project continues to perform in line with expectations.

Cross Creek Ranch in Houston, Texas distributed $19.4 million to its investors during 2017, including $1.9 million to Tricon. Cross Creek Ranch experienced robust home and lot sales during the year as 417 lots were sold to homebuilders and 397 homes were sold to homeowners, compared to 397 lot sales and 377 home sales in 2016. The increase in sales volume has largely been driven by the addition of new entry-level product, where the bulk of the sales activity continues to be concentrated. The diverse product selection, along with the community's established amenity and resident base, has continued to support the project's position as the best-selling new home community in the Katy-South submarket.

At Grand Central Park in Houston, Texas, 162 lots were sold to homebuilders during the year compared to 145 lots sold in 2016. The project also sold 98 homes to homeowners during the year compared to 15 home sales made in 2016. In spite of the increase in 2017 compared to 2016, home sales have been slower than expected since the project's grand opening in April 2017, particularly among larger, more expensive homes. As a result, an in-depth analysis is being performed to identify further opportunities to drive sales including a revised product mix focused on more entry-level product.

Trilogy at Verde River, an active-adult development in Phoenix, Arizona, sold 103 homes to consumers in 2017 compared to 97 in 2016 but underwent an unfavourable budget revision as absorption was lower than expected and higher labour costs impacted profitability.

Side-cars

In the fourth quarter, THP's investments in active-adult projects (side-car investments include Trilogy Vistancia West and Trilogy Lake Norman) underwent unfavourable budget revisions to reflect: (i) increased competition in the active-adult community segment; (ii) lower demand for premium-priced active-adult product (which is the market segment that THP is targeting), resulting in slower absorption and lengthened project timelines; and (iii) increased construction labour costs. As a result of these challenges, long-term cash flow projections were extended and adjusted downwards this quarter, which resulted in appraised value declining year-over-year. THP is undertaking a number of remedial steps to improve performance, including a potential redesign of the product offering to make it more in line with consumer demands.

In addition, the budget for Arantine Hills in Corona, California (Bedford Ranch) was revised downwards due to delays in obtaining municipal approvals, lot pricing being below expectations, and future lot sales expectations being adjusted to reflect a more conservative pricing forecast. The lower lot pricing is reflective of significant homebuilder cost inflation experienced over the past twelve months and a slower than anticipated housing recovery in the Inland Empire. First lot closings are expected in the second or third quarter of 2018 and initial home closings are anticipated in late 2018 or early 2019.

These market trends continue to affect the timing of cash flows and project budgets, which may impact the near-term performance of certain other projects in the THP portfolio.

4.2 Tricon American Homes

During the year, TAH achieved several key milestones, including completing the acquisition and integration of Silver Bay and closing multiple debt refinancing transactions. In addition, TAH posted its highest-ever annual NOI margin of 62.3% as a result of continued strong rent growth across the portfolio coupled with low turnover rates and expense containment.

TAH's fourth quarter reflects continued strong operating performance, including a 64.4% NOI margin, 64.1% same home NOI margin, 7.7% year-over-year same home NOI growth (10.6% year-over-year growth rate for the twelve-month period) and 4.4% rent growth (4.3% for the same home portfolio). These key metrics exclude the impact of non-recurring expenses from hurricane-related damages.

TAH's stabilized occupancy of 96.7% remained unchanged for the quarter and the leased occupancy rate decreased nominally during the quarter from 96.1% at September 30, 2017 to 95.8% at December 31, 2017, as TAH's acquisition program resumed and vacant homes were acquired. The overall portfolio occupancy rate continues to reflect strong demand, which speaks to a combination of factors, including: (i) a very low national unemployment rate of 4.1%; (ii) a relatively tight market for mortgage credit; (iii) household formation outstripping new home construction; and (iv) the broad acceptance of institutional single-family rental as a bona fide long-term housing alternative. In addition, TAH's annualized turnover rate in the fourth quarter decreased to 27.6% from 31.4% recorded in the third quarter as a result of seasonally lower turnover during the winter months. On a year-to-date basis, the annual turnover was 29.6%, which provides a more accurate picture of TAH's performance as it eliminates the seasonality factor.

Throughout the fourth quarter, TAH continued its program of restoring properties damaged by Hurricanes Harvey and Irma and incurred additional costs of $0.8 million as incremental repairs and maintenance expenses for minor damage. This program is now substantially complete, and the majority of hurricane-affected homes have been repaired. Applicable damage insurance has been claimed, and TAH has received an advance from its insurers subject to final approval of its claims. All insurance proceeds are expected to be recognized as income in 2018.

In the fourth quarter, TAH completed the sale of 1,523 non-core homes to a large institutional single-family rental owner and operator, including 1,247 homes acquired from Silver Bay. The homes sold include: (i) homes in Tucson, Arizona and Columbus, Ohio, which are non-core markets for TAH; (ii) homes with rents below $1,000 per month, which fall outside of TAH's middle market strategy; and (iii) homes that are geographic outliers within its core markets. The homes were sold at their effective acquisition cost basis, and the total disposition proceeds of approximately $153 million were primarily used to repay a portion of the outstanding Silver Bay acquisition facility. Following the sale of the non-core home portfolio, TAH restarted its acquisition program by acquiring 160 homes during the fourth quarter and ended the year with a portfolio of 15,218 homes. The acquisition program will continue to ramp up in 2018 with a goal of purchasing approximately 400 to 500 homes per quarter. With the integration of Silver Bay substantially complete, TAH is well-positioned to focus its efforts on continued portfolio growth and operational efficiency in 2018 and beyond.

The tables in this section provide a summary of certain operating metrics for TAH's rental home portfolio that management uses to evaluate the performance of TAH over time and relative to industry peers. Many of the metrics referenced in these tables are KPI measures that are defined in Section 8.1.

	Q4 2017	Q3 2017	Q2 2017	Q1 2017	Q4 2016	Q3 2016	Q2 2016	Q1 2016
Total homes owned	15,218	16,594	16,660	7,821	7,765	8,006	8,018	7,603
Less homes held for sale	109	1,613	153	322	170	324	114	65
Rental homes	15,109	14,981	16,507	7,499	7,595	7,682	7,904	7,538
Homes acquired	160	–	9,054	168	–	14	452	482
Less homes disposed	(1,536)	(66)	(215)	(112)	(241)	(26)	(37)	(72)
Net homes acquired (disposed) during the quarter	(1,376)	(66)	8,839	56	(241)	(12)	415	410
Occupancy	95.8%	96.1%	96.9%	95.6%	95.6%	91.7%	88.9%	88.4%
Stabilized occupancy	96.7%	96.7%	97.2%	96.5%	96.9%	95.4%	95.9%	95.4%
Annualized turnover rate	27.6%	31.4%	31.2%	25.6%	20.0%	30.1%	30.1%	26.7%
Average monthly rent	$ 1,283	$ 1,256	$ 1,243	$ 1,247	$ 1,227	$ 1,217	$ 1,191	$ 1,175
Average quarterly rent growth – renewal	4.0%	4.0%	4.4%	4.3%	4.4%	4.4%	4.2%	3.6%
Average quarterly rent growth – new move-in	5.0%	5.6%	5.7%	6.0%	5.1%	6.3%	6.4%	4.5%
Average quarterly rent growth – blended	4.4%	4.6%	4.9%	5.0%	4.7%	5.1%	5.0%	4.1%

The above metrics are key drivers of TAH revenue and ultimately its net operating income (KPI measure; refer to Section 8.1). Net operating income and fair value gains from home price appreciation are the main contributors to investment income – TAH (per Tricon's income statement). The table below presents a breakdown of TAH net operating income and a reconciliation to investment income – TAH on Tricon's income statement. The financial information presented in this table and throughout this section is an aggregation of all entities and balances within the TAH vertical on a standalone basis and does not necessarily reflect the audited financial information of any particular TAH entity.

Interest expense (B)	$ 19,575	$ 6,475	$ 13,100	$ 62,282	$ 20,872	$ 41,410
Weighted average interest rate	3.8%	3.1%		3.7%	2.9%	

(1) Includes bad debt expense of $330 (2016 – $174) and $2,068 (2016 – $945) for the three and twelve months ended December 31, 2017, respectively.
(2) Includes $798 and $1,790 of non-recurring storm-related incremental expenses for the three and twelve months ended December 31, 2017, respectively.
(3) Comparative periods have been reclassified to conform with the current period presentation.
(4) Refer to Section 3.1 for a discussion of other expenses and interest expense.
(5) Fair value gain is net of projected future disposition fees. Comparative periods have been reclassified to conform with the current period presentation.
(6) Reflects deemed performance fees to minority interest holders on assumed liquidation of the rental home portfolio.

Total portfolio

During the fourth quarter of 2017, total revenue increased by $28.4 million or 106% to $55.1 million compared to $26.7 million in the same period in 2016. This is mainly attributable to additional revenue earned from the Silver Bay portfolio and NOI growth achieved in the legacy TAH portfolio.

The combination of a larger portfolio and a 4.9% increase in NOI margin (as discussed below) contributed to a 123% increase in NOI in the fourth quarter of 2017 to $35.5 million compared to $15.9 million in the same period in 2016.

For the three months ended December 31, 2017, TAH's NOI margin increased to 64.4% compared to 59.5% for the three months ended December 31, 2016. NOI margin increased as a result of strong rent growth and lower repairs and maintenance expenses due to the increased benefits from internalization of the repairs and maintenance function. TAH has also benefited from operational synergies from the Silver Bay acquisition, largely by reducing duplicate headcount and integrating front-office and back-office functions. Note that these total portfolio metrics exclude $0.8 million of non-recurring storm-related expenses.

TAH's fair value gain in the three months ended December 31, 2017 was $51.3 million compared to $9.1 million in the three months ended December 31, 2016. The gain was the result of BPO and HPI valuations (see Section 9.1) and reflects ongoing home price appreciation supported by strong demand fundamentals in TAH's target markets. The HPI increase this quarter was 1.4% (5.6% annualized) compared to a 0.9% HPI increase in the fourth quarter of 2016 (3.6% annualized), applied to a larger portfolio of homes.

Funds from operations and core funds from operations

Funds from operations ("FFO") and core funds from operations ("Core FFO") (KPI measures; refer to Section 8.1) are metrics that management believes to be helpful in evaluating TAH's business and comparing its performance to industry peers. FFO represents investment income excluding the impact of fair value adjustments and other non-cash items. Core FFO presents FFO as a normalized figure, adjusting for transaction costs and non-recurring items. The table below provides a reconciliation of investment income – TAH (as presented on Tricon's income statement) to FFO and Core FFO.

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars)	2017	2016	Variance	2017	2016	Variance
Investment income – TAH	$ 45,709	$ 3,439	$ 42,270	$ 113,067	$ 50,081	$ 62,986
Fair value gain[1]	(51,307)	(9,099)	(42,208)	(143,993)	(41,061)	(102,932)
Loss on sale of homes	–	–	–	–	241	(241)
Non-controlling interests	–	3,814	(3,814)	706	5,754	(5,048)
Depreciation of fixed assets	361	131	230	1,179	451	728
Deferred tax expense (recovery)	(50)	(3,961)	3,911	1,490	(7,029)	8,519
Deferred financing costs	(638)	–	(638)	(698)	–	(698)
Funds from operations (FFO)	**$ (5,925)**	**$ (5,676)**	**$ (249)**	**$ (28,249)**	**$ 8,437**	**$ (36,686)**
Transaction costs and non-recurring costs[2]	18,678	10,560	8,118	64,007	13,878	50,129
Core funds from operations (Core FFO)	**$ 12,753**	**$ 4,884**	**$ 7,869**	**$ 35,758**	**$ 22,315**	**$ 13,443**

(1) Fair value gain is presented net of change in projected future disposition fees. Comparative periods have been reclassified to conform with the current period presentation.

(2) Full year 2017 includes: transaction costs of $12,191 related to the Silver Bay acquisition; Silver Bay integration-related expenses of $5,307; financing issuance costs of $42,003; repair costs for hurricane damage of $1,790; and other non-recurring costs of $2,716. Full year 2016 includes costs of $10,111 related to the 2016-1 securitization transaction, internalization-related expenses of $1,797, credit facility amendment costs of $799 and non-recurring costs of $1,171.

For the fourth quarter of 2017, Core FFO increased by $7.9 million or 161% compared to the same period in the prior year. This variance was driven by a larger portfolio of homes and concurrent growth in NOI, offset by higher interest expense on the higher outstanding debt balance incurred in relation to the Silver Bay acquisition.

Same home portfolio

"Same home" or "same home portfolio" includes homes that were stabilized 90 days prior to the first day of the prior-year comparative period as per the guidelines of the National Rental Home Council. It excludes homes that have been sold and homes that have been designated for sale. This same home portfolio is defined on January 1 of each reporting year. Based on this definition, any home included in the same home portfolio will have satisfied the conditions described above prior to September 30, 2015, and those homes are held in operations throughout the full periods presented in both 2016 and 2017.

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars, except per home data)	2017	2016	Variance	2017	2016	Variance
Operating metrics – same home						
Rental homes	4,412	4,412	–	4,412	4,412	–
Occupancy	97.0%	97.1%	(0.1%)	97.0%	97.1%	(0.1%)
Annualized turnover rate	27.9%	22.4%	(5.5%)	28.3%	31.2%	2.9%
Average monthly rent	$ 1,318	$ 1,277	$ 41	$ 1,318	$ 1,277	$ 41
Average quarterly rent growth – renewal	3.9%	4.7%	(0.8%)	4.3%	4.4%	(0.1%)
Average quarterly rent growth – new move-in	5.1%	5.9%	(0.8%)	5.8%	6.1%	(0.3%)
Average quarterly rent growth – blended	4.3%	5.2%	(0.9%)	4.8%	5.0%	(0.2%)

For the 4,412 homes comprising the same home portfolio, occupancy was 97.0% in the fourth quarter of 2017, which is on par with the 97.1% recorded in the same period in 2016. This portfolio's annualized turnover in the three months ended December 31, 2017 was 27.9%, an increase of 5.5% from the annualized turnover of 22.4% in the same period in 2016, which was uncharacteristically low. For the twelve months ended December 31, 2017, the same home annualized turnover rate improved by 2.9% to 28.3% compared to 31.2% in 2016 and is more reflective of TAH's expected long-term performance.

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars)	2017	2016	Variance	2017	2016	Variance

Homeowners' association (HOA) costs	264	263	1	1,022	1,006	16
Other direct expenses	402	314	88	1,449	1,240	209
Total operating expenses	6,030	6,560	(530)	25,520	24,977	543
Net operating income (NOI)	**$ 10,790**	**$ 10,016**	**$ 774**	**$ 41,182**	**$ 37,246**	**$ 3,936**
Net operating income (NOI) growth			**7.7%**			**10.6%**
Net operating income (NOI) margin	**64.1%**	**60.4%**		**61.7%**	**59.9%**	

TAH achieved its highest-ever NOI margin of 64.1% for the same home portfolio for the three months ended December 31, 2017. Total revenue from the same home portfolio increased by $0.2 million or 1% to $16.8 million in the fourth quarter of 2017 compared to $16.6 million for the same period in the prior year primarily due to increases in the average monthly rent. Operating expenses also decreased by $0.5 million or 8% to $6.0 million in the fourth quarter of 2017 from $6.6 million in the same period in 2016 as a result of lower repairs and maintenance costs and reduced property tax accruals compared to the prior year's fourth quarter. Higher revenues along with the containment of controllable expenses resulted in same home NOI growth of 7.7% year-over-year to $10.8 million compared to $10.0 million in the fourth quarter of 2016 (10.6% year-over-year NOI growth rate for the twelve-month period). These same home portfolio metrics exclude $0.2 million of non-recurring storm-related incremental expenses.

For the year ended December 31, 2017, the reported same home NOI margin increased to 61.7% from 59.9% as a result of an increase in total revenue of $4.5 million or 7% driven by rent growth, offset by higher total operating expenses. Operating expenses increased by $0.5 million or 2% to $25.5 million from $25.0 million in the prior year, driven by an increase of $0.7 million or 9% in property taxes as a result of an increase in the fair value of the homes, offset by a decrease of $0.6 million or 8% in the repairs, maintenance and turnover expense due to management's diligent focus on repairs and maintenance. These same home portfolio metrics exclude $0.5 million of non-recurring storm-related incremental expenses.

Financing

In the fourth quarter, TAH continued to optimize its overall debt structure by continuing its initiative to stagger maturities and increase its proportion of fixed-rate debt.

On October 6, 2017, TAH amended and restated its existing warehouse credit facility to increase the size of the facility to $500.0 million in order to fund the repayment of its first securitization loan, TAH 2015-1. The interest rate payable under the amended and restated facility, which matures in October 2019, is unchanged at one-month LIBOR plus 3.00%, and the remaining terms of the debt, including the debt covenants, are substantially similar. Concurrently, TAH repaid all amounts outstanding under its securitization loan, TAH 2015-1, resulting in approximately 3,200 homes being released from the securitization collateral pool.

On October 24, 2017, TAH entered into a new $347.6 million term loan facility with Morgan Stanley Asset Funding Inc. as administrative agent. The loan carries a floating interest rate of one-month LIBOR plus 2.00%, has a five-year term to maturity, an aggregate loan-to-value ratio of 70% and is secured by mortgages on approximately 2,400 single-family rental homes. A subsidiary of TAH is the borrower under the facility, which is subject to customary financial and non-financial covenants.

On December 20, 2017, TAH closed its second securitization transaction of the year, TAH 2017-2. The transaction involved the issuance and sale of six classes of fixed-rate pass-through certificates with an aggregate face amount of $365.0 million, a weighted average interest rate of 3.58% and a six-year term to maturity. This transaction is collateralized by approximately 2,600 of TAH's single-family rental properties. Proceeds were used to repay a portion of the Silver Bay acquisition warehouse credit facility and the TAH warehouse credit facility.

Assets under management and investment balance

TAH's AUM (KPI measure; refer to Section 8.1) is based on the fair value of the homes in the portfolio, which is determined via the HPI or BPO methodologies discussed in Section 9.1. The residual equity value (after deducting debt and minority interest at TAH) determines the value of Tricon's investment in TAH on its balance sheet, as summarized below.

(in thousands of U.S. dollars)		Q4 2017	Q3 2017	Q2 2017	Q1 2017	Q4 2016	Q3 2016	Q2 2016	Q1 2016

(1) Cumulative capital expenditures include initial, post-rehab and other capital expenditures.
(2) Cumulative fair value adjustment is net of capital expenditures and third-party operator performance fees.
(3) Other net assets include working capital at TAH's subsidiaries.
(4) Comparative periods have been restated to conform with the current period presentation.

As at December 31, 2017, TAH's rental portfolio is diversified across 16 target markets. Market-level details are presented below.

Geography	Total homes owned[1]	Rental homes	Homes leased	Vacant homes under marketing	Vacant homes under turn or renovation	Occupancy	Stabilized occupancy

(1) Includes 109 homes held for sale.

(2) The homes in the Tucson and Columbus markets are classified as for sale and are not part of the rental portfolio in the occupancy and cost per home calculations.

(3) Average capital expenditures per home only reflects capital expenditures incurred by TAH and not by prior institutional owners, where applicable.

4.3 Tricon Lifestyle Communities

During 2017, TLC continued to generate strong internal growth by driving rental increases and advancing capital expenditure projects. The tables presented in this section provide a summary of operating metrics for the portfolio, which management uses to evaluate the performance of TLC over time and relative to industry peers. Many of the metrics referenced in these tables are KPI measures as defined in Section 8.1.

	Q4 2017	Q3 2017	Q2 2017	Q1 2017	Q4 2016	Q3 2016	Q2 2016	Q1 2016
Total number of parks	14	14	14	14	14	11	10	10
Parks acquired during the period	–	–	–	–	3	1	–	5
Total number of rental sites	3,065	3,065	3,065	3,065	3,065	2,644	2,467	2,467

Annualized turnover rate	7.1%	4.8%	4.3%	9.6%	5.8%	4.7%	5.5%	5.8%
Average gross monthly rent per site	$ 425	$ 423	$ 422	$ 424	$ 413	$ 385	$ 376	$ 378
Average rent increase	5.4%	0.6%	3.0%	3.2%	3.9%	4.0%	3.3%	3.4%

The above metrics are key drivers of TLC revenue and ultimately its net operating income (KPI measure; refer to Section 8.1). Net operating income, together with fair value gains, are the main contributors to investment income – TLC (per Tricon's income statement). The table below presents a breakdown of TLC net operating income and a reconciliation to investment income – TLC on Tricon's income statement. The financial information presented in this table and throughout this section is an aggregation of all entities and balances within the TLC vertical on a standalone basis and does not necessarily reflect the audited financial information of any particular TLC entity.

Other income (expenses)	(22)	863	(885)	(741)	455	(1,196)
Fair value gain	90	54	36	3,536	1,766	1,770
Interest expense	(854)	(727)	(127)	(3,383)	(2,545)	(838)
Investment income – TLC (per Tricon income statement)	**$ 1,187**	**$ 1,731**	**$ (544)**	**$ 7,381**	**$ 5,108**	**$ 2,273**

(1) Rental revenue includes base rent, utilities reimbursements, miscellaneous income and bad debt expense where applicable.

For the three and twelve months ended December 31, 2017, rental revenue increased by $0.8 million and $4.4 million, respectively, compared to $2.8 million and $9.6 million in 2016. These increases are primarily attributed to the four communities acquired in the second half of 2016, which contributed an incremental $0.5 million and $3.4 million of rental revenue in the three and twelve months ended December 31, 2017, respectively. Rental rate increases and occupancy improvements at the existing communities accounted for the remainder of the full-year increase.

TLC achieved occupancy increases of 4.3% from 82.2% as at December 31, 2016 to 86.5% as at December 31, 2017, as a result of the substantial completion of capital expenditure programs across the portfolio, and the successful leasing efforts aided by the repositioning of the TLC brand.

The NOI margin for the three and twelve months ended December 31, 2017 was 55.2% and 56.8%, respectively, compared to 54.5% and 56.6% in 2016. The increase in NOI margin was primarily attributable to rent increases corresponding with the substantial completion of several capital enhancement programs across the portfolio.

In the interest of simplifying its business model and focusing on investment verticals where scale and industry leadership can be achieved, Tricon is pursuing an orderly exit of its investment in the TLC manufactured housing business and commenced a formal marketing process in January 2018 to sell all communities. The planned capital expenditure programs across the portfolio are now substantially complete with the exception of Rosehaven.

Funds from operations and core funds from operations

Funds from operations ("FFO") and core funds from operations ("Core FFO") (KPI measures; refer to Section 8.1) are metrics that management believes to be helpful in evaluating TLC's business and comparing its performance to industry peers. FFO represents investment income excluding the impact of fair value adjustments and other non-cash items. Core FFO presents FFO as a normalized figure, adjusting for transaction costs and non-recurring items. The table below provides a reconciliation of investment income – TLC (as presented on Tricon's income statement) to FFO and Core FFO.

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars)	2017	2016	Variance	2017	2016	Variance
Investment income – TLC	$ 1,187	$ 1,731	$ (544)	$ 7,381	$ 5,108	$ 2,273
Fair value gain	(90)	(54)	(36)	(3,536)	(1,766)	(1,770)
Other	(518)	(1,077)	559	(690)	(1,185)	495
Funds from operations (FFO)	**$ 579**	**$ 600**	**$ (21)**	**$ 3,155**	**$ 2,157**	**$ 998**
Transaction costs and non-recurring costs	260	(3)	263	415	25	390
Core funds from operations (Core FFO)	**$ 839**	**$ 597**	**$ 242**	**$ 3,570**	**$ 2,182**	**$ 1,388**

Core FFO for the fourth quarter of 2017 increased to $0.8 million compared to $0.6 million in the fourth quarter of 2016, mainly as a result of the contribution of three communities acquired in December 2016. Similarly, Core FFO for the year ended December 31, 2017 increased to $3.6 million from $2.2 million for the same reason.

Assets under management and investment balance

TLC's AUM (KPI measure; refer to Section 8.1) is based on the fair value of the parks in the portfolio, which is determined via the discounted cash flow methodology discussed in Section 9.1. The residual equity value (after deducting property-level debt and minority interest) determines the value of Tricon's investment – TLC on its balance sheet, as summarized below.

(in thousands of U.S. dollars)	Q4 2017	Q3 2017	Q2 2017	Q1 2017	Q4 2016	Q3 2016	Q2 2016	Q1 2016
Fair value of parks (AUM) A	**$ 137,780**	**$ 136,371**	**$ 134,310**	**$ 132,406**	**$ 130,560**	**$ 98,802**	**$ 87,633**	**$ 85,964**
Add:								
Other net assets[1] B	3,075	2,645	1,836	1,918	1,654	607	442	745

Parkhaven	Phoenix, AZ	Age-restricted	28.3	455	409	76.3%	66.8%
Rosehaven	Phoenix, AZ	Age-restricted	36.3	411	416	77.9%	53.8%
Sundowner	Phoenix, AZ	Age-restricted	13.7	207	381	70.0%	36.7%
Brighthaven	Phoenix, AZ	Age-restricted	16.6	177	484	91.5%	71.2%
Riverdale	Indio, CA	Age-restricted	21.2	185	495	94.1%	92.4%
Palmdale	Indio, CA	Age-restricted	19.2	151	534	98.7%	98.7%
Springdale	San Marcos, CA	Family	11.8	85	691	98.8%	98.8%
Total/Weighted average			**260.6**	**3,065**	**$ 425**	**86.5%**	**72.8%**

(1) Represents average of gross rents per the lease agreements, which may include utility reimbursements. The structure of utility reimbursements varies among communities.

(2) Communities with park model homes as the majority housing type.

(3) KPI measure; see Section 8.1.

4.4 Tricon Lifestyle Rentals (formerly Tricon Luxury Residences)

TLR progressed well on the development of its existing luxury rental apartment projects during 2017. A summary of TLR’s principal investments is presented below with a reconciliation of the investment balances to AUM (KPI measure; refer to Section 8.1).

		TLR principal investments					
(in thousands of U.S. dollars)	Location	TLR’s share of investment vehicle	Outstanding invested capital (at cost)	Investment at fair value[1] A	Share of outstanding project debt B	Unfunded equity commitment C	Principal investment AUM A + B + C
The Selby (592 Sherbourne)	Toronto, ON	15%	$ 6,513	$ 11,981	$ 7,713	$ –	$ 19,694
57 Spadina	Toronto, ON	20%	6,812	6,812	3,795	–	10,607
Scrivener Square	Toronto, ON	50%	8,959	9,652	10,362	10,973	30,987
Shops of Summerhill	Toronto, ON	25%	5,033	7,183	3,447	–	10,630
The McKenzie	Dallas, TX	90%	33,809	42,224	20,528	2,692	65,444
The Maxwell	Frisco, TX	90%	21,281	26,218	10,801	2,052	39,071
Total			**$ 82,407**	**$ 104,070**	**$ 56,646**	**$ 15,717**	**$ 176,433**

(1) Investments – TLR per Tricon balance sheet of $89,225 includes the principal investments above of $104,070 as well as net liabilities and non-controlling interest of $14,845.

Operational highlights include the following:

Tricon Lifestyle Rentals – Canada

TLR Canada’s first project in Toronto, The Selby, continues to progress well through the development phase, with over 97% of trades now under contract. The project is currently tracking ahead of schedule, with the mechanical penthouse-level formwork now underway, brick precast installation completed up to the 33rd floor, and window and balcony door installation completed up to the 28th floor. The project is expected to commence leasing in the second half of 2018, with the building reaching final completion in late 2018. With little inventory available, Toronto’s Bloor East market continues to show strong leasing activity with recent demand driving above average market rental growth in 2017.

At 57 Spadina, design development is substantially completed and on-site demolition commenced in February 2018. The Entertainment District submarket continues to be one of the most sought-after neighbourhoods in Toronto, and rental growth continues to trend strongly upward.

Scrivener Square remains in the design stage, with the formal zoning submission completed in the second quarter of 2017. The development site is owned on a 50/50 basis with Diamond Corp. and is adjacent to The Shops of Summerhill, where TLR holds a 25% interest through a joint venture with RioCan REIT.

TLR Canada continues to explore further development opportunities in Toronto. Rapidly increasing condominium sales prices have driven a strong upward trend in land values; as a result, sourcing attractive sites for Class A purpose-built rental apartments has become more challenging without modifying TLR’s underwriting criteria. With that being said, TLR Canada is currently tracking a pipeline of compelling development opportunities including marketed deals, off-market transactions and rental-only sites.

Tricon Lifestyle Rentals – U.S.

At The McKenzie, adjacent to Dallas’ affluent Highland Park neighbourhood, above-grade construction continued as planned, with nearly 100% of trades now under contract. The pre-leasing centre was substantially completed during the quarter and was opened in the first week of February 2018. Interior finishing of the building commenced during the quarter and construction of the 183-unit rental building is expected to be completed in late 2018. First occupancy is expected in mid-2018 with stabilization projected in mid-2019.

At The Maxwell in Frisco, Texas, construction and site work progressed as planned, with approximately 90% of trades now under contract. Framing, roofing and decking were substantially completed during the quarter and construction of the 325-unit rental building is expected to be completed in late 2018. First occupancy is expected in mid-2018 with stabilization projected in mid-2019. The Frisco rental market remains strong, supported by continued demand from employees relocating to the nearby Legacy West business park where Toyota and JP Morgan continue to move in the first of thousands of employees, and where Liberty Mutual is expected to begin moving in the first of thousands of employees in early 2018.

Additional details pertaining to TLR's development projects are presented below:

	Projected construction		Projected total cost ($000)	Projected rental units	Projected retail/office (sq. feet)	Projected development yield[1]
	Start	End				
The Selby (592 Sherbourne)	Q1 2015	Q4 2018	$ 144,700	502	–	5.25–5.75%
57 Spadina	Q1 2018	Q1 2021	120,100	286	44,800	5.25–5.75%
Scrivener Square	TBD	TBD	TBD	TBD	TBD	TBD
Shops of Summerhill	N/A	N/A	N/A	N/A	30,820	N/A
The McKenzie	Q4 2015	Q3 2018	92,700	183	–	5.50–6.00%
The Maxwell	Q2 2016	Q4 2018	58,600	325	–	6.00–6.50%
Total			**$ 416,100**	**1,296**		

(1) Projected development yield is a forward-looking statement. Refer to page 1, Non-IFRS measures and forward-looking statements.

4.5 Private Funds and Advisory

During 2017, the Private Funds and Advisory business continued to generate contractual fees in its various Investment Vehicles. Details of contractual fees by Investment Vehicle are presented below, including management fees earned from private Investment Vehicles, development fees earned through the TLR investments, and advisory fees earned from Johnson.

For the periods ended December 31	Three months			Twelve months		
(in thousands of U.S. dollars)	2017	2016	Variance	2017	2016	Variance
THP1 US	$ 224	$ 512	$ (288)	$ 969	$ 2,339	$ (1,370)
THP2 US	731	979	(248)	2,902	3,886	(984)
Separate accounts	1,041	900	141	3,984	3,378	606
Side-cars	441	385	56	1,608	1,261	347
U.S. syndicated investments	5	10	(5)	7	22	(15)
Trinity Falls	185	64	121	740	209	531
THP1 Canada	3	4	(1)	13	15	(2)
THP2 Canada	87	82	5	339	435	(96)
Canadian syndicated investments	60	65	(5)	260	255	5
TLR Canada	118	109	9	456	430	26
TLR U.S.	92	63	29	343	213	130
Management fees – private Investment Vehicles	2,987	3,173	(186)	11,621	12,443	(822)
Development fees – TDG	404	385	19	1,586	1,488	98
Development fees – Johnson	3,524	3,931	(407)	10,279	10,587	(308)
Contractual fees	**$ 6,915**	**$ 7,489**	**$ (574)**	**$ 23,486**	**$ 24,518**	**$ (1,032)**

The table below provides a summary of Investment Vehicles in which Tricon manages third-party capital, along with a reconciliation of the investment balances to AUM (KPI measure; refer to Section 8.1). The table also includes projected performance fees that Tricon could earn over time based on current business plans.

	Third-party investments				Projected returns[2]				
(in thousands of U.S. dollars)	Outstanding invested capital (at cost) A	Share of outstanding project debt B	Unfunded equity commitment[1] C	Third-party AUM A + B + C	Gross ROI	Gross IRR	Net ROI	Net IRR	Estimated performance fees to Tricon[2]
THP1 US	$ 21,984	$ –	$ 4,745	$ 26,729	2.2x	14%	1.7x	11%	$ 12,732
THP2 US	183,679	–	42,845	226,524	1.7x	14%	1.6x	11%	7,112
Separate accounts[3]	372,884	–	62,906	435,790	2.2x	15%	2.1x	14%	28,384
Side-cars[4]	165,800	–	46,717	212,517	1.4x	5%	1.4x	5%	–
THP1 Canada	634	–	–	634	2.0x	15%	1.6x	12%	6,890
THP2 Canada	23,133	–	1,124	24,257	1.6x	13%	1.4x	9%	–
THP3 Canada	84,333	–	23,870	108,203	1.8x	12%	1.5x	8%	–
Canadian syndicated investments[5]	19,843	–	5,425	25,268	2.1x	11%	1.9x	10%	1,051
Total – THP	**$ 872,290**	**$ –**	**$ 187,632**	**$ 1,059,922**					**$ 56,169**
TLR Canada[6]	65,482	79,569	33,811	178,862	2.6x	13%	2.5x	12%	17,213
Total	**$ 937,772**	**$ 79,569**	**$ 221,443**	**$ 1,238,784**					**$ 73,382**

(1) Commitments to projects include guarantees made under loan agreements plus reserves. Project commitments can exceed total capitalization as a result of reinvestment rights.

(2) Net ROI and IRR are based on cash flow estimates after all Investment Vehicle expenses (including contractual and performance fees). ROI, IRR and estimated performance fees are based on Tricon's analysis of projected cash flows for incomplete projects in its Investment Vehicles. Projected cash flows are determined based on detailed quarterly and annual budgets and cash flow projections prepared by developers for all incomplete projects. Refer to page 1. Projected returns are updated in the fourth quarter for projects that undergo third-party appraisals.

(3) Separate accounts include Cross Creek Ranch, Grand Central Park, Fulshear Farms, Trilogy at Verde River, Viridian, THP US SP1 and THP US SP2.

(4) Side-cars include Trilogy at Vistancia West, Trilogy Lake Norman and Arantine Hills.

(5) Canadian syndicated investments include Heritage Valley, 5 St. Joseph and Mahogany.

(6) TLR Canada includes The Selby, 57 Spadina, and Scrivener Square/Shops of Summerhill.

Third-party AUM increased by $101.5 million from 2016, primarily as a result of additional advances to separate accounts and side-cars, including an increase in commitment to Arantine Hills of $69.0 million to accommodate changes in the scope and timing of the project's business plan. As discussed in Section 4.1, a number of THP projects underperformed this quarter, which has impacted projected returns for THP2 US and side-car investments, in particular. As a result of these decreases in projected returns, projected performance fees decreased by approximately $26 million from the prior year.

The following table outlines total units and total units sold (since inception of the Investment Vehicles included below) by market and by type.

	Total units[2]					Total units sold				
As of December 31, 2017[1]	Land (acres)	Single-family lots	Homes (units)	Multi-family units	Retail (sq. ft.)	Land (acres)	Single-family lots	Homes (units)	Multi-family units	Retail (sq. ft.)
U.S.	1,097	26,477	6,138	1,556	46,053	309	7,171	3,447	1,260	32,373
Canada	267	3,691	1,045	5,384	195,060	197	2,656	718	5,066	181,860
Total units	**1,364**	**30,168**	**7,183**	**6,940**	**241,113**	**506**	**9,827**	**4,165**	**6,326**	**214,233**
As of December 31, 2016[1]										
U.S.	1,077	24,815	5,897	1,556	41,575	307	4,770	2,880	766	32,373
Canada	285	3,848	761	5,739	219,520	173	2,218	486	5,007	175,020
Total units	**1,362**	**28,663**	**6,658**	**7,295**	**261,095**	**480**	**6,988**	**3,366**	**5,773**	**207,393**

(1) Total units and total units sold shown above include all projects in private Investment Vehicles under the THP investment vertical (THP1 US, THP2 US, THP1 Canada, THP2 Canada, THP3 Canada, Trinity Falls, separate accounts and side-cars).

(2) Total units may change as a result of business plan updates.

The Johnson Companies LP ("Johnson")

The following table provides a summary of Johnson's development advisory fees, as well as unit sales of lots and land parcels to homebuilders which generate fee revenue for Johnson. In addition, the table provides total third-party home sales at Johnson's active communities as an indicator of end-consumer demand, which should ultimately drive homebuilder demand for future lot inventory within Johnson communities. Note that the table below includes sales data for THP-owned projects, as well as those in which Tricon holds no ownership interest but does receive lot development and/or commercial brokerage fees resulting from its majority ownership interest in Johnson.

For the periods ended December 31 (in thousands of U.S. dollars, except for land, lot and home sales)	Three months			Twelve months		
	2017	2016	Variance	2017	2016	Variance
Development fees – Johnson	$ 3,524	$ 3,931	$ (407)	$ 10,279	$ 10,587	$ (308)
Land sales (acres)	77	85	(8)	524	177	347
Lot sales	963	879	84	2,819	2,353	466
Third-party home sales	795	638	157	3,293	2,828	465

Johnson generated 2,819 lot sales during the year compared to 2,353 in 2016, an increase of 20%. Third-party home sales for 2017 within Johnson communities were 3,293 compared to 2,828 home sales during 2016, an increase of 16%. The increase in lot sales was primarily driven by the addition of Trinity Falls and the sales launches of Grand Central Park, Jordan Ranch, Harvest Green and Veranda, which was partially offset by lower sales from communities that are winding down. Johnson ended the year as the only developer in the U.S. to have five communities named in the top 50 for new home sales within a master-planned community as reported by Robert Charles Lesser & Co. and John Burns Real Estate Consulting.

Despite the stronger volume of lot sales, a shift in the sales mix to smaller, less expensive lots has led to a modest decline in development fee revenue compared to 2016. Johnson continues to assess homebuyer trends across each of its communities in an effort to deliver an appropriate product mix. Demand for entry-level homes continues to be strong across Houston, with Johnson focusing a larger share of new lot deliveries on this segment of the market.

5. LIQUIDITY AND CAPITAL RESOURCES

5.1 Financing strategy

The Company seeks to maintain financial strength and flexibility by lowering its cost of debt and equity capital and minimizing interest rate fluctuations over the long term. Some key elements of Tricon's financing strategy are:

- Using various forms of debt such as floating rate bank financing and unsecured debentures with conversion features, and attempting to stagger the maturity of its obligations.
- Using convertible debentures where the principal can be redeemed by the issuance of common shares at the Company's option.
- Redeploying capital as its interests in investments are liquidated to capitalize on further investment opportunities with attractive returns.
- Where appropriate, raising equity through the public markets to finance its growth and strengthen its financial position.

5.2 Liquidity

Tricon generates substantial liquidity through:

- Cash distributions generated from the turnover of assets with shorter investment horizons.
- Syndicating investments to private investors and thereby extracting Tricon's invested capital.
- Stable cash flow received from our income-generating TAH and TLC investment verticals.
- Repatriation of equity extracted through refinancings within TAH.
- Fee income from our Private Funds and Advisory business.

To enable us to react to attractive investment opportunities and deal with contingencies when they arise, we typically maintain sufficient liquidity at the corporate level and within our key investment platforms. Our primary sources of liquidity consist of cash and a corporate credit facility.

Working capital

As at December 31, 2017, Tricon had a net working capital surplus of $10.6 million, reflecting current assets of $28.9 million, offset by payables and accrued liabilities of $18.4 million.

5.3 Capital resources

Debt structure

Management mitigates interest rate risk by maintaining the majority of its debt at fixed rates. The impact of variable interest rate increases or decreases is discussed in the Company's consolidated financial statements (Note 19). Management also mitigates its exposure to fixed-rate interest risk by staggering maturities with the objective of achieving even, annual maturities over a ten-year time horizon to reduce Tricon's exposure to interest rate fluctuations in any one period. The Company's long-term debt structure is summarized in Section 3.2.

The Company provides non-recourse guarantees for certain TAH and TLC indebtedness and provides limited financial guarantees for all construction financing under TLR.

As at December 31, 2017, the Company was in compliance with all of its financial covenants.

Equity issuance and cancellations

The Company's Dividend Reinvestment Plan ("DRIP") provides eligible holders of common shares with the opportunity to reinvest their cash dividends paid on the Company's common shares to purchase additional common shares at a price equal to the average market price (as defined in the DRIP) on the applicable dividend payment date, less an applicable discount of up to 5% determined by the Board from time to time.

On October 4, 2017, the Company announced that the Toronto Stock Exchange had approved its notice of intention to make a normal course issuer bid to repurchase up to 2,700,000 of its common shares during the twelve-month period commencing October 6, 2017 (the "NCIB"). To date, the Company has repurchased 1,414,831 of its common shares for C$15.0 million under the NCIB, of which 982,900 common shares were repurchased in the fourth quarter of 2017 for C$10.4 million. Common shares that are purchased under the NCIB are cancelled by the Company.

As of December 31, 2017, there were 133,472,861 common shares of the Company issued and outstanding.

6. NON-IFRS MEASURES

The Company has included in this MD&A certain supplemental measures of performance, including those described below. We utilize these measures in managing the business and evaluating its performance. Management believes that adjusted EBITDA in particular (and the other non-IFRS measures listed below) is an important indicator of the Company's ability to generate liquidity through operating cash flows to fund future working capital needs, service outstanding debt, and fund future capital expenditures. We believe that providing these performance measures on a supplemental basis is helpful to investors in assessing the overall performance of the Company's business. Refer to the discussion of our use of non-IFRS measures on page 1.

In preparing the adjusted financial information presented in this section, management has eliminated both non-recurring and non-cash items to present a normalized picture of the Company's financial performance. The measures used include:

- Adjusted EBITDA is defined as net income (loss) attributable to shareholders of Tricon before income tax (from both consolidating and investment entities), interest (from both consolidating and investment entities), amortization, stock option expense, transaction costs and non-recurring and non-cash expenses.
- Adjusted net income is defined as net income (loss) attributable to shareholders of Tricon before transaction costs and non-recurring and non-cash expenses.
- Adjusted basic EPS is defined as adjusted net income divided by the weighted average basic common shares outstanding in the period. Adjusted diluted EPS is defined as adjusted net income, plus the interest expense recognized on any dilutive convertible debt (net of the tax impact of that interest), divided by the weighted average diluted common shares outstanding in the period, assuming the conversion of all dilutive convertible debt. See the notes to the table entitled Consolidated statements of income in Section 3.1 for a description of the potential dilutive impact of outstanding convertible debt.

The table below provides a breakdown of Adjusted EBITDA and Adjusted net income.

For the periods ended December 31 (in thousands of U.S. dollars, except per share amounts which are in U.S. dollars)		Three months			Twelve months		
		2017	2016	Variance	2017	2016	Variance
THP Adjusted EBITDA	A	$ 1,393	$ 11,458	$ (10,065)	$ 17,696	$ 30,417	$ (12,721)
TAH Adjusted EBITDA	B	83,475	17,476	65,999	240,235	81,391	158,844
TLC Adjusted EBITDA	C	1,475	1,285	190	9,440	6,232	3,208
TLR Adjusted EBITDA	D	9,070	(643)	9,713	13,529	2,292	11,237
Contractual fees and GP distributions		7,277	7,822	(545)	24,874	25,815	(941)
Performance fees		54	1	53	525	780	(255)
Adjusted non-controlling interest EBITDA	E	(891)	(1,163)	272	(2,505)	(2,717)	212
Adjusted EBITDA before corporate overhead		101,853	36,236	65,617	303,794	144,210	159,584
Adjusted compensation expense	F	(2,811)	(4,741)	1,930	(26,811)	(22,743)	(4,068)
General and administration expense		(2,086)	(1,828)	(258)	(7,274)	(6,643)	(631)
Adjusted EBITDA		**96,956**	**29,667**	**67,289**	**269,709**	**114,824**	**154,885**
Stock option expense		(138)	–	(138)	(1,078)	(766)	(312)
Adjusted interest expense	G	(26,493)	(9,876)	(16,617)	(85,565)	(33,501)	(52,064)
Adjusted amortization expense	H	(747)	(834)	87	(2,966)	(3,389)	423
Adjusted net income before taxes		**69,578**	**18,957**	**50,621**	**180,100**	**77,168**	**102,932**
Adjusted income tax expense	I	(10,092)	(156)	(9,936)	(26,474)	(7,789)	(18,685)
Adjusted net income		**$ 59,486**	**$ 18,801**	**$ 40,685**	**$ 153,626**	**$ 69,379**	**$ 84,247**
Adjusted basic EPS attributable to shareholders of Tricon		**$ 0.44**	**$ 0.17**	**$ 0.27**	**$ 1.21**	**$ 0.62**	**$ 0.59**
Adjusted diluted EPS attributable to shareholders of Tricon		**$ 0.39**	**$ 0.16**	**$ 0.23**	**$ 1.10**	**$ 0.58**	**$ 0.52**
Weighted average shares outstanding – basic		**134,369,333**	**112,840,046**	**21,529,287**	**127,152,721**	**112,490,019**	**14,662,702**
Weighted average shares outstanding – diluted		**161,802,950**	**124,060,472**	**37,742,478**	**148,756,608**	**123,646,532**	**25,110,076**

Refer to Section 7 for detailed reconciliations of the non-IFRS measures marked "A" to "I" in the table above to net income determined under IFRS.

- For the three months ended December 31, 2017, Adjusted EBITDA increased by $67.3 million or 227% to $97.0 million compared to $29.7 million in the same period in the prior year. This increase was mainly attributable to significant growth in TAH Adjusted EBITDA driven by a $42.2 million increase in fair value gain and an $18.8 million increase in NOI from the acquisition of Silver Bay as well as NOI growth achieved in the legacy TAH portfolio. For the year ended December 31, 2017, Adjusted EBITDA increased by $154.9 million or 135% to $269.7 million from $114.8 million in the prior year for the same reasons noted above.
- Adjusted net income, which excludes non-recurring items, increased by $40.7 million or 216% to $59.5 million for the three months ended December 31, 2017 compared to $18.8 million for the same period in the prior year. The increase is attributable to higher Adjusted EBITDA, partially offset by: (i) higher adjusted interest expense as a result of a higher outstanding debt balance at TAH with respect to the Silver Bay acquisition financing and the new 2022 convertible debentures; and (ii) higher adjusted income tax expense which corresponds with higher earnings. Adjusted net income increased by $84.2 million or 121% to $153.6 million for the twelve months ended December 31, 2017 compared to $69.4 million for the prior year for the same reasons noted above.

- Adjusted basic EPS increased by $0.27 or 159% to $0.44 for the three months and by $0.59 or 95% to $1.21 for the twelve months ended December 31, 2017 compared to the same periods in the prior year. Adjusted diluted EPS for the three and twelve months ended December 31, 2017 increased by $0.23 or 144% and $0.52 or 90% compared to $0.16 and $0.58 in the same periods in the prior year, respectively. The increase in Adjusted basic and diluted EPS is attributable to significantly higher Adjusted net income for the reasons noted above, offset by a higher weighted average share count primarily as a result of the common shares issued in May 2017 in satisfaction of outstanding subscription receipts (refer to the Company's Management's Discussion and Analysis for the three and six months ended June 30, 2017, available on SEDAR at www.sedar.com), along with the inclusion of the dilutive impact of all outstanding convertible debentures (2016 – the 2020 convertible debentures were included).

7. RECONCILIATION OF NON-IFRS FINANCIAL MEASURES

The tables below reconcile the adjusted non-IFRS financial measures presented in Section 6 to measures reflected in the Company's consolidated financial statements for the three and twelve months ended December 31, 2017.

For the periods ended December 31	Three months		Twelve months	
(in thousands of U.S. dollars)	2017	2016	2017	2016
Net income	**$ 25,724**	**$ 8,964**	**$ 69,348**	**$ 59,760**
Non-recurring adjustments:				
Transaction costs at investment level	18,501	11,520	63,811	17,492
Transaction costs and formation costs	832	85	3,167	1,829
Non-cash adjustments:				
Control premium adjustment	–	609	–	2,493
Non-controlling interest	(339)	(593)	(96)	(288)
Unrealized foreign exchange loss (gain) at investment level	205	1,109	(2,592)	240
Accrued LTIP expense (recovery)[1]	1,803	1,114	1,211	(712)
Debentures discount amortization	1,175	462	3,949	1,781
Net change in fair value of derivative financial instrument	13,413	(1,032)	23,276	(8,607)
Realized and unrealized foreign exchange loss (gain)	945	(1,596)	1,881	(518)
Tax effect of above adjustments (expense)	(2,773)	(1,841)	(10,329)	(4,091)
Adjusted net income[2]	**$ 59,486**	**$ 18,801**	**$ 153,626**	**$ 69,379**
Add:				
Stock option expense	$ 138	$ –	$ 1,078	$ 766
Adjusted interest expense[2]	26,493	9,876	85,565	33,501
Adjusted amortization expense[2]	747	834	2,966	3,389
Adjusted income tax expense[2]	10,092	156	26,474	7,789
Adjusted EBITDA[2]	**$ 96,956**	**$ 29,667**	**$ 269,709**	**$ 114,824**

(1) Includes the estimate of the potential LTIP expense based on the fair value of assets within the managed private funds as required by IFRS.

(2) Non-IFRS measure; see further details in the following table, which describes reconciliation.

For the periods ended December 31		Three months		Twelve months	
(in thousands of U.S. dollars)		2017	2016	2017	2016
Investment income – THP per financial statements		**$ 1,236**	**$ 10,098**	**$ 18,209**	**$ 27,550**
Control premium adjustment		–	609	–	2,493
Tax expense		109	214	158	293
Unrealized foreign exchange loss (gain)		48	537	(671)	81
THP Adjusted EBITDA[1]	A	**$ 1,393**	**$ 11,458**	**$ 17,696**	**$ 30,417**
Investment income – TAH per financial statements		**$ 45,709**	**$ 3,439**	**$ 113,067**	**$ 50,081**
Interest expense		19,575	6,475	62,282	20,872
Transaction costs, non-recurring and non-cash expenses		18,241	11,523	63,396	17,467
Tax (recovery) expense		(50)	(3,961)	1,490	(7,029)
TAH Adjusted EBITDA[1]	B	**$ 83,475**	**$ 17,476**	**$ 240,235**	**$ 81,391**
Investment income – TLC per financial statements		**$ 1,187**	**$ 1,731**	**$ 7,381**	**$ 5,108**
Interest expense		854	727	3,383	2,545
Transaction costs and non-cash expenses		260	(3)	415	25
Tax recovery		(826)	(1,170)	(1,739)	(1,446)
TLC Adjusted EBITDA[1]	C	**$ 1,475**	**$ 1,285**	**$ 9,440**	**$ 6,232**
Investment income – TLR per financial statements		**$ 5,950**	**$ (1,246)**	**$ 12,391**	**$ 2,066**
Interest expense		32	31	128	67
Translation adjustment		157	572	(1,921)	159
Tax expense		2,931	–	2,931	–
TLR Adjusted EBITDA[1]	D	**$ 9,070**	**$ (643)**	**$ 13,529**	**$ 2,292**
NCI change per financial statements		**$ (339)**	**$ (593)**	**$ (96)**	**$ (288)**
NCI portion of amortization		(552)	(570)	(2,409)	(2,429)
Adjusted non-controlling interest[1]	E	**$ (891)**	**$ (1,163)**	**$ (2,505)**	**$ (2,717)**
Compensation expense per financial statements		**$ (4,752)**	**$ (5,855)**	**$ (29,100)**	**$ (22,797)**
Accrued LTIP expense (recovery)		1,803	1,114	1,211	(712)
Stock option expense		138	–	1,078	766
Adjusted compensation expense[1]	F	**$ (2,811)**	**$ (4,741)**	**$ (26,811)**	**$ (22,743)**
Interest expense per financial statements		**$ (7,207)**	**$ (3,105)**	**$ (23,721)**	**$ (11,798)**
TAH interest expense		(19,575)	(6,475)	(62,282)	(20,872)
TLC interest expense		(854)	(727)	(3,383)	(2,545)
TLR interest expense		(32)	(31)	(128)	(67)
Debentures discount amortization		1,175	462	3,949	1,781
Adjusted interest expense[1]	G	**$ (26,493)**	**$ (9,876)**	**$ (85,565)**	**$ (33,501)**
Amortization expense per financial statements		**$ (1,299)**	**$ (1,404)**	**$ (5,375)**	**$ (5,818)**
NCI portion of Johnson's amortization expense		552	570	2,409	2,429
Adjusted amortization expense[1]	H	**$ (747)**	**$ (834)**	**$ (2,966)**	**$ (3,389)**
Tax expense per financial statements		**$ (5,155)**	**$ (3,232)**	**$ (13,305)**	**$ (11,880)**
THP tax expense		(109)	(214)	(158)	(293)
TAH tax recovery (expense)		50	3,961	(1,490)	7,029
TLC tax recovery		826	1,170	1,739	1,446
TLR tax expense		(2,931)	–	(2,931)	–
Tax expense on non-recurring and non-cash expenses		(2,773)	(1,841)	(10,329)	(4,091)
Adjusted income tax expense[1]	I	**$ (10,092)**	**$ (156)**	**$ (26,474)**	**$ (7,789)**

(1) Items A to I are first presented in the table in Section 6, above, and are non-IFRS measures. Refer to page 1 for a discussion of our use of non-IFRS measures.

8. OPERATIONAL KEY PERFORMANCE INDICATORS

8.1 Key performance indicators

The key performance indicators discussed throughout Section 4, above, for each of the Company's investment verticals are defined as follows:

Tricon Housing Partners

Gross IRR represents an aggregate, annual, compounded, gross internal rate of return after taking into account the effects of investment-level debt financing. IRRs are based in part on Tricon's projected cash flows for incomplete projects in its Investment Vehicles. Such figures are derived through a process where the developers for projects in Tricon's Investment Vehicles prepare for Tricon detailed quarterly and annual budgets and cash flow projections for all incomplete projects, which are based on current market information and local market knowledge and, upon receipt of such information, Tricon reviews the information and makes necessary adjustments based on its experience, including making provisions for necessary contingencies or allowances when appropriate. Management believes IRRs are important measures in assessing the financial performance of its Investment Vehicles. Without such measures, investors may receive an incomplete overview of the financial performance of such Investment Vehicles. Investors are, however, cautioned that these measures are not appropriate for any other purpose.

Tricon American Homes

The Company reflects ongoing performance through investment income for TAH and reports changes in the underlying fair value of the investments through TAH fair value adjustment, which includes the fair value of properties calculated based on Broker Price Opinion and Home Price Index methodologies. However, the Company believes other information or metrics related to the net assets and operating results of TAH are relevant in evaluating the operating performance of the assets underlying its TAH investment.

- Net operating income (NOI) represents total rental revenue, less rental operating expenses and property management fees. NOI excludes overhead expenses such as general and administration expenses, professional fees (such as legal costs), as well as non-core income or expenses such as gains or losses on the disposition of homes.
- Net operating income (NOI) margin represents net operating income as a percentage of total revenue. Management believes NOI and NOI margin are helpful to investors in understanding the core performance of TAH's operations.
- Occupancy rate represents the number of homes in the portfolio that are leased, including those pending move-in with signed lease agreements, as a percentage of total rental homes in the portfolio (total homes owned less homes held for sale).
- Stabilized occupancy represents the number of homes in the portfolio that are leased, including those pending move-in with signed lease agreements, as a percentage of total rental homes, and excludes vacant rental homes that are currently under renovation or within 60 days of completion of renovation.
- Annualized turnover rate during the period represents the number of move-outs divided by average rental homes (total homes owned less homes held for sale) in the period, annualized for a twelve-month period.
- Average monthly rent represents average expected monthly rent on all leased homes.
- Average rent growth during the period represents the average of all the rent growth achieved on lease renewals and new leases. Management believes occupancy and TAH's ability to increase rent directly affect investment income available to Tricon and Tricon's shareholders.
- Funds from operations ("FFO") represents investment income – TAH excluding fair value gains and other non-cash items such as deferred taxes, amortization, gains or losses on dispositions and non-controlling interests. Core funds from operations ("Core FFO") represents FFO less transaction costs and non-recurring items. Management believes these metrics are helpful to investors in understanding TAH's business and comparing its performance to industry peers.

Tricon Lifestyle Communities

The Company reflects ongoing performance through investment income for TLC and reports changes in the underlying fair value of the investments using a discounted cash flow methodology based on expected future cash flows from operations and eventual sale of the properties. However, the Company believes other information or metrics related to the net assets and operating results of TLC is relevant in evaluating the operating performance of the assets underlying its TLC investment as they are the drivers of ongoing investment income and the fair value of the properties in the investment vertical.

- Net operating income is revenue less property taxes, property insurance and other direct expenses such as salaries, repairs and maintenance, utilities, property management fees and park-level overhead expenses.
- Net operating income margin represents net operating income as a percentage of total revenue. Management believes NOI and NOI margin are helpful to investors in understanding the core performance of TLC's operations.
- Occupancy rate represents leased and revenue-generating rental pads divided by total pads. Management believes occupancy in the TLC properties, as well as TLC's ability to increase rent, directly affects investment income available to Tricon and Tricon's shareholders.
- Long-term occupancy rate refers to the number of rental pads that are subject to an annual lease divided by total pads. This metric is therefore intended to normalize seasonal in-place occupancy variations.
- Funds from operations ("FFO") represents investment income – TLC excluding fair value gains and other non-cash items such as deferred taxes, gains or losses on sale of homes and non-controlling interests. Core funds from operations ("Core FFO") represents FFO less transaction costs and non-recurring items. Management believes these metrics are helpful to investors in understanding TLC's business and comparing its performance to industry peers.

8.2 Assets under management

Management believes that monitoring changes in the Company's AUM is key to evaluating trends in revenue. Principal investment AUM and Private Funds and Advisory AUM are the main drivers for investment income and fee income. Growth in AUM is driven by principal investments and capital commitments to our managed Investment Vehicles by private investors.

For reporting purposes, AUM includes balance sheet capital invested in the Company's Principal Investment segment and capital managed on behalf of third-party investors in its Private Funds and Advisory business, and is calculated as follows:

ASSETS UNDER MANAGEMENT	
Principal Investments	
Tricon Housing Partners	• Fair value of invested capital plus unfunded commitment
Tricon American Homes	• Fair value of investment properties and investment properties held for sale before imputed selling costs
Tricon Lifestyle Communities	• Fair value of assets including in-place leases and park assets
Tricon Lifestyle Rentals (formerly Tricon Luxury Residences)	• Fair value of development/investment properties plus unfunded commitment
Private Funds and Advisory	
Commingled funds	• During the investment period, AUM = capital commitment • After the investment period, AUM = outstanding invested capital
Separate accounts/side-cars/ syndicated investments	• THP – Outstanding invested capital and unfunded commitment less return of capital • TLR Canada – Outstanding invested capital and unfunded commitment less return of capital

9. ACCOUNTING ESTIMATES AND POLICIES, CONTROLS AND PROCEDURES, AND RISK ANALYSIS

9.1 Revenue, investments and fair value determination

The following table summarizes the investment income and revenue earned from the Company's investments and activities.

TOTAL REVENUE AND INVESTMENT INCOME	
Revenue	
Contractual fees	• Fees from managing capital invested through private Investment Vehicles within THP and TLR • Development management and advisory fees from The Johnson Companies LP • Management fees for services performed by Tricon Development Group Ltd.
General partner distributions	• Distributions from managing third-party capital within the THP3 Canada commingled fund
Performance fees	• Performance fees from private Investment Vehicles
Investment income	
Investment income – THP	• Realized cash distributions and interest earned from investments and co-investments in land and homebuilding private Investment Vehicles and direct investments into projects • Unrealized gains as a result of changes in the fair value of such investments based on expected cash flows
Investment income – TAH	• Realized rental income net of expenses from leasing single-family rental homes • Unrealized investment income from changes in the fair value of the single-family rental homes
Investment income – TLC	• Realized rental income net of expenses from leasing pads within manufactured housing communities • Unrealized investment income from changes in the fair value of the underlying properties
Investment income – TLR	• Realized rental income net of expenses from leasing rental units within multi-family apartment/development projects • Unrealized investment income from changes in the fair value of the apartment/development projects

The Company manages an investment portfolio of residential real estate assets on behalf of third-party investors in the U.S. and Canada. Our objective in our Private Funds and Advisory business is to earn contractual fees, general partner distributions, performance fees and advisory fees through:

- Contractual fees, general partner distributions and performance fees from asset management of capital invested through private Investment Vehicles, including private commingled funds, separate accounts, side-cars and syndicated investments. Refer to Section 1.1 for a list of active investments.
- Development management and related advisory fees through Tricon's subsidiary, Johnson, a developer of master-planned communities. We view these fees as a means of enhancing returns from certain THP investments.
- Management fees for services performed by Tricon Development Group Ltd. ("TDG") in respect of TLR projects in Canada. We view these fees as a means of enhancing returns from TLR Canada investments.

The Company also earns investment income through distributions and changes in the fair value of its investment verticals.

Tricon Housing Partners ("THP")

Investment income is earned from its share of the changes in the net asset value ("NAV") of each of the Investment Vehicles in which it invests. The NAV of a THP Investment Vehicle is based on the net amount advanced to the respective investment plus net earnings of one or more of the following types:

Investment income – Investment Vehicles make investments through both joint venture equity investments and participating debt investments. With respect to joint venture investments, investment income is comprised of realized cash distributions received from each project and unrealized gains as a result of changes in the fair value of the investment based on expected future net cash flows. Participating debt investments generate investment income comprised of interest earned at the stated rate of fixed interest, as well as unrealized fair value gains in respect of the "participating" or "contingent" portion of the loans, which is also valued based on the fair value of expected future cash flows (in excess of loan principal and accrued interest). Any amount of cash distribution received in excess of loan principal and accrued interest will be recognized as realized interest income.

Project-related fees – In the majority of its investments, an Investment Vehicle earns a combination of commitment/acquisition fees and asset management/loan maintenance fees from the respective project entity (e.g., a project-specific partnership entered into with the local developer). Commitment and acquisition fees are typically calculated on the basis of the Investment Vehicle's capital commitment and are payable upon closing of the investment. Asset management and loan maintenance fees are typically charged on the basis of the outstanding investment in a particular transaction at any given time and are typically paid quarterly over the life of the investment.

The reported fair value of the Company's THP investments is based on its ownership share of the net asset value in each Investment Vehicle in which it invests, and that is typically determined using a discounted cash flow ("DCF") methodology. The DCF analysis involves modelling developers' cash flows to determine the quantum and timing of project funding requirements and cash distributions to the Investment Vehicle. Estimates of developers' cash flows are based on detailed quarterly and annual budgets and are required to determine the Investment Vehicle's eventual returns on its investments and, for participating debt investments, may include contingent interest if the developers' projects generate returns that exceed the underlying contractual interest.

The developer may redeploy project cash flows into subsequent project phases and only distribute excess cash to the Investment Vehicle over the life of the project. In determining the discount rate to be utilized, the risks associated with entitlement, sales and construction are taken into account. Entitlement risk relates to the ability to obtain the entitlements necessary to develop the underlying project as underwritten. Sales risk correlates to the ability to generate the projected underwritten revenues and the time required to do so. Construction risk relates to determining the costs associated with developing the project and, if required, obtaining financing. Upon project entitlement, the discount rate used is the lower of 20% and the expected return for the project. Such discount rate is periodically updated to reflect the market conditions as well as stage of the development project. The initial discount rate is then reduced by 2.5% as each of the following development milestones is achieved: commencement of sales, commencement of construction, and achieving 75% of project sales. Therefore, the discount rate is generally reduced as the various risks are mitigated over time.

The Company's valuation committee evaluates other risk factors impacting each project, including market risks and risks relating specifically to the development partner, and may adjust the discount rate to reflect these additional risks if the valuation committee believes there is uncertainty that the project will generate the expected returns.

Tricon American Homes ("TAH")

Investment income is comprised of realized rental income net of expenses from leasing single-family rental homes and investment income from changes in the fair value of single-family rental homes. The fair value of TAH homes is based on Broker Price Opinion ("BPO") methodology and supplemented by the Home Price Index ("HPI") methodology. TAH typically obtains a BPO for a home once every three years. Once a BPO is obtained, the fair value of the home is adjusted using the HPI on a quarterly basis until it is replaced by a more recent BPO. Refer to Note 5 in the financial statements for specific details of these valuation methodologies.

Tricon Lifestyle Communities ("TLC")

Investment income is comprised of realized rental income net of expenses from leasing pads within manufactured housing communities and investment income from changes in the fair value of the underlying properties in the communities in which it invests. Fair value changes are based on a discounted cash flow methodology applied to the expected net cash flow from each property. Fair value gains are primarily a result of operational improvements and capital expenditures incurred to enhance such communities, which are expected to increase rent levels, occupancy rates, and therefore cash flow over time.

Tricon Lifestyle Rentals (formerly Tricon Luxury Residences) ("TLR")

Investment income is comprised of realized rental income net of expenses from leasing multi-family units and investment income is derived from changes in the fair value of the projects in which it invests. Fair value changes are based on a discounted cash flow methodology. As TLR projects are still in the development phase, and similar to THP, the discount rate is adjusted downwards as development and construction milestones are achieved and the project is de-risked.

9.2 Accounting estimates and policies

Accounting estimates

The Company makes estimates and assumptions concerning the future that may differ from actual results. Refer to the notes to the consolidated financial statements for details on critical accounting estimates.

Accounting standards adopted in the current year

International Accounting Standard ("IAS") 12 was amended to clarify the requirements for recognizing deferred income tax assets on unrealized losses, deferred income taxes where an asset is measured at fair value below the asset's tax base, and certain other aspects of accounting for deferred income tax assets. The amendment was adopted on January 1, 2017, without a significant impact on Tricon's balance sheet and statements of operations.

In January 2016, the IASB issued an amendment to IAS 7, Statement of Cash Flows, introducing an additional disclosure that will enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes (such as foreign exchange gains or losses). The amendment was adopted on January 1, 2017, without a significant impact on Tricon's balance sheet and statements of operations. The Company has provided the related information for the current period in its consolidated financial statements.

Accounting standards and interpretations issued but not yet adopted

In July 2014, the IASB issued the final publication of the IFRS 9 standard, which will supersede IAS 39, Financial Instruments: Recognition and Measurement. IFRS 9 includes revised guidance on the classification and measurement of financial instruments, a new expected credit loss model for calculating impairment on financial assets, and the new hedge accounting guidance.

Under IFRS 9, financial assets will be classified and measured based on the business model in which they are held and the characteristics of their contractual cash flows. The new hedge accounting standard will align hedge accounting more closely with risk management. IFRS 9 does not fundamentally change the types of hedging relationships or the requirement to measure and recognize ineffectiveness; however, it will provide more hedging strategies used for risk management to qualify for hedge accounting and introduce more judgment to assess the effectiveness of a hedging relationship. It also carries forward the guidance on recognition and derecognition of financial instruments from IAS 39. The standard is effective for annual periods beginning on or after January 1, 2018.

The Company intends to adopt IFRS 9 in its consolidated financial statements for the annual period beginning January 1, 2018. The adoption of IFRS 9 is not expected to have a material impact on the Company's consolidated financial statements.

On May 28, 2014, the IASB issued the final revenue standard, IFRS 15, Revenue from Contracts with Customers, which will replace IAS 11 Construction Contracts, IAS 18 Revenue, IFRIC 13 Customer Loyalty Programmes, IFRIC 15 Agreements for the Construction of Real Estate, IFRIC 18 Transfer of Assets from Customers, and SIC 31 Revenue – Barter Transactions Involving Advertising Services.

The new standard contains a single model that applies to contracts with customers and two approaches for recognizing revenue: at a point in time or over time. The model features a contract-based five-step analysis of individual transactions to determine whether, how much and when revenue is recognized. New estimates and judgmental thresholds have been introduced, which may affect the amount and/or timing of revenue recognized. IFRS 15 also provides guidance relating to the treatment of contract acquisition and contract fulfillment costs.

The Company will adopt IFRS 15 in its consolidated financial statements for the annual period beginning January 1, 2018. The Company meets the definition of an investment entity, and therefore, investments in subsidiaries are accounted for at FVTPL, rather than consolidating them. Investment income is out of the scope of IFRS 15, and therefore, we expect that the application of this new standard will have no overall impact on the Company's consolidated financial statements. Immaterial transitional impact concerning accounting for the Company's contractual fees earned through The Johnson Companies LP ("Johnson") has been discussed in its consolidated financial statements.

On January 13, 2016, the IASB issued IFRS 16, Leases, which will replace IAS 17, Leases. IFRS 16 sets out the principles for the recognition, measurement and disclosure of leases. IFRS 16 provides revised guidance on identifying a lease and for separating lease and non-lease components of a contract. IFRS 16 introduces a single accounting model for all lessees and requires a lessee to recognize right-of-use assets and lease liabilities for leases with terms of more than 12 months, unless the underlying asset is of low value. Under IFRS 16, lessor accounting for operating and finance leases will remain substantially unchanged. IFRS 16 is effective for annual periods beginning on or after January 1, 2019, with earlier application permitted for entities that apply IFRS 15.

The Company intends to adopt IFRS 16 in its consolidated financial statements for the annual period beginning January 1, 2018, together with its adoption of IFRS 15. The adoption of IFRS 16 is not expected to have a material impact on the Company's consolidated financial statements as the Company has no significant operating lease arrangements.

In June 2016, the IASB issued an amendment to IFRS 2, Share-Based Payments, addressing (i) certain issues related to the accounting for cash-settled awards, and (ii) the accounting for equity-settled awards that include a "net settlement" feature in respect of employee withholding taxes. This amendment is effective for annual periods beginning on or after January 1, 2019. The Company is currently reviewing the amendment to assess the impact it may have upon adoption.

In November 2016, the IFRS Interpretations Committee issued IFRIC 22, Foreign Currency Transactions and Advance Consideration. The interpretation clarifies that the date of foreign currency transactions for purposes of determining the exchange rate to use on initial recognition of the related asset, expense or income is the date on which an entity initially recognizes the non-monetary asset or liability arising from the payment or receipt of advance consideration. The amendment is effective for annual periods beginning on or after January 1, 2018, with earlier application permitted. The adoption of IFRIC 22 is not expected to have a material impact on the Company's consolidated financial statements as the Company has no significant foreign currency advance transactions with a third party.

There are no other standards, interpretations or amendments to existing standards that are not yet effective that are expected to have a material impact on the Company.

9.3 Controls and procedures

Pursuant to National Instrument 52-109 released by the Canadian Securities Administrators, the Company's CEO and CFO have evaluated the design and operating effectiveness of the Company's disclosure controls and procedures and the Company's internal controls over financial reporting for the period ended December 31, 2017. The CEO and CFO did not identify any material weaknesses in the Company's system of internal controls over financial reporting.

During the year ended December 31, 2017, there were no changes to policies, procedures and processes that comprise the system of internal controls over financial reporting that may have affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. Such controls and procedures are subject to continuous review and changes to such controls and procedures may require management resources and systems in the future.

9.4 Transactions with related parties

Tricon has a ten-year sub-lease commitment on the Company's head office premises with Mandukwe Company Inc., a company owned and controlled by a director of the Company. The annual rental amount is $95,000 (C$119,000) plus common area maintenance costs and realty taxes. The lease expires on November 30, 2019.

Senior management of the Company also own units, directly or indirectly, in the various Tricon private funds, as well as common shares and debentures of the Company.

Refer to the related party transactions and balances note in the consolidated financial statements for further details.

9.5 Dividends

On February 27, 2018, the Board of Directors approved the Company increasing its dividends by 8% to seven cents per share per quarter in Canadian dollars (C$0.28 on an annualized basis). Concurrently, the Board declared a dividend of seven cents per share in Canadian dollars payable on or after April 15, 2018 to shareholders of record on March 31, 2018.

9.6 Compensation incentive plan

The Company's annual compensation incentive plans include an annual incentive plan ("AIP") and a long-term incentive plan ("LTIP").

AIP is calculated based on a percentage of the Company's EBITDA for Bonus Purposes as defined by the AIP with the actual percentage, not to exceed 20%, determined at the Board's discretion annually. For senior management of the Company, 60% of AIP compensation is distributed as cash, and 40% as Deferred Share Units ("DSUs") of the Company with a one-year vesting period.

LTIP expense is generated from two sources: (i) 50% of the Company's share of performance fees or carried interest from private funds and separate accounts, paid in cash when received, and (ii) a percentage equal to the AIP percentage of THP1 US investment income, payable in DSUs which vest over a five-year period.

Complete details concerning the Company's compensation plans and the DSUs are set out in the Company's most recent Management Information Circular dated March 29, 2017 and available on SEDAR at www.sedar.com and on the Company's website at www.triconcapital.com.

9.7 Risk definition and management

There are certain risks inherent in the Company's activities and those of its investees, including the ones described below, which may impact the Company's performance, the value of its investments and the value of its securities. The risks described below are not the only ones facing the Company and holders of its common shares. Additional risks not currently known to us or that we currently consider to be immaterial may also affect our activities and those of our investees.

General risks

The following risks may affect the Company as a whole and may be relevant to the activities of its investees across all of its investment verticals.

General economic conditions

The success of our business is highly dependent upon conditions in the Canadian and United States real estate markets (and in particular the residential sector) and economic conditions throughout North America that are outside our control and difficult to predict. Factors such as interest rates, housing prices, availability of credit, inflation rates, energy prices, economic uncertainty, changes in laws (including laws relating to taxation), trade barriers, currency exchange rates and controls, and national and international political circumstances (including wars, terrorist acts or security operations) could have a material negative impact on the value of our investments and our financial performance.

Unpredictable or unstable market conditions, adverse economic conditions or volatility in the capital markets may result in reduced opportunities to find suitable risk-adjusted investments to deploy capital, may reduce the market value of our assets under management, and may make it more difficult for the Company and its investment vehicles to exit and realize value from existing real estate investments, any of which could materially adversely affect our revenues, the value of our investments, and our ability to raise and deploy new capital and sustain our profitability and growth.

Real estate industry conditions

The residential real estate industry is cyclical and is significantly affected by changes in general and local economic and industry conditions, such as employment levels, availability of financing for homebuyers, interest rates, consumer confidence, levels of new and existing homes for sale, demographic trends and housing demand. In addition, an oversupply of new homes or alternatives to new homes, such as resale homes, including homes held for sale by investors and speculators, foreclosed homes and rental properties may reduce the ability to rent or sell residential properties, depress prices and reduce margins from the rental and sale of residential properties. Conversely, if property prices in target markets increase at a rate faster than rents, this could result in downward pressure on gross rental yields and impact the ability to make acquisitions. Any of these factors could negatively impact the value of the Company's investments and its financial performance.

Builders, developers and renovators are also subject to risks related to the availability and cost of materials and labour, and adverse weather conditions that can cause delays in construction schedules and cost overruns. Furthermore, the market value of undeveloped land, buildable lots and housing inventories can fluctuate significantly as a result of changing economic and real estate market conditions and may result in impairment charges. If there are significant adverse changes in economic or real estate market conditions, residential properties may have to be sold at a loss, rented at less than expected rates, or held longer than planned. These circumstances can result in losses in a poorly performing investment or market. If market conditions deteriorate, some of the Company's investments may be subject to impairments and write-off charges, adversely affecting the Company's financial results.

Portfolio concentration

Although our investments span numerous markets across North America, real estate is a local business, and our revenues are directly and indirectly derived from investments in residential real estate located in our primary geographic markets. A prolonged downturn in the economies of these markets, or the impact that a downturn in the overall national economies of Canada or the United States may have upon these markets, could negatively impact the value of our investments and our financial performance.

Furthermore, because we primarily invest in residential real estate (as compared to a more diversified real estate portfolio), a decrease in demand specifically for residential real estate could adversely affect the value of our investments and our financial performance.

Competition

The real estate investment business is competitive and each segment of our business is subject to competition in varying degrees. We compete on the basis of a number of factors, including, but not limited to, the quality of our employees, transaction execution, innovation and reputation. We compete in pursuit of investor capital to be invested in our securities and investment vehicles and also in acquiring investments in attractive assets. Competition for investor capital, in particular, is intense and investors are increasingly seeking to manage their own assets or reduce their management fees. Further, our competitors may have certain competitive advantages, including greater financial, technical, marketing and other resources, more personnel, less onerous regulatory requirements or a lower cost of capital and access to funding sources, or other resources that are not available to us. These pressures, or an increase in competition, could result in downward pressure on revenues, which could in turn reduce operating margins and thereby reduce operating cash flows and investment returns and negatively affect our overall financial condition.

Furthermore, competition may affect the performance of investments in our investment verticals. Numerous developers, managers and owners of properties compete with the Company's investees in seeking attractive tenants and home purchasers. This competition could have an impact on the performance of the Company's investments. Furthermore, there is significant competition for suitable real property investments, with other investors seeking similar investments to those targeted by the Company and its investees. A number of these investors may have greater financial resources than those of the Company, or operate without the same investment or operating restrictions. An increase in competition for real property investments may increase purchase prices, diminish the number of suitable investments available, and reduce the ability to achieve optimal portfolio size or expected yields, which could impact the Company's investments and financial performance.

The residential homebuilding, renovation and rental industries are themselves highly competitive. Residential homebuilders, renovators and operators compete not only for homebuyers and/or tenants on the basis of price and product offering, but also for desirable properties, building materials, labour and capital. Competitive conditions in the industry could result in: difficulty in acquiring suitable properties at acceptable prices; increased selling or rental incentives; lower sales volumes and prices; higher vacancy; lower profit margins; impairments in the value of inventory and other assets; increased construction costs; and delays in construction. These factors may negatively impact the Company's investments and financial performance.

Investment pipeline

An important component of residential real estate investment performance is the ongoing availability of attractive investment opportunities. If we are not able to find sufficient residential real estate investments in a timely manner, our investment performance could be adversely affected. Furthermore, if we do not have sufficient investment opportunities, we may elect to limit our growth and reduce the rate at which we attract third-party capital, which could impact our assets under management and revenues. Finally, a scarcity of desirable investment opportunities may lead us to make investments with lower expected returns than those we have historically targeted. Any of these factors could negatively impact our financial condition.

Long investment periods

The investment horizons in each of our principal investment verticals is relatively long (refer to Section 1.2, How we invest and create value). These extended timelines increase the risk that circumstances will arise which delay investment realization, and that markets may deteriorate between the time of our initial investment and our exit. This may be the result of many factors that present themselves over the duration of an investment, including local and overall market and economic conditions, increasing competition over time, market value fluctuation and changing interest rates. Delays or market deterioration over time could have an adverse effect on the returns from our investments, our fee revenue, and our financial condition.

Liquidity risk

Residential real estate investments generally cannot be sold quickly, particularly if local market conditions are poor. As a result, the Company and its investees may not be able to enter, exit or modify investments promptly in response to economic or other conditions. This inability to promptly reallocate capital or exit the market in a timely manner could adversely affect the Company's financial results and investment performance. Additionally, financial difficulties of other property owners resulting in distressed sales could depress real estate values in the markets in which we invest. These restrictions could reduce our ability to respond to changes in the performance of our investments and could adversely affect our financial condition and results.

Transaction execution

Before making investments, we conduct extensive due diligence reviews that we deem reasonable and appropriate based on the facts and circumstances applicable to each investment. Our due diligence process includes in-depth reference checks of developers (where applicable), environmental audits, market analysis, site analysis, financial and construction cost analysis and legal review. When conducting due diligence, we may be required to evaluate important and complex business, financial, tax, accounting, environmental and legal issues. Outside consultants, legal advisors, accountants and investment banks may be involved in the due diligence process in varying degrees depending on the type of investment. Nevertheless, when conducting due diligence and making an assessment regarding an investment, we rely on the resources available to us, including information provided by the developer or operating partner (where applicable) and, in some circumstances, third-party investigations. The due diligence investigation that we carry out with respect to any investment opportunity may not reveal or highlight all relevant facts that may be necessary or helpful in evaluating such investment opportunity. Moreover, such an investigation will not necessarily result in the investment being successful. Unknown factors or unforeseen risks may cause investment performance to fall short of expectation and may negatively impact the value of our investments and our financial performance.

Rising interest rates

Rising interest rates, decreased availability of mortgage financing or of certain mortgage programs, higher down payment requirements or increased monthly mortgage costs may increase the cost of capital for the Company and its investees, and may lead to reduced demand for new home sales and resales and mortgage loans, which could have a material adverse effect on the value of our investments, our investment prospects, liquidity and financial performance.

Sustaining growth

Our continuing growth has caused, and if it continues will continue to cause, significant demands on our legal, accounting and operational infrastructure, and increased expenses. In addition, we are required to continuously develop our systems and infrastructure in response to the increasing sophistication of the residential real estate investment industry, the investment management market, and legal, accounting and regulatory developments.

Our future growth will depend, among other things, on our ability to maintain an operating platform and management systems sufficient to address our growth and will require us to incur additional expenses and to commit additional senior management and operational resources. There can be no assurance that we will be able to manage our expanding operations effectively or that we will be able to continue to grow, and any failure to do so could adversely affect our ability to generate revenue and control our expenses.

Insurance

We have various types of insurance, including errors and omissions insurance and general commercial liability insurance. Also, relevant insurance is arranged through our investment verticals in order to protect the value of the underlying investments. The adequacy of insurance coverage is evaluated on an ongoing basis, including the cost relative to the benefits. However, there can be no assurance that potential claims or losses will not exceed the limits, or fall outside the scope, of available insurance coverage or that any claim or claims will be ultimately satisfied by an insurer. A loss or judgment in excess of available insurance or in respect of which insurance is not available could have a material adverse effect on our financial condition and the value of our investments. There can be no assurance that insurance coverage on favourable economic terms will continue to be available in the future.

Environmental risk

Underlying all of our activities is investment in real property that is subject to various Canadian and United States federal, provincial, state and municipal laws relating to environmental matters. These laws could hold developers or property owners liable for the costs of removal and remediation of certain hazardous substances or wastes released or deposited on properties or disposed of at other locations. The failure to remove or remediate such substances, if any, could adversely affect the developer's or owner's ability to sell the properties or to borrow using real estate as collateral, and could potentially result in claims or other proceedings. We are not aware of any material non-compliance with environmental laws in respect of our investments or by the developers in which our investment vehicles invest. We are also not aware of any material pending or threatened investigations or actions by environmental regulatory authorities, or any material pending or threatened claims relating to environmental conditions, in connection with any of the residential real estate in which we or our investment vehicles invest. Environmental laws and regulations can change rapidly and may impose more stringent environmental laws and regulations in the future. Compliance with more stringent environmental laws and regulations could have an adverse effect on a developer or a particular development project or our own investments, which, in turn, could have an adverse effect on our financial condition and investment performance.

Conflicts of interest

Some of the parties in which and with which we currently invest may have competing interests in the markets in which Tricon invests. While the Company takes precautions and negotiates contractual restrictions in definitive legal documentation in order to avoid such conflicts, conflicts of interest may nonetheless arise and may have an adverse effect on the Company's financial performance and the value of our investments.

Certain of the directors and officers of the Company may also serve as directors and/or officers of other companies and consequently the possibility exists for such directors and officers to be in a position of conflict. Any decision made by any such director or officer involving the Company is to be made in accordance with their duties and obligations to deal fairly and in good faith with a view to the best interests of the Company, but there can be no assurance that a conflict of interest will not have an adverse effect on the Company or its financial condition.

Management team

Our executive officers and other senior management have a significant role in our success and oversee the execution of our strategy. Our continued ability to respond promptly to opportunities and challenges as they arise depends on cooperation across our organization and our team-oriented management structure, which benefits greatly from management continuity. Our ability to retain our management group or attract suitable replacements, should any members of the management group leave, is dependent on, among other things, the competitive nature of the employment market and the career opportunities that we can offer. Ensuring that we continue to pay market compensation in order to retain key professionals may lead to increasing costs. We have experienced departures of key professionals in the past and may do so in the future, and we cannot predict the impact that any such departures will have on our ability to achieve our objectives. Competition for the best people is intense and the loss of services from key members of the management group or a limitation in their availability could adversely impact our financial performance. Furthermore, such a loss could be negatively perceived in the capital markets.

Government regulation

The Company's activities and those of its investees are subject to numerous regulations across various jurisdictions in North America. Changes in legislation and regulation could result in increased costs and increased risk of non-compliance, which could adversely affect the Company's financial condition and the value of its investments. For example, the City of Toronto is currently conducting a review of its development charges bylaw. Any resulting increase in the fees collected from developers could adversely impact TLR's returns from its investments in Toronto.

Certain jurisdictions have enacted residential tenancy legislation which imposes, among other things, rent control guidelines that limit the ability to raise rental rates at residential properties. In addition to limiting the ability to raise rental rates, residential tenancy legislation in some jurisdictions prescribes certain limitations on terminations of residential tenancies. While the Company's overall exposure to such jurisdictions is expected to be minimal, any limits on TAH's or TLC's (and, as its portfolio stabilizes, TLR's) ability to raise rental rates at their properties, or to terminate defaulting tenancies, may adversely affect their financial performance. The Province of Ontario enacted new rent control guidelines in 2017 that will affect TLR's ability to raise rental rates on its properties, once stabilized.

Acquisitions and development projects undertaken by the Company's investees may require zoning and other approvals from local government agencies. The process of obtaining such approvals may take months or years, and there can be no assurance that the necessary approvals for any particular project will be obtained. Holding costs accrue while regulatory approvals are being sought, and delays could negatively impact investment performance.

Construction industry risks

The success of our investments and the successful performance of our investment vehicles is very often dependent on stability in the construction industry. This industry has from time to time experienced significant difficulties in the supply of materials and services, including with respect to: shortages of qualified trades people; labour disputes; shortages of building materials; unforeseen environmental and engineering problems; and increases in the cost of certain materials. When any of these difficulties occur, it may cause delays and increase anticipated costs, which could adversely affect the Company's investment performance and financial condition.

Taxation risks

We endeavour to structure our investments and activities to be efficient under the prevailing U.S. and Canadian tax frameworks. Changes in tax legislation or policy could adversely affect the after-tax return we earn on our investments and activities, capital available for investment (including from our institutional investors), and the willingness of investors to acquire our securities or invest in our investment vehicles. A number of other factors may increase our effective tax rates, which would have a negative impact on the Company's net income. These include, but are not limited to, changes in the valuation of our deferred tax assets and liabilities, and any reassessment of taxes by a taxation authority.

Furthermore, tax changes (such as rising property tax rates) could impact the efficiency of the activities of our investees (for example, the tax efficiency of TAH's operations) and could also impact the overall economic conditions relevant to the success of those activities. For example, in the United States, the significant expenses of owning a home, including mortgage interest and state and property tax, are generally deductible for tax purposes (subject to various limitations). Recent changes under the Tax Cuts and Jobs Act ("TCJA") to modify these benefits may increase the after-tax cost of owning a new home, which could adversely impact housing demand and/or sales prices. The impact of these and other tax changes on the activities of our investees could negatively impact the value of our investments and our financial performance.

Recent corporate tax rate reductions in the United States under the TCJA combined with the interest deductibility exemption for real estate investments do not appear to have a negative impact on the Company's effective tax rate or net income. However, detailed tax regulations that usually accompany any new tax legislation (such as the TCJA) have not been released and upon release may contain interpretive changes that could have an adverse impact on the Company's existing tax framework. It is prudent for prospective investors to consult with their own tax advisor.

Divestitures

While the Company expects to divest certain of its non-core assets and business (including the TLC investment vertical, and the U.S. business of the TLR investment vertical), there is no assurance that these divestitures will be completed on terms favourable to the Company, or at all. Accordingly, any opportunities for debt reduction resulting from these divestitures, the anticipated effects of these divestitures on the Company's leverage position, or any other anticipated benefits of the divestitures including redeployment of divestiture proceeds, may never be realized, or may not be realized to the extent the Company currently anticipates.

Risks related to Principal Investments

In addition to the general risks described above, the following risks are inherent in our Principal Investments. Many of these risks relate specifically to the activities of our investees and could have an impact on the value of the Company's investments and our financial condition.

Risks related to Tricon Housing Partners

Operational and credit risks

On a strategic and selective basis, our private investment vehicles provide financing to develop properties. The residential real estate development business involves significant risks that could adversely affect THP performance, including: the developer may not be able to complete construction on schedule or within budget, resulting in increased debt service expense and construction costs and delays in selling the properties; the developer may not be able to obtain, or may experience delays in obtaining, all necessary zoning, land-use, building, occupancy and other governmental permits and authorizations for the properties; the developer may not be able to sell properties on favourable terms or at all; construction costs, total investment amounts and THP's share of remaining funding may exceed our estimates; and projects may not be completed and delivered as planned.

THP investments are made through the financing of local developers, including Johnson, and, consequently, we rely to a great extent on those developers to successfully manage their development projects. Furthermore, given the Company's majority interest in Johnson, we rely on Johnson's ability to execute on portions of our investment strategy in THP. Investments in partnerships, joint ventures or other entities may involve risks not present were a third party not involved, including the possibility that the development partners might become bankrupt or otherwise fail to fund their share of required capital contributions. Additionally, the development partners might at any time have economic or other business interests or goals which are inconsistent with our business interests or goals. In addition, we do not have sole control of certain important decisions relating to these development properties, including decisions relating to: the sale of the development properties; refinancing; timing and amount of distributions of cash from such development properties; and capital improvements. Any of these factors could negatively impact the value of our investments and financial condition.

The above risks are also relevant to TLR.

Risks related to Tricon American Homes and Tricon Lifestyle Communities

Many of the risks noted below will also be relevant to TLR as its portfolio stabilizes.

Lease renewal and turnover risk

If a tenant decides to vacate a rental property, whether as a result of deciding not to renew their lease or by vacating prior to the expiry of the lease, TAH or TLC may not be able to re-let that property in a short amount of time or at all. Additionally, even if they are successful in renewing a lease or re-letting a property, the terms of the renewal or re-letting may be less favourable than the original terms.

The ability to rent residential properties is affected by many factors, including changes in general economic conditions (such as the availability and cost of mortgage funds, vacancy rates, the availability of suitable potential tenants and the job market for prospective tenants), local conditions (such as an oversupply of space or a reduction in demand for real estate in the area), government regulations, changing demographics or social preferences, competition from other available properties, and various other factors.

If TAH or TLC are unable to promptly renew leases or re-let properties, or if the rental rates upon renewal or re-letting are significantly lower than expected rates, their financial performance may be negatively impacted, which may adversely affect the value of the Company's investments and financial performance.

Furthermore, if a significant number of tenants are unable to meet their obligations under their leases or if a significant number of properties becomes vacant and cannot be re-leased on economically favourable terms, the TAH and TLC properties may not generate revenues sufficient to meet operating expenses, including debt service and capital expenditures.

Resident Default

The success of the Company's rental income-producing verticals depends in large part upon the ability to attract and retain qualified residents. This will depend, in turn, upon the ability to screen applicants, identify qualified residents, and avoid residents who may default. The Company's investees rely on information supplied by prospective residents in their rental applications to make leasing decisions, and this information may not be accurate. Investees may not successfully screen applicants, and as a result, may rent to residents who default on leases or fail to comply with the terms of the lease or applicable homeowners' association regulations, which may negatively affect financial performance, reputation, and the quality and value of our properties.

In the event of a resident default or bankruptcy, our investees may experience delays in enforcing their rights as landlord and obtaining possession of the premises and incur legal, maintenance, and other costs in protecting their investment. In addition, they will incur turnover costs associated with re-leasing the properties such as marketing and brokerage commissions, will not collect revenue while the property sits vacant, and may be unable to re-lease the property at the rental rate previously received.

Reliance on Vendors

Our investees rely on local vendors and service providers, including house renovation professionals, maintenance providers, leasing agents, and property management companies in situations where it is cost-effective to do so or if their internal staff is unable to perform these functions. They generally do not have exclusive or long-term contractual relationships with any of these providers, and can provide no assurance that they will have uninterrupted or unlimited access to their services. Furthermore, selecting, managing and supervising these service providers requires significant management resources and expertise. Poor performance by service providers, especially those who interact with residents in its properties, will reflect poorly on the Company and its investees and could significantly damage their reputation among desirable residents. Moreover, notwithstanding efforts to implement and enforce strong policies and practices regarding service providers, we may not successfully detect and prevent fraud, incompetence or theft by service providers, which could expose us to liability or responsibility for associated damages, fines or penalties. In addition, any delay in identifying a service provider or removal or termination of existing service providers would require our investees to seek new vendors or providers, which could create delays and adversely affect their operating results.

Substitutions for rental properties

Demand for rental properties is impacted by and inversely related to the relative cost of home ownership. The cost of home ownership depends upon, among other things, interest rates offered by financial institutions on mortgages and similar home financing transactions. If the interest rates offered by financial institutions for home ownership financing remain low or fail to rise, demand for TAH or TLC properties may be adversely affected.

An economic downturn may also impact job markets and the ability of tenants to afford the rents associated with certain rental properties, which may result in increased demand for lower-cost rental options. Such a reduction in demand may have an adverse effect on TAH's revenues.

Tenant Relief Laws

As the landlord of numerous properties, TAH and TLC are involved from time to time in evicting residents who are not paying their rent or who are otherwise in material violation of the terms of their lease. Eviction activities impose legal and managerial expenses that increase costs and expose us to potential negative publicity. The eviction process is typically subject to legal barriers, mandatory "cure" policies, internal policies and procedures and other sources of expense and delay, each of which may delay our ability to gain possession and stabilize the property. Additionally, state and local landlord-tenant laws may impose legal duties to assist residents in relocating to new housing, or restrict the landlord's ability to remove the resident on a timely basis or to recover certain costs or charge residents for damage residents cause to the landlord's premises. Because such laws vary by state and locality, TAH and TLC must be familiar with and take all appropriate steps to comply with all applicable landlord-tenant laws, and need to incur supervisory and legal expenses to ensure such compliance. To the extent that our investees do not comply with state or local laws, they may be subjected to civil litigation filed by individuals, in class actions or actions by state or local law enforcement and their and the Company's reputation and financial results may suffer. TAH and TLC may be required to pay their adversaries' litigation fees and expenses if judgment is entered against them in such litigation or if they settle such litigation.

Title risk

TAH's acquisition of homes is often completed through a title company with an owner's title insurance policy being obtained. However, U.S. distressed single-family homes are often acquired through trustee auctions. Although TAH conducts due diligence and employs a title company to review title on target housing assets prior to purchasing such homes, title on the homes purchased through foreclosure sales and auctions is occasionally only assumed weeks after the purchase. Furthermore, an owner's title insurance policy is not available to protect against the inherent title risk arising through the foreclosure auction process. In the event that TAH fails to independently and properly assess a title risk or fails to assume one or more homes because of such failed analysis, it may not achieve its expected returns or yields relating to such investment.

Homeowners' Association Issues

A number of the properties in TAH's portfolio are located within homeowner's associations ("HOAs"), which are private entities that regulate the activities of and levy assessments on properties in a residential subdivision. HOAs in which TAH owns properties may have or enact onerous or arbitrary rules that restrict its ability to renovate, market or lease its properties or require it to renovate or maintain such properties at standards or costs that are in excess of its planned operating budgets. Such rules may include requirements for landscaping, limitations on signage promoting a property for lease or sale, or the use of specific construction materials used in renovations. Some HOAs also impose limits on the number of property owners who may rent their homes, which if met or exceeded, would cause TAH to incur additional costs to resell properties within the HOA and may also result in opportunity costs of lost rental income. Many HOAs impose restrictions on the conduct of occupants of homes and the use of common areas, and TAH may have residents who violate HOA rules and for which it may be liable as the property owner. The boards of directors of the HOAs in which TAH owns properties may not make important disclosures about the properties or may block its access to HOA records, initiate litigation, restrict its ability to sell its properties, impose assessments, or arbitrarily change the HOA rules. TAH may be unaware of or unable to review or comply with HOA rules before purchasing a property and any such excessively restrictive or arbitrary regulations may cause it to sell such property at a loss, prevent it from renting such property, or otherwise reduce its cash flow from such property, which would have an adverse effect on TAH's returns from the property.

Government subsidies

Some of TAH's rental income is derived from government-subsidized rental support programs, such as the Section 8 program operated by the U.S. Department of Housing and Urban Development. A reduction or elimination of government funding of such programs could result in higher rental turnover and downward pressure on rental rates, which could negatively impact TAH's financial performance.

MHC tenant financing

Tenants of manufactured housing communities typically own the manufactured home affixed to the pad that they lease from the MHC owner. The lack of chattel financing for tenants to acquire manufactured homes, or the terms of such chattel financing offered by lending entities, may negatively impact tenants' and prospective tenants' ability to own manufactured homes and may therefore have a negative impact on demand for pads in TLC's portfolio, which could in turn have an adverse effect on TLC's financial performance.

Reliance on Cobblestone

TLC investments involve the acquisition of properties through its joint venture with Cobblestone, which is an operating partner that has expertise in TLC's target markets. The Company's investments in Tricon Lifestyle Communities therefore involve risks, including, but not limited to, the possibility that Cobblestone may have business or economic goals which are inconsistent with those of TLC, that Cobblestone may be in a position to take action or withhold consent contrary to TLC's instructions or requests, and that TLC may be responsible to Cobblestone for indemnifiable losses. In some instances, Cobblestone may have competing interests in TLC's target markets that could create conflicts of interest. Further, Cobblestone may experience financial distress, including bankruptcy or insolvency, and TLC's performance could be adversely affected to the extent Cobblestone cannot meet its obligations.

Defaults or poor performance by Cobblestone could also result in disruptions to operations and other negative impacts on the value of TLC's portfolio that may adversely affect the Company's financial results in connection with Tricon Lifestyle Communities.

Risks related to Tricon Lifestyle Rentals

Guarantees of project debt

The Company may agree to provide financial assistance to the TLR project entities in which it invests. Such financial assistance may include the provision of payment guarantees to a project entity's lenders of acquisition financing, construction debt or long-term financing, and the provision of construction completion guarantees. Such guarantees may be joint or several with other partners in a particular investment. The Company's and its partners' guarantees of project-level obligations may not be in proportion to their respective investments in the project entity. The provision of such guarantees may reduce the Company's capacity to borrow funds under its separate credit facilities, which may impact its ability to finance its operations. If such guarantees are called upon for payment or performance, they may have a negative impact on the Company's cash position and financial performance. If the Company provides a joint guarantee with an investment partner, a default by the partner in its payment or performance obligation under the guarantee could cause the Company to pay a disproportionate amount in satisfaction of the guarantee, which may have a negative impact on the Company's cash position and financial performance.

Risks relating to Private Funds and Advisory

In addition to the general risks described above, the following risks are inherent in our Private Funds and Advisory business.

Formation of future investment vehicles

The ability to raise capital for any future investment vehicles remains subject to various conditions which Tricon cannot control, including the negotiation and execution of definitive legal documentation and commitments made by third-party investors. There can be no assurance that any capital will be raised through future investment vehicles or that any future warehoused investments of the Company will be acquired by any other future vehicles. A failure to raise sufficient capital through other investment vehicles could result in lower assets under management and impair our future revenues and growth.

Structure of future investment vehicles

There can be no assurance that the manner in which contractual fees, general partner distributions, performance fees, and/or investment income are calculated in respect of future investment vehicles will be the same as the active Investment Vehicles, including with respect to the treatment of the Company's principal investments in such vehicles through Tricon Housing Partners. Any such changes could result in the Company earning less contractual fees, general partner distributions and/or performance fees from the same assets under management as compared to the active Investment Vehicles and could expose the Company's principal investment in such future investment vehicles to increased risk, including, but not limited to, the risk of reduced investment income (at comparable investment performance levels) and the increased risk of loss of capital of the Company.

Ongoing investment performance

We believe that our ongoing investment performance is one of the most important factors for the success and growth of Private Funds and Advisory activities. Poor investment performance could impair our ability to raise future private capital, which could result in lower assets under management and could impact our ability to earn contractual fees. In addition, our ability to earn performance fees is directly related to our investment performance and therefore poor investment performance may cause us to earn less or no performance fees.

Investment vehicle governance

The limited partnership agreements for certain active Investment Vehicles provide that the general partner or manager of the Investment Vehicle may be removed by the limited partners in certain prescribed circumstances, including in some cases (and with the approval of a prescribed number of limited partners), without cause. These agreements may not provide for termination payments to the general partner or manager in the event of removal without cause. The removal of the general partner or the manager of an Investment Vehicle prior to the termination of such Investment Vehicle could materially adversely affect the reputation of Tricon, lower assets under management and, as a result, reduce our contractual fees and performance fees.

Capital commitment

The third-party investors in Tricon's investment vehicles comprise a relatively small group of reputable, primarily institutional, investors. To date, each of these investors has met its commitments on called capital and we have received no indications that any investor will be unable to meet its capital commitments in the future. While our experience with our investors suggests that commitments will be honoured, and notwithstanding the adverse consequences to a defaulting investor under the terms of the applicable investment vehicle, no assurances can be given that an investor will meet its entire commitment over the life of an investment vehicle. A failure by one or more investors to satisfy a drawdown request could impair an investment vehicle's ability to fully finance its investment, which could have a material adverse effect on the performance and value of that investment, which in turn could negatively impact the Company's financial condition.

Risks related to a public company and common shares

Stock exchange prices

The market price of our common shares could fluctuate significantly as a result of many factors, including the following:

- economic and stock market conditions generally and specifically as they may impact participants in the real estate industry;
- our earnings and results of operations and other developments affecting our business;
- changes in financial estimates and recommendations by securities analysts following our common shares;
- earnings and other announcements by, and changes in market evaluations of, participants in the real estate industry;
- changes in business or regulatory conditions affecting participants in the real estate industry;
- the addition or departure of the Company's executive officers and other key personnel;
- sales or perceived sales of additional common shares; and
- trading volume of the common shares.

In addition, the financial markets may experience significant price and volume fluctuations that affect the market prices of equity securities of companies and that are unrelated to the operating performance, underlying asset value or prospects of such companies. Accordingly, the market price of our common shares may decline even if our operating results or prospects have not changed. The value of the common shares is also subject to market fluctuations based upon factors which influence the Company's operations, such as legislative or regulatory developments, competition, technological change and global capital market activity. As well, certain institutional investors may base their investment decisions on consideration of the Company's environmental, governance and social practices and performance against such institutions' respective investment guidelines and criteria, and failure to meet such criteria may result in limited or no investment in the common shares by those institutions, which could adversely affect the trading price of the common shares.

Additional capital

The Company's ability to carry on its business generally, and in particular to take advantage of investment opportunities, may require it to raise additional capital. Additional capital may be sought through public or private debt or equity financings by Tricon or another Tricon entity and may result in dilution to or otherwise may have a negative effect on existing Tricon shareholders. Further, there can be no assurances that additional financing will be available to Tricon when required or desired by Tricon, on advantageous terms or at all, which may adversely affect Tricon's ability to carry on its business.

Additional indebtedness

The degree to which the Company is leveraged could have important consequences to the Company, including: (i) the Company's future ability to obtain additional financing for working capital, capital expenditures or other purposes may be limited; (ii) the Company may be unable to refinance indebtedness on terms acceptable to the Company or at all; (iii) a significant portion of the Company's cash flow (on a consolidated basis) could be dedicated to the payment of the principal of and interest on its indebtedness, thereby reducing funds available for future operations, capital expenditures and/or dividends on its common shares; and (iv) the Company may be more vulnerable to economic downturns and be limited in its ability to withstand competitive pressures.

Dividends

Holders of common shares do not have a right to dividends on such shares unless declared by the Board of Directors. Although the Board has established a dividend policy authorizing the declaration and payment of dividends to holders of common shares on a quarterly basis, the declaration of dividends is at the discretion of the Board of Directors even if the Company has sufficient funds, net of its liabilities, to pay such dividends.

The Company may not declare or pay a dividend if there are reasonable grounds to believe that (i) the Company is, or would after the payment be, unable to pay its liabilities as they become due, or (ii) the realizable value of the Company's assets would thereby be less than the aggregate quantum of its liabilities. Liabilities of the Company will include those arising in the ordinary course of business and indebtedness.

Future sales and dilution

The Company's articles permit the issuance of an unlimited number of common shares, and shareholders have no pre-emptive rights in connection with such further issuances. The Board has the discretion to determine the price and the terms of issue of further issuances of common shares and securities convertible into common shares. Any future issuances of common shares could be dilutive to shareholder interests at the time of issuance.

Holding company

Tricon Capital Group Inc. is a holding company and a substantial portion of its assets are the equity interests in its subsidiaries. As a result, investors are subject to the risks attributable to its subsidiaries. As a holding company, the Company conducts substantially all of its business and makes its investments through its subsidiaries, which generate substantially all of its revenues. Consequently, the Company's performance and growth are dependent on the earnings of its subsidiaries and the distribution of those earnings to the Company. The ability of these entities to pay distributions will depend on their operating results and may be subject to applicable laws and regulations and to contractual restrictions contained in the instruments governing their debt. In the event of a bankruptcy, liquidation or reorganization of any of the Company's subsidiaries, holders of indebtedness and trade creditors will generally be entitled to payment of their claims from the assets of those subsidiaries before any assets are made available for distribution to the Company.

Financial reporting and other public company requirements

The Company is subject to reporting and other obligations under applicable Canadian securities laws and Toronto Stock Exchange rules, including National Instrument 52-109 – Certification of Disclosure in Issuers' Annual and Interim Filings. These reporting and other obligations place significant demands on Tricon's management, administrative, operational and accounting resources. Moreover, any failure to maintain effective internal controls could cause the Company to fail to meet its reporting obligations or result in material misstatements in its consolidated financial statements. If the Company cannot provide reliable financial reports or prevent fraud, its reputation and operating results could be materially harmed, which could also cause investors to lose confidence in the Company's reported financial information, and could result in a lower trading price of its common shares.

Management does not expect that Tricon's disclosure controls and procedures and internal controls over financial reporting will prevent all errors and all fraud. A control system, no matter how well designed and implemented, can provide only reasonable, not absolute, assurance that its objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Due to the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues within a company are detected. The inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple errors or mistakes. Controls can also be circumvented by individual acts of some persons, by collusion of two or more people or by management override of the controls. Due to the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected in a timely manner or at all.

10. HISTORICAL FINANCIAL INFORMATION

The following table shows selected IFRS measures for the past eight quarters and three years.

For the three months ended (in thousands of U.S. dollars, except per share amounts which are in U.S. dollars)	December 31, 2017	September 30, 2017	June 30, 2017	March 31, 2017

Consolidated Financial Statements

for the Year Ended December 31, 2017

February 27, 2018

Independent Auditor's Report

To the Shareholders of
Tricon Capital Group Inc.

We have audited the accompanying consolidated financial statements of Tricon Capital Group Inc. and its subsidiaries, which comprise the consolidated balance sheets as at December 31, 2017 and December 31, 2016 and the consolidated statements of comprehensive income, changes in equity and cash flows for the years ended December 31, 2017 and December 31, 2016 and the related notes, which comprise a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements
Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility
Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Cash paid on			
Income taxes		**$ 4,370**	**$ 10,849**
Interest		**$ 13,664**	**$ 8,041**

The accompanying notes are an integral part of these consolidated financial statements.

1. NATURE OF BUSINESS

Tricon Capital Group Inc. ("Tricon" or the "Company") is a principal investor and asset manager focused on the residential real estate industry in North America. In the principal investment portfolios, the Company primarily invests through Tricon Housing Partners, Tricon American Homes, Tricon Lifestyle Communities and Tricon Lifestyle Rentals (formerly Tricon Luxury Residences). In Private Funds and Advisory, the Company manages, on behalf of private investors, commingled funds, side-cars and separate investment accounts that invest in the development of real estate in North America and generate contractual fee income for the Company.

Tricon was incorporated on June 16, 1997 under the Business Corporations Act (Ontario) and its head office is located at 1067 Yonge Street, Toronto, Ontario, M4W 2L2. The Company is domiciled in Canada. Tricon became a public company on May 20, 2010, and its common shares are listed on the Toronto Stock Exchange (TSX) (symbol: TCN).

These consolidated financial statements were approved for issue on February 27, 2018 by the Board of Directors of Tricon.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of the significant accounting policies applied in the preparation of these consolidated financial statements.

Basis of preparation and measurement

The consolidated financial statements are prepared on a going-concern basis and have been presented in U.S. dollars, which is also the Company's functional currency. All financial information is presented in thousands of U.S. dollars except where otherwise indicated.

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as set out in the CPA Canada Handbook – Accounting. The preparation of consolidated financial statements in accordance with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise judgment in applying Tricon's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions are significant to the consolidated financial statements, are disclosed in Note 3.

These consolidated financial statements have been prepared under the historical cost convention, except for (i) investments in Tricon Housing Partners, Tricon American Homes, Tricon Lifestyle Communities and Tricon Lifestyle Rentals; and (ii) derivative financial instruments, which are recorded at fair value through profit or loss ("FVTPL").

The Company presents its consolidated balance sheet with its assets and liabilities in decreasing order of liquidity. The notes to the consolidated financial statements provide information on the Company's current assets and current liabilities (Note 19). The Company believes this presentation is more relevant given the nature of the Company's operations, which do not have specifically identifiable operating cycles.

Foreign currency translation

Currency translation

Foreign currency transactions (Canadian dollar) are translated into U.S. dollars using exchange rates in effect at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into U.S. dollars using the exchange rate in effect at the measurement date. Non-monetary assets and liabilities denominated in foreign currencies are translated into U.S. dollars using the historical exchange rate or the exchange rate in effect at the measurement date for items recognized at FVTPL. Gains and losses arising from foreign exchange are included in the statement of comprehensive income.

Subsidiaries

For subsidiaries that are required to be consolidated, the results and financial position of those subsidiaries with a functional currency different from the presentation currency are translated into the presentation currency as follows:

i) assets and liabilities are translated at the closing rate at the date of the balance sheet;

ii) income and expenses are translated at average exchange rates. The Company uses monthly average exchange rates due to the volume of transactions each month; and

iii) all resulting exchange differences are recognized in other comprehensive income.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognized in other comprehensive income.

On disposal of a foreign operation (that is, a disposal of the Company's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation), all exchange differences accumulated in equity in respect of that operation attributable to the equity holders of the Company are reclassified from other comprehensive income to net income.

The consolidated subsidiaries and their respective functional currencies are as follows:

Name	Functional currency
Tricon Holdings Canada Inc.	U.S. dollar
Tricon Housing Partners US II (Canada) GP Ltd.	Canadian dollar
Tricon Capital GP Inc.	Canadian dollar
Tricon Housing Partners US Co-Investment Inc.	U.S. dollar
Tricon Housing Partners US II A Incentive LP	U.S. dollar
Tricon Housing Partners US II B/C Incentive LP	U.S. dollar
Tricon Holdings USA LLC	U.S. dollar
Tricon USA Inc.	U.S. dollar
Tricon JDC LLC	U.S. dollar
Tricon Development Group Ltd.	Canadian dollar
Tricon Luxury Residences PM Inc.	Canadian dollar
Tricon US TopCo LLC	U.S. dollar
Tricon US FTA LLC	U.S. dollar
CCR Texas Agent Inc.	U.S. dollar
Tricon Head Office Inc	Canadian dollar

Consolidation

Subsidiaries are all entities (including structured entities) over which the Company has control. The Company controls an entity when the Company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

The Company meets the definition of an investment entity and as such, investments in subsidiaries (other than those that provide investment-related services) are accounted for at FVTPL, rather than by consolidating them. All of the subsidiaries that provide investment-related services, including the Company's Canadian and U.S. asset management operating entities that earn contractual fees and performance fees from private funds, continue to be consolidated.

The Company applies the acquisition method to account for business combinations. The consideration for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Company. The consideration includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities assumed in a business combination are measured initially at their fair values at the acquisition date.

The Company recognizes any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognized amounts of the acquiree's identifiable net assets. The amounts attributable to non-controlling interests are presented separately in the statement of comprehensive income below net income, and are included in the equity section of the balance sheet.

Acquisition-related costs are expensed as incurred.

Inter-company transactions, balances and unrealized gains or losses on transactions between the companies are eliminated. Amounts reported by subsidiaries have been adjusted to conform with the Company's accounting policies.

Investments in associates

Associates are all entities over which the Company has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Associates that are held as part of the Company's investment portfolio are carried on the balance sheet at fair value even though the Company may have significant influence over those companies. This treatment is permitted by IAS 28, Investment in Associates, which allows investments that are held by the Company to be recognized and measured at FVTPL and accounted for in accordance with IAS 39 and IFRS 13, with changes in fair value recognized in the statement of comprehensive income.

Fixed assets

Building, furniture, office equipment, computer equipment and leasehold improvements are accounted for at cost less accumulated depreciation. On November 22, 2017, the Company acquired a commercial condominium, which will serve as the Company's new head office in Toronto and has an estimated useful life of 30 years (Note 12). Depreciation expense is recorded on a straight-line basis over the estimated useful lives of the fixed assets, as follows:

Building	30 years
Furniture and office equipment	2–3 years
Computer equipment	2–5 years
Leasehold improvements	5 years

Estimated useful lives of fixed assets are reviewed and adjusted, if appropriate, at each financial year-end. As described below in Impairment of non-financial assets, fixed assets are also reviewed at each balance sheet date to determine whether there is an indication of impairment.

Placement fees and rights to performance fees intangible assets

Placement fees represent costs incurred to secure investment management contracts. Performance fee rights represent costs incurred to obtain rights to receive future performance fees from certain funds. These are accounted for as intangible assets carried at cost less accumulated amortization. Amortization is recorded using the straight-line method and is based on the estimated useful lives of the associated funds, which is generally eight years.

Johnson intangibles

The intangibles from Johnson represent the future management fees, development fees and commissions that Tricon expects to collect over the lives of the projects that The Johnson Companies LP ("Johnson") manages. They are amortized by project over the estimated periods that the projects expect to collect these fees, which is approximately seven years for the fees receivable and lot development fees receivable.

The customer relationship intangible from Johnson represents the management fees, development fees and commissions that Tricon will collect from future projects. These are based on future projects which are a result of Johnson's existing customer relationships, and as such are considered to be definite-life intangibles.

Goodwill

Goodwill arises on the acquisition of subsidiaries and represents the excess of the consideration transferred over the Company's interest in the net fair value of the net identifiable assets, liabilities and contingent liabilities of the acquiree and the fair value of the non-controlling interest in the acquiree.

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to a cash-generating unit as it is the lowest level within the Company at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate a potential impairment. The carrying value of goodwill is compared to the recoverable amount, which is the greater of value in use and the fair value less costs of disposal. Any impairment is recognized immediately as an expense and is not subsequently reversed.

Impairment of non-financial assets

Assets that are subject to amortization and depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets are reviewed for possible impairment or reversal of a previously recorded impairment at each reporting date. Other long-lived assets include goodwill and it is reviewed for impairment annually or at any time if an indicator of impairment exists.

Financial instruments

Financial assets

Financial assets are classified as financial assets at FVTPL, loans and receivables, held-to-maturity financial assets and available-for-sale financial assets, as appropriate. The Company determines the classification of its financial assets at initial recognition. When financial assets are recognized initially, they are measured at fair value, plus, in the case of financial assets not carried at FVTPL, directly attributable transaction costs.

Transaction costs related to financial assets at FVTPL are expensed as incurred in the statement of comprehensive income. Subsequent to initial recognition, financial assets at FVTPL are measured at fair value.

Gains and losses arising from changes in the fair value of the financial assets at FVTPL category are presented in the statement of comprehensive income within investment income. Financial assets and liabilities at FVTPL are presented within changes in operating assets and liabilities in the consolidated statements of cash flows.

Financial assets are derecognized only when the contractual rights to the cash flows from the financial assets expire or the Company transfers substantially all of the risks and rewards of ownership.

The Company's other financial assets carried at amortized cost consist of cash and amounts receivable.

Cash includes cash on hand and deposits held at call with banks.

Cash and amounts receivable are initially recognized at fair value and subsequently accounted for at amortized cost.

The Company assesses, at each balance sheet date, whether there is objective evidence that receivables are impaired. If there is objective evidence of impairment (such as significant financial difficulty of the obligor, breach of contract, or it becomes probable that the debtor will enter bankruptcy), the receivable is tested for impairment. The amount of the loss is measured as the difference between the account's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not been incurred), discounted at the original effective interest rate (that is, the effective interest rate computed at initial recognition).

The carrying amount is reduced through the use of an allowance account. The amount of the loss is recognized in net income.

If in a subsequent period the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed, to the extent that the carrying value of the receivable does not exceed its amortized cost at the reversal date. Any subsequent reversal of an impairment loss is recognized in net income.

Financial liabilities

Liabilities within the scope of IAS 39 are classified as financial liabilities at FVTPL or other liabilities, as appropriate.

A financial liability is derecognized when the obligation under the liability is discharged or cancelled, or expires.

The Company's financial liabilities consist of amounts payable and accrued liabilities, dividends payable, debt and derivative financial instruments. The Company's financial liabilities are classified as other liabilities.

Debt is initially recognized at fair value net of transaction costs and subsequently accounted for at amortized cost. Interest expense is accounted for using the effective interest rate method.

The effective interest rate method is a method of calculating the amortized cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that discounts estimated future cash payments or receipts throughout the expected life of the financial instrument, or a shorter period where appropriate, to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Company estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Derivative financial instruments

Derivative financial instruments, which are comprised of the conversion and redemption options related to the convertible debentures, are initially recognized at fair value on the date a derivative contract is entered into and are subsequently remeasured at fair value with the resulting gain or loss reflected in net income. Derivatives are valued using model calibration. Inputs to the valuation model are determined from observable market data wherever possible, including prices available from exchanges, over-the-counter markets and consensus pricing. Certain inputs may not be observable in the market directly, but can be determined from observable prices via model calibration procedures or estimated from historical data or other sources.

Compound financial instruments

Compound financial instruments issued by the Company comprise convertible unsecured subordinate debentures that can be converted to share capital at the option of the holder. The Company may settle the conversion right in cash in lieu of common shares unless the holder has explicitly indicated that they do not wish to receive cash. The cash settlement amount depends on the weighted average trading price of the common shares of the Company. This settlement option requires the Company to record the conversion option as a derivative financial instrument measured at fair value at each reporting period, with changes in fair value recorded in net income.

In addition, the debentures contain a redemption option, subject to several conditions, which allows the Company to redeem the debentures, in whole or in part, and the Company may settle the redemption option either in cash at par plus accrued and unpaid interest or in common shares, with the number of common shares to be issued depending on the weighted average trading price of the common shares of the Company. The redemption option is recorded as a derivative financial instrument measured at fair value at each reporting period, with changes in fair value recorded in net income.

The host liability component of a compound financial instrument is recognized initially at the fair value of a similar liability that does not have an equity conversion option. The conversion and redemption options are considered to be interrelated and therefore are treated as a single compound embedded derivative which is recognized at fair value.

Any directly attributable transaction costs are allocated entirely to the host liability component.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported on the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. As of December 31, 2017, the Company does not have any assets or liabilities that are subject to an offsetting agreement.

Leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases, net of any incentives received from the lessor, are recorded as an expense in net income on a straight-line basis over the term of the lease. Leases of assets where the Company has retained substantially all of the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at the commencement of the lease at the lower of the fair value of the leased property and the present value of the minimum lease payments.

Share capital

Common shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown as a deduction, net of tax, from the proceeds.

Where the Company purchases its equity share capital for cancellation, the consideration paid, including any directly attributable incremental costs, is deducted from equity attributable to the Company's equity holders.

Earnings per share

Basic

Basic earnings per share is determined using the weighted average number of shares outstanding including vested phantom units and deferred share units issued during the reporting period, taking into account on a retrospective basis any increases or decreases caused by share splits or reverse share splits occurring after the reporting period, but prior to the financial statements being authorized for issue.

Diluted

The Company considers the effects of stock compensation and convertible debentures in calculating diluted earnings per share. Diluted earnings per share is calculated by adjusting net income attributable to shareholders of the Company and the weighted average number of shares outstanding based on the assumption of the conversion of all potentially dilutive shares on a weighted average basis from the date the potential share compensation vests and from the conversion date of the debentures to the balance sheet date. The conversion date of the debenture units is assumed to be the later of the beginning of the reporting period and the closing date, in accordance with IAS 33.

Dividends

Dividends on common shares are recognized in the consolidated financial statements in the year in which the dividends are approved by Tricon's Board of Directors.

Current and deferred income taxes

Income tax expense includes current and deferred income taxes. Income tax expense is recognized in the statement of comprehensive income, except to the extent that it relates to items recognized directly in equity, in which case the tax is also recognized directly in equity.

Current income taxes are the expected taxes payable on the taxable income for the year, using income tax rates enacted, or substantively enacted, at the end of the reporting period, and any adjustment to income taxes payable in respect of previous years. The Company uses the liability method to recognize deferred income taxes on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts. Deferred income tax assets are only recorded if it is probable that they will be realized. Enacted or substantively enacted rates in effect at the consolidated balance sheet date that are expected to apply when the deferred income tax asset is realized or the deferred tax liability is settled are used to calculate deferred income taxes.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Investment income

Investment income includes gains and losses arising on the remeasurement of investments at FVTPL, including foreign exchange gains and losses.

Revenue recognition

Revenue comprises the fair value of the consideration received or receivable from the provision of services in the ordinary course of the Company's activities. The Company recognizes revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will be received and when specific criteria have been met, as described below.

Revenues comprise contractual fees and general partner distributions which are not contingent on the performance of the underlying funds as well as performance fees earned in respect of investment management services provided to investment funds managed by the Company. Contractual fees are recognized as services are performed and are based on a fixed percentage of each fund's committed capital prior to the expiration of the fund's investment period and based on invested capital following the expiration of the relevant investment period. The contractual fees also include the management and development fees earned by Johnson from its underlying projects.

General partner distributions are recognized as services are performed.

Performance fees are earned based on fixed percentages of the distributions of each fund in excess of predetermined thresholds as outlined by each limited partnership agreement. Performance fees are recognized when the amount of revenue can be reliably measured and it is probable that future economic benefits will flow to the Company, which is generally subsequent to the return of all the original capital provided by investors plus a preferred rate of return as specified in the limited partnership agreement. Contractual fees and performance fees are earned through the Company's fiduciary activities as an investment manager.

Compensation arrangements

Stock option plan

The Company accounts for its stock option plan by calculating the fair value of the options as of the grant date using a Black-Scholes option pricing model and observable market inputs. This fair value is recognized as compensation cost using the graded vesting method over the vesting period of the options.

Annual Incentive Plan ("AIP")

The Board of Directors approved an Annual Incentive Plan ("AIP") and a Performance Fee-Related Bonus Plan known as the long-term incentive plan ("LTIP"). The plans were approved as of January 2014 and the AIP was updated by the Board as of March 2015.

Aggregate AIP awards are calculated on an annual basis as a percentage (the "AIP Percentage") of EBITDA for Bonus Purposes as defined under the AIP, with the actual percentage, not to exceed 20%, determined annually at the Board's discretion. The aggregate AIP awards are allocated among employees at the Board's discretion. Under the current plan, at least 60% of AIP compensation will be distributed as cash, and up to 40% in Deferred Share Units ("DSUs") granted pursuant to the Company's Deferred Share Unit Plan ("DSUP") with a one-year vesting and expense period. Expenses incurred under the AIP are recognized in the period when services are provided.

Long-term incentive plan (“LTIP”)

LTIP expense is generated from two sources: (i) 50% of the Company’s share of performance fees or carried interest from Tricon Housing Partners and Tricon Lifestyle Rentals Canada, and (ii) the AIP Percentage of THP1 US investment income, payable in DSUs which vest over a five-year period. Amounts under the LTIP are allocated among employees pursuant to the LTIP.

For the LTIP generated from the Company’s share of performance fees or carried interest from Tricon Housing Partners and Tricon Lifestyle Rentals Canada, the Company estimates the LTIP liability by determining the performance fees at each reporting date based on the estimated fair value of the underlying investments. Changes in the LTIP liability are recognized in the statement of comprehensive income.

For the LTIP generated from the Company’s investment income in THP1 US, as the deferred shares vest equally on the anniversary dates following the grant date over a five-year period, the compensation expenses are recognized over a six-year period on a graded vesting basis.

Directors’ fees

One-half of each independent Director’s base annual retainer is paid in DSUs which vest on the third anniversary of the grant date. In addition, an independent Director may elect each year to receive a portion of the balance of his or her fees (including his or her base annual retainer, any additional retainer, and meeting attendance fees) in DSUs, which DSUs vest immediately upon grant. Any remaining balance of such fees not payable in DSUs is paid in cash. The DSUs granted to Directors are governed by the DSUP.

Prior to 2014, independent Directors had the option of receiving a portion of their annual retainer and other fees in notional units. The terms of such notional units, which were issuable only to independent Directors, were equivalent to the DSUs except that: (i) the notional units vested only when a holder ceased to act as a Director of, or otherwise be employed by, the Company, and (ii) the notional units were only redeemable for cash.

Reportable segments

Tricon is comprised of five reportable segments: Private Funds and Advisory (“PF&A”); and Principal Investing in Tricon Housing Partners (“THP”), Tricon American Homes (“TAH”), Tricon Lifestyle Communities (“TLC”), and Tricon Lifestyle Rentals (“TLR”). The reportable segments are business units offering different products and services, and are managed separately due to their distinct investment natures. These five reportable segments have been determined by the Company’s chief operating decision makers (Note 17).

Accounting standards adopted in the current year

International Accounting Standard (“IAS”) 12 was amended to clarify the requirements for recognizing deferred income tax assets on unrealized losses, deferred income taxes where an asset is measured at fair value below the asset’s tax base, and certain other aspects of accounting for deferred income tax assets. The amendment was adopted on January 1, 2017, without a significant impact on Tricon’s balance sheet and statements of operations.

In January 2016, the IASB issued an amendment to IAS 7, Statement of Cash Flows, introducing an additional disclosure that will enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes (such as foreign exchange gains or losses). The amendment was adopted on January 1, 2017, without a significant impact on Tricon’s balance sheet and statements of operations. The Company has provided the related information for the current period in Note 23.

Accounting standards and interpretations issued but not yet adopted

In July 2014, the IASB issued the final publication of the IFRS 9 standard, which will supersede IAS 39, Financial Instruments: Recognition and Measurement. IFRS 9 includes revised guidance on the classification and measurement of financial instruments, a new expected credit loss model for calculating impairment on financial assets, and the new hedge accounting guidance.

Under IFRS 9, financial assets will be classified and measured based on the business model in which they are held and the characteristics of their contractual cash flows. The new hedge accounting standard will align hedge accounting more closely with risk management. IFRS 9 does not fundamentally change the types of hedging relationships or the requirement to measure and recognize ineffectiveness; however, it will provide more hedging strategies used for risk management to qualify for hedge accounting and introduce more judgment to assess the effectiveness of a hedging relationship. It also carries forward the guidance on recognition and derecognition of financial instruments from IAS 39. The standard is effective for annual periods beginning on or after January 1, 2018.

The Company intends to adopt IFRS 9 in its consolidated financial statements for the annual period beginning January 1, 2018. The adoption of IFRS 9 is not expected to have a material impact on the Company’s consolidated financial statements.

On May 28, 2014, the IASB issued the final revenue standard, IFRS 15, Revenue from Contracts with Customers, which will replace IAS 11 Construction Contracts, IAS 18 Revenue, IFRIC 13 Customer Loyalty Programmes, IFRIC 15 Agreements for the Construction of Real Estate, IFRIC 18 Transfer of Assets from Customers, and SIC 31 Revenue – Barter Transactions Involving Advertising Services.

The new standard contains a single model that applies to contracts with customers and two approaches for recognizing revenue: at a point in time or over time. The model features a contract-based five-step analysis of individual transactions to determine whether, how much and when revenue is recognized. New estimates and judgmental thresholds have been introduced, which may affect the amount and/or timing of revenue recognized. IFRS 15 also provides guidance relating to the treatment of contract acquisition and contract fulfillment costs.

The Company will adopt IFRS 15 in its consolidated financial statements for the annual period beginning January 1, 2018. Management assessed that the adoption may impact Tricon's accounting for contractual fees and performance fees, and in particular its contractual fees from Johnson. Management reviewed the fee terms of existing development management agreements at Johnson and determined that the pattern of revenue recognition in Johnson's reported result will remain unchanged upon adoption of this standard.

The Company meets the definition of an investment entity, and therefore, investments in subsidiaries are accounted for at FVTPL, rather than consolidating them. Investment income is out of the scope of IFRS 15, and therefore, we expect that the application of this new standard will have no overall impact, including on contractual fees as noted above, on the Company's consolidated financial statements.

On January 13, 2016, the IASB issued IFRS 16, Leases, which will replace IAS 17, Leases. IFRS 16 sets out the principles for the recognition, measurement and disclosure of leases. IFRS 16 provides revised guidance on identifying a lease and for separating lease and non-lease components of a contract. IFRS 16 introduces a single accounting model for all lessees and requires a lessee to recognize right-of-use assets and lease liabilities for leases with terms of more than 12 months, unless the underlying asset is of low value. Under IFRS 16, lessor accounting for operating and finance leases will remain substantially unchanged. IFRS 16 is effective for annual periods beginning on or after January 1, 2019, with earlier application permitted for entities that apply IFRS 15.

The Company intends to adopt IFRS 16 in its consolidated financial statements for the annual period beginning January 1, 2018, together with its adoption of IFRS 15. The adoption of IFRS 16 is not expected to have a material impact on the Company's consolidated financial statements as the Company has no significant operating lease arrangements.

In June 2016, the IASB issued an amendment to IFRS 2, Share-Based Payments, addressing (i) certain issues related to the accounting for cash-settled awards, and (ii) the accounting for equity-settled awards that include a "net settlement" feature in respect of employee withholding taxes. This amendment is effective for annual periods beginning on or after January 1, 2019. The Company is currently reviewing the amendment to assess the impact it may have upon adoption.

In November 2016, the IFRS Interpretations Committee issued IFRIC 22, Foreign Currency Transactions and Advance Consideration. The interpretation clarifies that the date of foreign currency transactions for purposes of determining the exchange rate to use on initial recognition of the related asset, expense or income is the date on which an entity initially recognizes the non-monetary asset or liability arising from the payment or receipt of advance consideration. The amendment is effective for annual periods beginning on or after January 1, 2018, with earlier application permitted. The adoption of IFRIC 22 is not expected to have a material impact on the Company's consolidated financial statements as the Company has no significant foreign currency advance transactions with a third party.

There are no other standards, interpretations or amendments to existing standards that are not yet effective that are expected to have a material impact on the Company.

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and judgments applied that have a significant risk of causing material adjustments to the carrying amounts of assets and liabilities within the next financial year are outlined below. Actual results could differ from these estimates and the differences may be material.

Income taxes

The determination of the Company's income and other tax liabilities requires interpretation of complex laws and regulations often involving multiple jurisdictions. Significant estimates are required in determining the Company's consolidated income tax provision. There are many transactions and calculations for which the ultimate tax determination is uncertain. The Company recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current tax and deferred tax provisions. Furthermore, deferred income tax balances are recorded using enacted or substantively enacted future income tax rates. Changes in enacted income tax rates are not within the control of management. However, any such changes in income tax rates may result in actual income tax amounts that may differ significantly from estimates recorded in deferred tax balances.

Judgment is also required in determining whether deferred income tax assets should be recognized on the consolidated balance sheets. Deferred income tax assets are recognized to the extent that the Company believes it is probable that the assets can be recovered when future taxable profit will be available against which the temporary differences can be utilized. The Company assesses deferred income tax liabilities on its investments in TAH, TLC and TLR based on a reduction of its investment as opposed to a sale of underlying assets held by the investment.

Fair value and impairment of financial instruments

Certain financial instruments are recorded in the Company's consolidated balance sheet at values that are representative of or approximate fair value.

The fair values of the Company's investments in Tricon Housing Partners, Tricon American Homes, Tricon Lifestyle Communities and Tricon Lifestyle Rentals are determined using the valuation methodologies described in Note 6. By their nature, these valuation techniques require the use of assumptions that are mainly based on market conditions existing at the end of each reporting period. Changes in the underlying assumptions could materially impact the determination of the fair value of a financial instrument. Imprecision in determining fair value using valuation techniques may affect the investment income recognized in a particular period.

Fair value of incentive plans

Management is required to make certain assumptions and to estimate future financial performance to estimate the fair value of incentive plans at each consolidated balance sheet date. Significant estimates and assumptions relating to such incentive plans are disclosed in Notes 2 and 16. The LTIP requires management to estimate future non-IFRS earnings measures, namely future performance fees relative to each fund or separate account. Future non-IFRS measures are estimated based on current projections, and are updated at least annually, taking into account actual performance since inception.

Determination of investment entity

In accordance with IFRS 10, an investment entity is an entity that obtains funds from one or more investors for the purpose of providing them with investment management services, commits to its investors that its business purpose is to invest funds solely for returns from capital appreciation, investment income (including rental income), or both, and measures and evaluates the performance of substantially all of its investments on a fair value basis. In addition, IFRS 10 clarifies that an investment entity may earn fee income from the provision of investment-related services to external parties. After considering all relevant facts and circumstances to determine whether or not the Company should still be considered as an investment entity, management believes that there has not been any event triggering a change to the status during the year.

4. PREPAID EXPENSES AND DEPOSITS

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
Deposits for office building	$ –	$ 2,155
Other prepaid expenses and deposits	622	444
Total prepaid expenses and deposits	**$ 622**	**$ 2,599**

5. INVESTMENTS

Investments – Tricon Housing Partners ("THP") are land and homebuilding investments or co-investments in funds, separate accounts and side-car investments managed by the Company.

Investments – Tricon American Homes ("TAH") are investments in operating entities which invest in U.S. single-family rental homes. The investments are managed through an integrated business platform managed by the operating entity, which is responsible for the acquisition, renovation and leasing of the homes.

On May 9, 2017, TAH completed its acquisition of Silver Bay Realty Trust Corp. ("Silver Bay"), a New York Stock Exchange-listed U.S. single-family rental Real Estate Investment Trust with 9,054 homes, of which 1,247 non-core homes were disposed in the fourth quarter. This acquisition was of a complementary portfolio to that of TAH given its focus on the Sun Belt and middle market strategy. The $21.50 per share all-cash transaction valued Silver Bay at approximately $1.4 billion (before transaction costs), which included an equity purchase price of approximately $808,000 and in-place debt (net of cash on hand) of approximately $628,000.

Total advances to the Company's investment in TAH include $242,228 to effect the acquisition of Silver Bay.

Investments – Tricon Lifestyle Communities ("TLC") are investments in U.S. manufactured housing communities that lease land to owners of prefabricated homes.

Investments – Tricon Lifestyle Rentals ("TLR") are investments in Canadian and U.S. Class A purpose-built rental apartments.

The Company makes these investments via equity investments and loan advances. Advances made to investments are added to the carrying value when paid; distributions from investments are deducted from the carrying value when received. The following is a summary of the composition of the Company's investments:

	December 31, 2017			December 31, 2016		
(in thousands of U.S. dollars)	Internal debt instruments	Equity	Total investment	Internal debt instruments	Equity	Total investment
Investments – THP						
U.S. commingled funds	$ –	$ 119,714	$ 119,714	$ –	$ 137,004	$ 137,004
Canadian commingled funds	–	9,651	9,651	–	9,537	9,537
Separate accounts and side-cars	21,903	155,369	177,272	21,101	134,145	155,246
	21,903	284,734	306,637	21,101	280,686	301,787
Investments – TAH	–	884,115	884,115	–	479,938	479,938
Investments – TLC	–	62,074	62,074	–	52,591	52,591
Investments – TLR	–	89,225	89,225	–	62,410	62,410
Total	**$ 21,903**	**$ 1,320,148**	**$ 1,342,051**	**$ 21,101**	**$ 875,625**	**$ 896,726**

The underlying loan instruments within the Company's Tricon Housing Partners investments, if utilized, are denominated in U.S. dollars and bear interest at rates between 9.95% and 11.95%, compounded monthly.

Each investment vertical may utilize debt in order to finance normal business operations, with the debt secured by the underlying assets of the related investment. The Company has provided specific guarantees to the lenders of the TAH warehouse facility, the TLC mortgages and the TLR land and construction loans, on a non-recourse basis subject only to specific carved-out events in the case of the TAH and TLC guarantees. In 2016, the Company entered into a financial guarantee contract in the amount of $27,740 (C$34,800) with Canadian Imperial Bank of Commerce for the provision of a financial guarantee in respect of a construction loan held by 592 Sherbourne GP Inc. The construction loan matures on January 7, 2019 with two one-year extensions. This guarantee contract is initially measured at fair value and subsequently recorded as a contingent liability until such time as it becomes probable that the guarantor will be required to make payments under the guarantee provision.

The following tables summarize the balances in the investment funds that are managed by Tricon, presented in the functional currency of the fund:

(in thousands of dollars) THP Investments	Currency	Tricon commitment	Advances	Unfunded commitment	Project fees	Cash distributions	Total distributions	Investment at fair value[2]
As at December 31, 2017[1]

6. FAIR VALUE ESTIMATION

In the fair value hierarchy, the level in which the fair value measurement is categorized is determined on the basis of the lowest level input that is significant to the fair value measurement. For this purpose, the significance of the input is assessed against the fair value measurement. Assessing the significance of a particular input to the fair value measurement requires judgment, considering factors specific to the asset or liability.

The following describes the categories within the fair value hierarchy:

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 – Inputs for the asset or liability that are not based on observable market data.

The following table provides information about financial assets and liabilities measured at fair value on the balance sheet and categorized by level according to the significance of the inputs used in making the measurements:

	December 31, 2017			December 31, 2016		
(in thousands of U.S. dollars)	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
Financial assets						
Investments – THP						
U.S. commingled funds	$ –	$ –	$ 119,714	$ –	$ –	$ 137,004

There have been no transfers between levels for the years ended December 31, 2017 and December 31, 2016.

Financial assets valuation methodologies

The Company's Valuation Committee is responsible for fair value measurements included in the financial statements, including Level 3 measurements. The valuation processes and results are reviewed and approved by the Valuation Committee at least once every quarter, in line with the Company's quarterly reporting dates. The Valuation Committee consists of individuals who are knowledgeable and have experience in the fair value techniques for the investments held by the Company. The Valuation Committee decides on the appropriate valuation methodologies for new investments and contemplates changes in the valuation methodology for existing investments. Additionally, the Valuation Committee analyzes the movements in each investment's value, which involves assessing the validity of the inputs applied in the valuation. Valuation results are discussed with the Audit Committee as part of its quarterly review of the Company's financial statements.

The Company used the following techniques to determine the fair value measurements included in the financial statements categorized in Level 3:

Investments – Tricon Housing Partners

Tricon establishes wholly-owned subsidiaries that invest in limited partnerships as a limited partner. The investments are measured at fair value as determined by the Company's proportionate share of the fair value of each limited partnership's net assets at each measurement date. The fair values of each limited partnership's net assets are calculated by determining the fair values of the underlying projects using discounted cash flows, appraised values or share prices as reported on the appropriate stock exchange.

In addition to the investments in limited partnerships, the Company invests in separate accounts and side-car investments through limited partnerships with other third parties. Tricon's ownership interests in these investments are held through the Company's wholly-owned subsidiaries. The investments are measured at fair value as determined by the waterfall distribution calculations specified in the relevant limited partnership agreement. The inputs into the waterfall distribution calculations include the fair value of the land and working capital held by the limited partnerships. The fair value of the land is based on appraisals prepared by an external third-party valuator or on internal valuations.

A side-car is a co-investment vehicle under common sponsorship with a Tricon fund. Tricon's ownership interests in the side-cars are held through the Company's wholly-owned subsidiaries. A side-car generally participates in larger investment opportunities provided by the fund sponsor or general partner. The measurement and valuation methodologies for side-cars are the same as those for the limited partnership investments.

Quantitative information about fair value measurements of the investments uses the following significant unobservable inputs (Level 3):

Description	Valuation technique(s)	Significant unobservable input	December 31, 2017 Range of inputs	December 31, 2017 Weighted average of inputs	December 31, 2016 Range of inputs	December 31, 2016 Weighted average of inputs	Other inputs and key information
Debt investments	Net asset value, determined using discounted cash flow	a) Discount rate[1] b) Future cash flow[2]	10.0% – 12.0% 3 – 6 years	11.4% 4.9 years	10.0% – 12.0% 4 – 5 years	10.7% 4.1 years	Estimated probability of default
Equity investments Commingled funds	Net asset value, determined using discounted cash flow	a) Discount rate[1] b) Future cash flow[2]					Entitlement risk, sales risk and construction risk are taken into account in determining the discount rate. **U.S. funds:** Lower of 20% and the expected return for the project, subsequently adjusted downward as development risk is mitigated over project life. **Canadian funds:** Discounted at contractual interest rate; may include contingent interest cash flows (received when developers' project returns exceed the underlying contractual interest), which is discounted using the same method as U.S. funds.
THP1 US			12.5% – 20.0% 1 – 4 years	14.7% 2.8 years	12.5% – 20.0% 1 – 4 years	14.6% 2.8 years	
THP2 US			12.5% – 20.0% 1 – 10 years	15.0% 1.3 years	12.5% – 20.0% 1 – 7 years	16.1% 2.0 years	
THP3 Canada			8.0% – 18.0% 2 – 8 years	10.9% 2.4 years	8.0% – 18.0% 3 – 8 years	10.8% 3.5 years	
Separate accounts and side-cars	Waterfall distribution model	a) Discount rate[1] b) Future cash flow[2] c) Appraised value[3]	15.0% – 24.0% 1 – 18 years	N/A[3] 14.0 years	17.0% – 25.0% 2 – 21 years	N/A[3] 13.5 years	Entitlement risk, sales risk and construction risk are taken into account in determining the discount rate. Price per acre of land, timing of project funding requirements and distributions.

(1) Generally, an increase in future cash flow will result in an increase in the fair value of debt instruments and fund equity investments. An increase in the discount rate will result in a decrease in the fair value of debt instruments and fund equity investments. The same percentage change in the discount rate will result in a greater change in fair value than the same absolute percentage change in future cash flow.

(2) Estimating future cash flows involves modelling developers' cash flows to determine the quantum and timing of project funding requirements and cash distributions to the investment vehicle. Estimates of developers' cash flows are based on detailed quarterly and annual budgets and include estimates of construction and development costs, anticipated selling prices and absorption ratios for each project.

(3) On an annual basis, the Company obtains external valuations for its separate account equity and side-car investments. As at December 31, 2017, the external valuations for Tricon's interest in eight separate account equity and side-car investments totaled $49,329. The Company's investment team and finance team verify all major inputs to the valuation and review the results with the independent appraiser. The significant input within the appraised value is the value of land per acre.

Sensitivity

The effects on the fair value of Investments – Tricon Housing Partners of a 1% change in the discount rates are as follows:

(in thousands of dollars)	Currency	December 31, 2017 1% increase	December 31, 2017 1% decrease	December 31, 2016 1% increase	December 31, 2016 1% decrease
U.S. commingled funds	USD	$ (1,067)	$ 1,094	$ (1,342)	$ 1,377
Canadian commingled funds	CAD	(165)	169	(258)	269
Separate accounts and side-cars	USD	(3,002)	3,186	(1,673)	1,724

Investments – Tricon American Homes

All of the Company's investments in TAH subsidiary entities are held through a wholly-owned subsidiary, Tricon SF Home Rental ULC, which is recorded at fair value. The fair value of the Company's investment in Tricon SF Home Rental ULC is calculated based on the underlying net assets' fair value. The fair value of net assets of the various entities is based on a sum-of-the-parts approach, where assets and liabilities are measured at fair value individually.

Home values typically do not change materially in the short term, and capital expenditures generally do not significantly impact values in the first three months after purchase. As a result, homes acquired in the current quarter are recorded at their purchase price plus the cost of capital expenditures, if applicable. Homes acquired prior to October 1, 2017 were valued at November 30, 2017. Management has assessed the impact of any market changes that have occurred subsequent to the date of valuation and has determined that values were valid at December 31, 2017.

During the year, the Broker Price Opinion ("BPO") valuation methodology was used to determine the fair value of 6,135 of TAH's rental properties. The remainder of the rental properties, including those previously valued by BPO, had their values updated using the Home Price Index ("HPI") methodology. The HPI is calculated based on a repeat-sales model using large real estate information databases compiled from public records. Twelve-month trailing HPI was used where the quarterly HPI change was determined by averaging the index movement over the past twelve months. The quarterly HPI change is then applied to the previously recorded fair value of the investment properties. The data used to fair value the rental properties is specific to the zip code in which the property is located.

In addition to the investment properties generating rental income, a small percentage of the investment properties are held for sale ("for sale homes"). These for sale homes were originally purchased as rental properties but subsequently selected for sale through the investee's active asset management process. All for sale homes are valued at fair value less cost to sell.

The fair value of external debt is based on a discounted cash flow model at a market rate of interest that TAH would have obtained for similar financing. Deferred income taxes are based on the enacted tax rates for future years, with fair values determined by discounting to the reporting period. Working capital approximates fair value.

In the fourth quarter of 2017, TAH completed the sale of 1,523 non-core homes to a large institutional single-family rental owner and operator, including 1,247 homes acquired from Silver Bay. The homes were sold for total disposition proceeds of approximately $153,000, which were primarily used to repay a portion of the outstanding Silver Bay acquisition warehouse facility.

Debt

A summary of TAH's debt outstanding as of December 31, 2017 is as follows:

			Debt balance[6]	
(in thousands of U.S. dollars)	Effective interest rates	Maturity dates	December 31, 2017	December 31, 2016
Securitization loan, TAH 2015-1[1]	LIBOR+1.96%	May 2018	$ –	$ 350,595
Silver Bay acquisition warehouse facility[2]	LIBOR+3.28%	May 2018	155,828	–
Warehouse credit facility[1]	LIBOR+3.00%	October 2019	184,167	63,038
Securitization loan, TAH 2016-1	3.59%	November 2021	362,601	362,601
Securitization loan, TAH 2017-1[3]	3.50%	September 2022	462,594	–
Term loan[4]	LIBOR+2.00%	October 2022	347,582	–
Securitization loan, TAH 2017-2[5]	3.58%	January 2024	365,000	–
Total debt			**$ 1,877,772**	**$ 776,234**

(1) The warehouse credit facility has a one-year extension option. On October 6, 2017, TAH amended and restated its credit facility to increase the size of the facility to $500,000. Concurrently, TAH made an early repayment of the securitization loan, TAH 2015-1, resulting in approximately 3,200 homes being released from the securitization collateral pool.

(2) The Silver Bay acquisition warehouse facility has two six-month extension options.

(3) TAH closed its third securitization loan, TAH 2017-1, on August 23, 2017. The transaction involved the issuance and sale of six classes of fixed-rate pass-through certificates. The gross transaction proceeds represent approximately 76% of the value of the securitized portfolio and approximately 83% of its all-in cost. Proceeds were used to partially repay the Silver Bay acquisition warehouse facility.

(4) TAH entered into a new term loan facility with Morgan Stanley Asset Funding Inc. on October 24, 2017.

(5) TAH closed its fourth securitization loan, TAH 2017-2, on December 20, 2017. The transaction involved the issuance and sale of six classes of fixed-rate pass-through certificates. The gross transaction proceeds represent approximately 70% of the value of the securitized portfolio and approximately 90% of its all-in cost. Proceeds were used to partially repay the Silver Bay acquisition warehouse facility and the warehouse credit facility.

(6) The fair value of debt at TAH approximates cost.

Sensitivity

As of December 31, 2017, TAH, and the Company where applicable as its sponsor, are in compliance with the financial covenants and other undertakings outlined in the loan agreements. The one-month LIBOR during the year ended December 31, 2017 ranged from 0.77% to 1.37%. If interest rates had been 50 basis points lower, with all other variables held constant, investment income in TAH for the year ended December 31, 2017 would have been $3,889 (2016 – $2,133) higher. If interest rates had been 50 basis points higher, with all other variables held constant, investment income in TAH for the year ended December 31, 2017 would have been $3,889 (2016 – $2,540) lower.

If the prices of single-family rental homes held by TAH were to increase or decrease by 1% (December 31, 2016 – 1%), the impact on investments in TAH fair value at December 31, 2017 would be $26,613 and ($26,613), respectively (December 31, 2016 – $12,099 and ($12,099)).

The weighted average of the quarterly HPI change was 1.4%. If the change in the quarterly HPI increased or decreased by 0.5%, the impact on investments in TAH fair value at December 31, 2017 would be $8,206 and ($8,206), respectively (December 31, 2016 – $5,614 and ($5,614)).

Investments – Tricon Lifestyle Communities

The Company's investment in Tricon Lifestyle Communities is held through a wholly-owned subsidiary, Tricon Manufactured Housing Communities ULC, which carries the investment at fair value. The fair value of the Company's investment is estimated based on the Company's proportionate share of the net assets of the TLC limited partnership. The fair value of the net assets is based on a sum-of-the-parts approach, where assets and liabilities are measured at fair value individually.

Since all variables impacting fair value of the investment property, such as rental growth, expense inflation and the impact of future capital expenditures, generally do not change significantly in the first twelve months after acquisition, investments are recorded at cost for the first twelve months after acquisition. As a result, these properties are recorded at their purchase price plus the cost of capital expenditures. Key variables are monitored on a quarterly basis to determine if there may be a material change in fair value.

The Company fair values the TLC properties using a discounted cash flow methodology. The fair value is determined based on rental income from the current leases and assumptions about rental income from future leases, such as increases in rental rates and occupancy, less future cash outflows in respect of such leases and capital expenditures. Other factors included in the future cash flow estimate are the terminal value of the underlying property based on reliable estimates of the terminal year net operating income ("NOI"), supported by the terms of existing leases and assumptions of future leases, and market capitalization rates of comparable precedent transactions within each market.

The Company also takes into account the carried interest payable to the third-party operating partner of the underlying limited partnership in determining the fair value of its investment. The carried interest amounts are based on waterfall distribution calculations specified in the limited partnership agreement and may result in the payment of a performance fee to the third-party operating partner once limited partners receive their capital and preferred return. The fair value of external debt is based on a discounted cash flow model at a market rate that the limited partnership would have obtained for similar financing. Deferred income taxes are based on the enacted tax rates for future years. Working capital of the limited partnership approximates fair value.

Subsequent to year-end, TLC's properties are presented as assets held for sale as TLC launched an official marketing process to exit the investment. TLC properties are available for immediate sale, and management has committed to a plan to sell the group of assets and is actively seeking a buyer for the assets. The sale is probable and is expected to be completed within a year.

Sensitivity

Since the rate of interest on borrowings incurred by TLC is fixed, investment income in TLC for the period would not change due to interest rate fluctuations.

TLC's fair value measurements of its investments are based on significant unobservable inputs, including discount rates and future cash flows. At December 31, 2017, an increase of 1% in the discount rate results in a decrease in fair value of $6,982, and a decrease of 1% in the discount rate results in an increase in fair value of $5,959 (December 31, 2016 – ($3,557) and $2,475, respectively).

Investments – Tricon Lifestyle Rentals (formerly Tricon Luxury Residences)

The Company's investment in TLR Canada is held through a wholly-owned subsidiary, Tricon Luxury Residences Co-Investment Inc. Its investment in TLR U.S. is held through a wholly-owned subsidiary, Tricon SLR US Multifamily LLC. Both subsidiaries carry their investments at fair value. The fair values of the investments in TLR are estimated based on the subsidiaries' proportionate share of the net assets of TLR limited partnerships. The fair value of the net assets is based on a sum-of-the-parts approach, where assets and liabilities are measured at fair value individually.

Quantitative information about fair value measurements of the investments uses the following significant unobservable inputs (Level 3):

			December 31, 2017		December 31, 2016		
Description	Valuation technique(s)	Significant unobservable input	Range of inputs	Weighted average of inputs	Range of inputs	Weighted average of inputs	Other inputs and key information
TLR Canada	Waterfall distribution model Net asset value, determined using income approach	a) Discount rate[1] b) Future cash flow[2] c) Appraised value[3]	9.0% – 10.0% 1 – 3 years	9.3% 1.7 years	N/A	N/A	Construction risk and leasing risk are taken into account in determining the discount rate. Price per square foot, timing of project funding requirements and distributions.
TLR U.S.	Net asset value, determined using discounted cash flow	a) Discount rate[1] b) Future cash flow[2]	14.0% – 14.5% 2 – 3 years	14.25% 2.2 years	14.0% – 14.5% 2 – 3 years	14.25% 3.0 years	Entitlement risk, leasing risk and construction risk are taken into account in determining the discount rate. Discounted at expected return for the project, subsequently adjusted downward as development risk is mitigated over project life.

(1) Generally, an increase in future cash flow will result in an increase in the fair value of the investments. An increase in the discount rate will result in a decrease in the fair value of investments. The same percentage change in the discount rate will result in a greater change in fair value than the same absolute percentage change in future cash flow.

(2) Estimating future cash flows involves modelling developers' or projects' cash flows to determine the quantum and timing of project funding requirements and cash distributions. Estimates of cash flows are based on annual budgets and include estimates of construction and development costs, anticipated selling/leasing prices and absorption rates for each project.

(3) On an annual basis, the Company obtains external valuations dated December 1 for certain TLR Canada investments. The Company's investment team and finance team verify all major inputs to the valuation and review the results with the independent appraiser. The significant input within the appraised value is the value of land per square foot. Management has assessed whether any significant market changes have occurred subsequent to the date of valuation and has determined that the value remained unchanged at December 31, 2017.

Sensitivity

An increase of 1% in the discount rate results in a decrease in fair value of $1,385, and a decrease of 1% in the discount rate results in an increase in fair value of $1,424 (December 31, 2016 – ($1,272) and $1,316, respectively).

An increase of 5% in the appraised land value per square foot would result in an increase in fair value of $491, and a decrease of 5% in the appraised land value per square foot would result in a decrease in fair value of $491 (December 31, 2016 – $510 and ($510), respectively).

Continuity of investments

The following presents the changes in Level 3 instruments for the years ended December 31, 2017 and December 31, 2016:

THP

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
Opening balance	$ 301,787	$ 303,782
Advances made to investments	21,496	88,562
Distributions received from investments	(34,855)	(118,107)
Investment income	18,209	27,550
Ending balance	**$ 306,637**	**$ 301,787**
Unrealized fair value gain included in net income on investments still held	18,209	27,550

TAH

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
Opening balance	$ 479,938	$ 426,030
Advances made to investments	354,110	98,378
Distributions received from investments	(63,000)	(94,551)
Investment income	113,067	50,081
Ending balance	**$ 884,115**	**$ 479,938**
Unrealized fair value gain included in net income on investments still held	113,067	50,081

TLC

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
Opening balance	$ 52,591	$ 19,153
Advances made to investments	2,102	28,330
Investment income	7,381	5,108
Ending balance	**$ 62,074**	**$ 52,591**
Unrealized fair value gain included in net income on investments still held	7,381	5,108

TLR

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
Opening balance	$ 62,410	$ 19,582
Advances made to investments	14,424	40,762
Investment income	12,391	2,066
Ending balance	**$ 89,225**	**$ 62,410**
Unrealized fair value gain included in net income on investments still held	12,391	2,066

Financial liabilities valuation methodologies

Derivative financial instruments relate to the conversion and redemption features of the convertible debentures and are valued using model calibration, as discussed in Note 9. Inputs to the valuation model are determined from observable market data wherever possible, including prices available from exchanges and consensus pricing. Certain inputs may not be observable in the market directly, but can be determined from observable prices via model calibration procedures or estimated from historical data or other sources.

Quantitative information about fair value measurements (Level 2) using significant observable inputs other than quoted prices included in Level 1 is as follows:

	December 31, 2017		December 31, 2016	
	2020 convertible debentures	2022 convertible debentures	2020 convertible debentures	2022 convertible debentures
Risk-free rate[1]	2.09%	2.23%	1.28%	N/A
Stock price[2]	C$11.55	C$11.55	C$9.46	N/A
Implied volatility[3]	25.01%	24.73%	19.05%	N/A
Dividend yield[4]	2.30%	2.30%	2.95%	N/A

(1) Risk-free rates were from the Canadian and U.S. dollar swap curves matching the terms to maturity of the debentures.

(2) Closing price of the stock as of the valuation date.

(3) Implied volatility was computed from the trading volatility of the Company's stock over a comparable term to maturity.

(4) Dividend yields were from the forecast dividend yields matching the terms to maturity of the debentures.

Cash, amounts receivable, amounts payable and accrued liabilities (including interest payable), dividends payable, and revolving term credit facility are measured at cost, since their carrying values are a reasonable approximation of fair value due to their short-term nature.

7. DEBT

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
Revolving term credit facility	$ 161,500	$ 113,750
Convertible debentures	214,147	55,107
Mortgage	7,957	–
Total debt	**$ 383,604**	**$ 168,857**

As at December 31, 2017, the outstanding balance of the revolving term credit facility was $161,500 (December 31, 2016 – $113,750). During the year ended December 31, 2017, the Company paid interest on total debt in the amount of $13,664 (2016 – $8,041).

Revolving term credit facility

The Company has access to a $365,000 revolving term credit facility (the "Facility"). The Facility includes a syndicate of lenders comprised of Canadian and U.S. banks. The Facility has a maturity date of June 30, 2020. The Company has provided a general security agreement creating a first priority security interest on the assets of the Company.

During the year ended December 31, 2017, the minimum balance drawn on the Facility was nil, and the maximum amount drawn was $163,000.

Advances under the Facility are available by way of Prime, USBR and LIBOR loans as well as Banker's Acceptances. The applicable margin on advances is determined in reference to the senior funded debt-to-EBITDA ratio and is added to the applicable loan reference rate as follows: Prime and USBR loans range from 2.25% to 3.00% above the respective reference rate, and LIBOR loans and Banker's Acceptances range from 3.25% to 4.00% above the respective reference rate. Standby fees ranging from 81.25 basis points to 1.00% of the unutilized portion of the total commitment are payable, with reference to the funded debt-to-EBITDA ratio, on a quarterly basis. Total interest expense incurred under the Facility for the year ended December 31, 2017 amounted to $6,580 (2016 – $6,138), which includes standby charges of $1,730 (2016 – $1,094). The weighted average interest rate during the year ended December 31, 2017 was 4.47%.

The Facility agreement requires the Company to maintain the following covenants: (i) a senior funded debt-to-EBITDA ratio of 4.25:1 for each fiscal quarter prior to June 30, 2018; 3.75:1 for each fiscal quarter ending between July 1, 2018 and June 30, 2019; and 3.25:1 for each fiscal quarter ending thereafter; (ii) a minimum interest coverage ratio of 1.25:1 for each fiscal quarter ending prior to December 31, 2018; 1.40:1 for each fiscal quarter ending between January 1, 2019 and December 31, 2019; and 1.50:1 for each fiscal quarter ending thereafter; and (iii) a consolidated total funded debt-to-capital not to exceed 55%. The Company was in compliance with each of the covenants of the Facility.

Convertible debentures

2020 convertible debentures

The Company issued 86,000 units of 5.60% convertible debentures at C$1,000 per unit for a principal value of $83,800 (C$86,000) on February 25, 2013 (the "2020 convertible debentures"). The debentures mature on March 31, 2020 at their outstanding principal value or can be converted into shares at the holder's option at any time prior to the close of business on the earlier of maturity or redemption date at the conversion price of C$9.80 per share or at a rate of 102.04 shares per C$1,000 of debentures owned. The February 2013 Debentures were initially recorded on the consolidated balance sheets as debt of $83,800 (C$86,000) less costs of $3,448 (C$3,539). In addition, the Company allocated $16,915 (C$17,363) to the conversion and redemption feature on initial recognition, which was deducted from the principal balance and will be accreted to the principal amount of the debenture over its term. As at December 31, 2017, the outstanding principal amount was $68,306 (C$85,693) (December 31, 2016 – $63,852 or C$85,731).

The Company may settle the conversion right in cash in lieu of common shares unless the holder has explicitly indicated that it does not wish to receive cash. The amount of cash the Company will have to deliver to the holder is determined by multiplying the trading price of the common shares on the date on which the conversion notice is given by the holder to the Company by the number of common shares into which the elected amount would then be convertible.

The 2020 convertible debenture units outstanding are redeemable at the option of the Company on or after March 31, 2016 and prior to March 31, 2018 provided that the Current Market Price (as defined in the trust indenture governing the 2020 convertible debentures) of the Company's common shares on the fifth trading day preceding the date on which notice of redemption is given is not less than 125% of the conversion price. On or after March 31, 2018 and prior to the maturity date, the Company may elect to redeem the outstanding debentures in whole or part at a price equal to the principal amount plus accrued and unpaid interest.

The Company has an option to settle the redemption right by delivering the number of common shares determined by dividing the principal amount of the convertible debentures by 95% of the Current Market Price on the fifth trading day preceding the date fixed for redemption or the maturity date. In 2017, $28 (C$38) of 2020 convertible debentures were converted into 3,877 common shares.

2022 convertible debentures

On March 17, 2017, the Company completed the offering, on a bought deal basis, of $172,500 aggregate principal amount of 5.75% extendible convertible unsecured debentures (the "2022 convertible debentures"), including $22,500 aggregate principal amount of 2022 convertible debentures issued pursuant to the exercise of underwriters' over-allotment options. The net offering proceeds to the Company were $164,554 after transaction costs of $7,946.

Upon the closing of the acquisition of Silver Bay on May 9, 2017, the 2022 convertible debentures became convertible to common shares of the Company in accordance with their terms, and their maturity date was extended to March 31, 2022.

The 2022 convertible debentures bear interest at 5.75% per annum, which is payable semi-annually in arrears in March and September, and are convertible into common shares of the Company at a conversion rate of 95.6023 common shares per $1,000 principal amount of 2022 convertible debentures (equivalent to a conversion price of approximately $10.46 per common share (equivalent to C$13.12 as of December 31, 2017)).

Similar to the 2020 convertible debentures, the Company may settle the conversion right in cash in lieu of common shares unless the holder has explicitly indicated that it does not wish to receive cash.

The 2022 convertible debentures may not be redeemed by the Company prior to March 31, 2020, except in the event of the satisfaction of certain conditions after a change of control has occurred. On or after March 31, 2020 and prior to March 31, 2021, the 2022 convertible debentures may be redeemed by the Company at a price equal to the principal amount thereof plus accrued and unpaid interest, provided that the Current Market Price (as defined in the trust indenture governing the 2022 convertible debentures) of the Company's common shares on the fifth trading day immediately preceding the date on which notice of redemption is given is not less than 125% of the conversion price. On or after March 31, 2021 and prior to their final maturity date, the 2022 convertible debentures may be redeemed by the Company at a price equal to the principal amount thereof plus accrued and unpaid interest. The Company has an option to settle the redemption right, where applicable, by delivering the number of common shares determined by dividing the principal amount of the convertible debentures by 95% of the Current Market Price of the Company's common shares on the fifth trading day immediately preceding the date fixed for redemption or the maturity date. In 2017, there were no conversions of the 2022 convertible debentures.

As of December 31, 2017, the host liability component of the convertible debentures recognized on the consolidated balance sheets was calculated as follows:

(in thousands of U.S. dollars)	2020 convertible debentures	2022 convertible debentures	Total
December 31, 2017			
Principal amount outstanding[1]	$ 68,306	$ 172,500	$ 240,806
Less: Transaction costs (net of amortization)	(1,304)	(6,901)	(8,205)
Liability component on initial recognition	67,002	165,599	232,601
Debentures discount (net of amortization)	(6,051)	(12,403)	(18,454)
Convertible debentures	**$ 60,951**	**$ 153,196**	**$ 214,147**

(in thousands of U.S. dollars)	2020 convertible debentures	2022 convertible debentures	Total
December 31, 2016			
Principal amount outstanding[1]	$ 63,852	$ –	$ 63,852
Less: Transaction costs (net of amortization)	(1,590)	–	(1,590)
Liability component on initial recognition	62,262	–	62,262
Debentures discount (net of amortization)	(7,155)	–	(7,155)
Convertible debentures	**$ 55,107**	**$ –**	**$ 55,107**

(1) 2020 convertible debentures principal amount outstanding of C$85,693 (2016 – C$85,731) was translated to U.S. dollars at the year-end exchange rate.

The above carrying values were recognized at amortized cost after discounting the future interest and principal payments using the effective interest rates. The fair value of the host liability component of the 2020 convertible debentures is $68,362 (C$85,764) as of December 31, 2017 and $70,210 (C$94,267) as of December 31, 2016. The fair value of the host liability component of the 2022 convertible debentures is $169,310. The difference between the amortized cost and implied fair value is a result of the difference between the effective interest rate and the market interest rate for debt with similar terms.

Mortgage

On November 22, 2017, the Company obtained a $7,856 (C$10,000) mortgage loan to purchase a commercial condominium, which will serve as the Company's new head office in Toronto. The total mortgage amount was $7,856 (C$10,000), of which $1,064 (C$1,355) was withheld from the net proceeds to be advanced upon satisfaction of certain conditions outlined in the mortgage agreement. The mortgage carries a fixed interest rate of 4.38% compounded semi-annually and has a seven-year term to maturity. Total interest expense incurred on the mortgage loan in 2017 was $36. As at December 31, 2017, the outstanding principal amount was $7,957 (C$9,982). The Company is in compliance with the covenant and other undertakings outlined in the mortgage agreement.

The transaction costs incurred in relation to the mortgage transaction were insignificant.

The coupon/stated interest rates and effective interest rates are as follows:

				Debt balance	
(in thousands of U.S. dollars)	Coupon/stated interest rates	Effective interest rates	Maturity dates	December 31, 2017	December 31, 2016
Fixed rate					
2020 convertible debentures	5.60%	6.46%	2020	$ 60,951	$ 55,107
2022 convertible debentures	5.75%	6.85%	2022	153,196	–
Mortgage	4.38%	4.43%	2024	7,957	–
Total fixed-rate debt	**5.66%**	**6.66%**		**$ 222,104**	**$ 55,107**
Variable rate					
Revolving term credit facility	LIBOR+3.25%	4.47%	2020	161,500	113,750
Total debt				**$ 383,604**	**$ 168,857**

The scheduled principal repayments and debt maturities are as follows:

(in thousands of U.S. dollars)	Revolving term credit facility	Convertible debentures	Mortgage	Total
2018	$ –	$ –	$ 181	$ 181
2019	–	–	190	190
2020	161,500	68,306	198	230,004
2021	–	–	206	206
2022	–	172,500	215	172,715
2023 and thereafter	–	–	6,967	6,967
	161,500	240,806	7,957	410,263
Transaction costs (net of amortization)				(8,205)
Debentures discount (net of amortization)				(18,454)
Total debt				**$ 383,604**

8. AMOUNTS PAYABLE AND ACCRUED LIABILITIES

Amounts payable and accrued liabilities consist of trade payables and accrued liabilities, AIP liability, income taxes payable and interest payable, as follows:

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
Trade payables and accrued liabilities	$ 6,187	$ 8,948
AIP liability (Note 16)	420	529
Income taxes payable	256	87
Interest payable	4,410	1,328
Total amounts payable and accrued liabilities	**$ 11,273**	**$ 10,892**

9. DERIVATIVE FINANCIAL INSTRUMENTS

The conversion and redemption features of the convertible debentures are combined pursuant to IAS 39, Financial Instruments: Recognition and Measurement, and are measured at fair value at each reporting period using model calibration.

The conversion and redemption components were valued using a binomial pricing model and then the valued amount was calibrated to the traded price of the underlying debentures. The valuation model uses market-based inputs, including the spot price of the underlying equity, implied volatility of the equity, risk-free rates from the Canadian dollar swap curves and dividend yields related to the equity.

The valuation of the conversion and redemption components assumes that the debentures are held to maturity.

As at December 31, 2017, the fair value of the embedded derivative payable on the 2020 convertible debentures increased by $13,575 (C$17,030) (2016 – decrease of $8,607). The fair value of the embedded derivative payable on the 2022 convertible debentures was $23,889, representing an increase of $9,701 since the inception date of May 9, 2017. The change in value of the conversion feature, which is reflected as an expense (2016 – income) of the Company, increased largely because of an increase in the Company's share price on the TSX. There was an additional increase of $2 from foreign exchange revaluation (2016 – increase of $259) on the 2020 convertible debentures.

The assumed conversion of both the 2020 and 2022 debentures was anti-dilutive mainly due to the fair value loss recognized on the derivative financial instruments in the year ended December 31, 2017; as a result, the shares issuable on conversion were excluded from the weighted average diluted shares outstanding for the year ended December 31, 2017. The comparative period in 2016 included the impact of the assumed conversion of the 2020 convertible debentures.

The value attributed to the derivative financial instruments is shown below:

(in thousands of U.S. dollars)	2020 convertible debentures[1]	2022 convertible debentures	Total
December 31, 2017			
Derivative financial instruments – beginning of year	$ 28	$ –	$ 28
Derivative instrument value of debentures issued	–	14,188	14,188
Fair value changes (based on market price)	13,575	9,701	23,276
Revaluation to year-end exchange rate	2	–	2
Derivative financial instruments – end of year	**$ 13,605**	**$ 23,889**	**$ 37,494**

(in thousands of U.S. dollars)	2020 convertible debentures[1]	2022 convertible debentures	Total
December 31, 2016			
Derivative financial instruments – beginning of year	$ 8,376	$ –	$ 8,376
Fair value changes (based on market price)	(8,607)	–	(8,607)
Revaluation to year-end exchange rate	259	–	259
Derivative financial instruments – end of year	**$ 28**	**$ –**	**$ 28**

(1) Derivative financial instruments ending balance of C$17,067 (2016 – C$37) was translated to U.S. dollars at the year-end exchange rate.

10. INCOME TAXES

(in thousands of U.S. dollars)

For the years ended December 31	2017	2016
Income tax expense – current	$ 4,889	$ 1,579
Income tax expense – deferred	8,416	10,301
Income tax expense	**$ 13,305**	**$ 11,880**

The tax on the Company's income before income taxes differs from the theoretical amount that would arise using the weighted average tax rate applicable to income of the consolidated entities as follows:

(in thousands of U.S. dollars)

For the years ended December 31	2017	2016
Income before income taxes	$ 82,653	$ 71,640
Combined statutory federal and provincial income tax rate	26.50%	26.50%
Expected income tax expense	21,903	18,985
Non-taxable gains on investments	(16,847)	(7,572)
Non-taxable (gains) losses on derivative financial instruments	6,168	(2,281)
Tax rate changes[1]	(1,452)	–
Foreign tax rate differential	628	613
Other, including permanent differences	2,905	2,135
Income tax expense	**$ 13,305**	**$ 11,880**

(1) On December 22, 2017, The United States House of Representatives and the Senate passed the "Tax Cuts and Jobs Act" into law. The overall impact of the new tax rules is a one-time net tax benefit of $1,452. U.S. tax reform is not expected to have a material impact on Tricon's consolidated effective tax rate.

The expected realization of deferred income tax assets and deferred income tax liabilities is as follows:

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
Deferred income tax assets		
Deferred income tax assets to be recovered after more than 12 months	$ 23,247	$ 11,152
Deferred income tax assets to be recovered within 12 months	690	1,252
Total deferred income tax assets	**$ 23,937**	**$ 12,404**
Deferred income tax liabilities		
Deferred income tax liabilities reversing after more than 12 months	$ 47,728	$ 30,256
Deferred income tax liabilities reversing within 12 months	199	232
Total deferred income tax liabilities	**$ 47,927**	**$ 30,488**

The movement of the deferred income tax accounts was as follows:

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
Change in net deferred income tax liabilities		
Net deferred income tax liabilities – beginning of year	$ 18,084	$ 9,318
Charge to the statement of comprehensive income	8,416	10,301
Credit directly to equity	(2,054)	(1,362)
Other	(456)	(173)
Net deferred income tax liabilities – end of year	**$ 23,990**	**$ 18,084**

The tax effects of the significant components of temporary differences giving rise to the Company's deferred income tax assets and liabilities were as follows:

(in thousands of U.S. dollars)	Long-term incentive plan accrual	Issuance costs	Net operating losses	Other	Total
Deferred income tax assets					
At December 31, 2016	$ 3,684	$ 1,640	$ 6,926	$ 154	$ 12,404
Addition	517	1,185	8,991	840	11,533
At December 31, 2017	**$ 4,201**	**$ 2,825**	**$ 15,917**	**$ 994**	**$ 23,937**

(in thousands of U.S. dollars)	Investments	Convertible debentures	Deferred placement fees	Other	Total
Deferred income tax liabilities					
At December 31, 2016	$ 29,538	$ 265	$ 685	$ –	$ 30,488
Addition/(reversal)	17,559	225	(345)	–	17,439
At December 31, 2017	**$ 47,097**	**$ 490**	**$ 340**	**$ –**	**$ 47,927**

The Company believes it will have sufficient future income to realize the deferred income tax assets.

11. INTANGIBLE ASSETS

The intangible assets are as follows:

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
Placement fees	$ 1,415	$ 1,805
Rights to performance fees	127	189
Customer relationship intangible	4,759	5,273
Contractual development fees	13,715	17,700
Total intangible assets	**$ 20,016**	**$ 24,967**

Intangible assets represent future management fees, development fees and commissions that Tricon expects to receive over the life of the projects that the Company manages. They are amortized by project over the estimated periods that the projects expect to collect these fees, which range from 2 to 13 years.

The customer relationship intangible from Johnson represents the management fees, development fees and commissions that Tricon expects to receive from future projects. These are based on future projects which are a result of Johnson's existing customer relationships, and as such are considered to be definite-life intangibles.

(in thousands of U.S. dollars) For the year ended December 31, 2017	Opening	Additions	Amortization expense	Translation adjustment	Ending
Placement fees	$ 1,805	$ –	$ (391)	$ 1	$ 1,415
Rights to performance fees	189	–	(62)	–	127
Customer relationship intangible	5,273	–	(514)	–	4,759
Contractual development fees	17,700	–	(3,985)	–	13,715
Intangible assets	**$ 24,967**	**$ –**	**$ (4,952)**	**$ 1**	**$ 20,016**

(in thousands of U.S. dollars) For the year ended December 31, 2016	Opening	Additions	Amortization expense	Translation adjustment	Ending
Placement fees	$ 2,471	$ –	$ (658)	$ (8)	$ 1,805
Rights to performance fees	250	–	(61)	–	189
Customer relationship intangible	5,788	–	(515)	–	5,273
Contractual development fees	22,018	–	(4,318)	–	17,700
Intangible assets	**$ 30,527**	**$ –**	**$ (5,552)**	**$ (8)**	**$ 24,967**

There were no impairments to placement fees and rights to performance fees for the years ended December 31, 2017 and December 31, 2016.

12. OTHER ASSETS

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
Building	$ 13,295	$ –
Furniture, computer and office equipment	2,051	910
Leasehold improvements	213	247
Goodwill	219	219
Total other assets	**$ 15,778**	**$ 1,376**

On November 22, 2017, the Company acquired a commercial condominium at 7 St. Thomas Street, Toronto for its own use. The costs of the building include the purchase price of $10,614 (C$13,316) along with development costs of $2,681 (C$3,363). This purchase was partially financed through a $7,856 (C$10,000) mortgage. Upon closing, the Company received net mortgage proceeds of C$8,650; the remaining C$1,355 will be received upon satisfaction of certain conditions as outlined in the mortgage agreement. This amount has been recorded as amounts receivable on the Company's consolidated balance sheet as at December 31, 2017.

In 2017, no depreciation was taken on the building as it was not available for use. The building will be ready for use in 2018.

13. DIVIDENDS

(in thousands of dollars, except per share amounts)			Common shares	Dividend amount per share		Total dividend amount		Dividend reinvestment plan ("DRIP")	
Date of declaration	Record date	Payment date	outstanding	CAD	USD[1]	CAD	USD[1]	CAD	USD[2]

May 11, 2016	June 30, 2016	July 15, 2016	112,239,181	0.065	0.050	7,296	5,608	1,753	1,351
August 10, 2016	September 30, 2016	October 15, 2016	112,567,194	0.065	0.050	7,317	5,578	1,612	1,223
November 9, 2016	December 31, 2016	January 13, 2017	112,754,769	0.065	0.048	7,329	5,455	1,789	1,362
						$ 29,227	**$ 22,257**	**$ 6,499**	**$ 4,982**

(1) Dividends are issued and paid in Canadian dollars. For reporting purposes, amounts recorded in equity are translated to U.S. dollars using the daily exchange rate on the date of record. Dividends payable of $6,906 recorded on the Company's balance sheet are translated to U.S. dollars using the period-end exchange rate.

(2) Dividends reinvested are translated to U.S. dollars using the daily exchange rate on the date common shares are issued.

The Company has a Dividend Reinvestment Plan ("DRIP") under which eligible shareholders may elect to have their cash dividends automatically reinvested into additional common shares. These additional shares are issued from treasury (or purchased in the open market) at a discount, in the case of treasury issuances, of up to 5% of the Average Market Price, as defined under the DRIP, of the common shares as of the dividend payment date. If common shares are purchased in the open market, they are priced at the average weighted cost to the Company of the shares purchased.

Brokerage, commissions and service fees are not charged to shareholders for purchases or withdrawals of the Company's shares under the DRIP, and all DRIP administrative costs are assumed by the Company.

For the year ended December 31, 2017, 827,617 common shares were issued under the DRIP (2016 – 728,239) for a total amount of $6,608 (2016 – $4,560).

14. SHARE CAPITAL

The Company is authorized to issue an unlimited number of common shares. The common shares of the Company do not have par value.

As of December 31, 2017, the Company had 133,472,861 common shares outstanding (December 31, 2016 – 112,754,769).

	December 31, 2017			December 31, 2016		
	Number of shares issued	Share capital		Number of shares issued	Share capital	
(in thousands of dollars)	(repurchased)	USD	CAD	(repurchased)	USD	CAD
Beginning balance	112,754,769	$ 567,677	$ 685,589	112,037,851	$ 561,347	$ 677,277
Shares issued under DRIP[1]	827,617	6,608	8,471	728,239	4,560	6,075
Stock options exercised[2]	146,734	722	949	10,503	77	100
Shares issued for phantom units released from escrow	–	–	–	104,595	617	643
Normal course issuer bid (NCIB)[3]	(982,900)	(5,249)	(6,512)	(244,520)	(1,113)	(1,538)
Deferred share units exercised[4]	396,514	2,627	3,464	118,101	827	1,129
Debentures conversion	3,877	28	38	–	–	–
Bought deal offering[5]	20,326,250	141,140	193,311	–	1,362	1,903
Ending balance	**133,472,861**	**$ 713,553**	**$ 885,310**	**112,754,769**	**$ 567,677**	**$ 685,589**

(1) In 2017, 827,617 common shares were issued under the DRIP at an average price of $7.98 (C$10.24) per share.

(2) In 2017, 804,000 vested stock options were exercised and settled by issuing 146,734 common shares.

(3) On October 4, 2017, the Company announced that the Toronto Stock Exchange approved its notice of intention to make a normal course issuer bid to repurchase up to 2,700,000 of its common shares during the twelve-month period ending October 5, 2018. In the fourth quarter of 2017, the Company repurchased 982,900 of its common shares for $8,243 (C$10,384), which reduced share capital and retained earnings by $5,249 and $2,994, respectively.

(4) In 2017, 396,514 common shares were issued for deferred share units (DSUs) exercised at an average price of $6.63 (C$8.74) per share.

(5) On March 17, 2017, the Company completed the offering, on a bought deal basis, of 20,326,250 subscription receipts at a price of $7.41 (C$9.90) per subscription receipt for gross proceeds of $150,520 (C$201,230 translated to U.S. dollars using the March 17, 2017 exchange rate). Upon the closing of the acquisition of Silver Bay on May 9, 2017, 20,326,250 common shares were delivered to holders of subscription receipts in satisfaction of their right to receive one common share per subscription receipt. On the settlement date, the gross proceeds were revalued to $146,837 (C$201,230 translated to U.S. dollars using the May 9, 2017 exchange rate). Net proceeds from the offering were $141,140 (C$193,311), which is net of $7,751 equity issuance costs (including $964 of dividend equivalent payments), offset by $2,054 of deferred tax recoveries.

15. EARNINGS PER SHARE

Basic

Basic earnings per share is calculated by dividing net income attributable to shareholders of Tricon by the sum of the weighted average number of shares outstanding and vested deferred share units during the period.

(in thousands of U.S. dollars, except per share amounts which are in U.S. dollars)

For the years ended December 31	2017	2016
Net income attributable to the shareholders of Tricon	$ 69,252	$ 59,472
Weighted average number of common shares outstanding	126,431,932	112,378,522
Adjustments for vested units	720,789	111,497
Weighted average number of common shares outstanding for basic earnings per share	127,152,721	112,490,019
Basic earnings per share	**$ 0.54**	**$ 0.53**

Diluted

Diluted earnings per share is calculated by adjusting the weighted average number of shares outstanding to assume conversion of all potentially dilutive shares. The Company has three categories of potentially dilutive shares: stock options, deferred share units (Note 16) and the convertible debentures (Note 9). For the stock options and deferred share units, the number of dilutive shares is based on the number of shares that could have been acquired at fair value (determined using the market price of the Company's shares as of December 31, 2017) based on the monetary value awarded under the AIP and LTIP. For the convertible debentures, the number of dilutive shares is based on the number of common shares into which the elected amount would then be convertible. The number of shares calculated as described above is comparable to the number of shares that would have been issued assuming the vesting of the stock compensation arrangement and conversion of debentures.

Stock options and deferred share units

For the year ended December 31, 2017, the Company's stock compensation plans resulted in 2,149,934 dilutive share units (2016 – 2,408,452) as the exercise price of the potential share units is below the average market share price of $8.34 (C$10.82) for the year.

Convertible debentures

For the year ended December 31, 2017, both of the Company's convertible debentures are anti-dilutive, as debentures interest expense, net of tax, and the net change in fair value of derivative financial instruments would result in increased earnings per share upon conversion. Therefore, in computing the diluted weighted average shares outstanding and the associated earnings per share amount for the year ended December 31, 2017, the impact of the 2020 and 2022 convertible debentures was excluded.

(in thousands of U.S. dollars, except per share amounts which are in U.S. dollars)

For the years ended December 31	2017	2016
Net income attributable to the shareholders of Tricon	$ 69,252	$ 59,472
Adjustment for convertible debentures interest expense – net of tax	–	4,158
Net change in fair value of financial instruments through profit or loss	–	(6,326)
Adjusted net income attributable to the shareholders of Tricon	$ 69,252	$ 57,304
Weighted average number of common shares outstanding	127,152,721	112,490,019
Adjustments for stock compensation	2,149,934	2,408,452
Adjustments for convertible debentures	–	8,748,061
Weighted average number of common shares outstanding for diluted earnings per share	129,302,655	123,646,532
Diluted earnings per share	**$ 0.54**	**$ 0.46**

16. COMPENSATION EXPENSE

The breakdown of compensation expense, including the annual incentive plan ("AIP") and long-term incentive plan ("LTIP") related to various compensation arrangements, is as follows:

(in thousands of U.S. dollars)

For the years ended December 31	2017	2016
Salaries and benefits	$ 14,169	$ 12,207
Annual incentive plan ("AIP")	11,205	7,474
Long-term incentive plan ("LTIP")	3,726	3,116
Total compensation expense	**$ 29,100**	**$ 22,797**

For the years ended December 31	2017		2016	
(in thousands of U.S. dollars)	AIP	LTIP	AIP	LTIP
Cash component	$ 8,478	$ 1,236	$ 4,657	$ (713)
Deferred share units ("DSUs")	2,593	1,799	2,743	2,356
Stock options	–	1,078	–	1,014
DRIP and revaluation loss (gain)	134	(387)	74	459
Total AIP and LTIP expenses	**$ 11,205**	**$ 3,726**	**$ 7,474**	**$ 3,116**

The changes to transactions of the various cash-settled and equity-settled arrangements during the year are detailed in the sections below.

Cash component

AIP – For the year ended December 31, 2017, the Company recognized $11,071 (2016 – $7,400) in relation to the AIP expense, of which approximately 76% (2016 – 60%), being $8,478, was settled in cash in December 2017. The balance of the AIP accrual was awarded in DSUs in December 2017, which will vest one year from the grant date. Aggregate AIP awards are calculated on an annual basis as a percentage of EBITDA for Bonus Purposes as defined under the Board-approved annual compensation incentive plans. The AIP expense for the year ended December 31, 2017 has increased compared to the same period in the prior year, as a result of an increase in EBITDA for Bonus Purposes and an increase in staffing.

LTIP – A liability for cash-component LTIP awards is accrued based on expected performance fees that would be generated from the fair value of the assets within each fund or separate account but disbursed only when such performance fees are earned and recognized as revenue. Changes in LTIP are primarily caused by changes to fair values of fund assets, which result from timing and cash flow changes at the project level of each fund, and changing business conditions.

For the year ended December 31, 2017, the Company increased its accrual related to cash-component LTIP by $1,236 (2016 – $713 accrual decrease) as a result of an increase in expected future performance fees from commingled funds (excluding THP1 US) and separate accounts/side-car investments that will be paid over pre-established vesting periods specific to each commingled fund or separate account/side-car commencing on the anniversary date of the award.

Deferred share units (“DSUs”)

AIP – For the year ended December 31, 2017, the Company accrued $2,593 in AIP expense (2016 – $2,743), representing approximately 24% of the 2017 AIP entitlement. On December 15, 2017, 313,998 DSUs were granted at $8.86 (C$11.35) per unit and will vest one year from the grant date. The fair value of the DSUs on the grant date was $2,783 (C$3,564).

LTIP – For the year ended December 31, 2017, the Company accrued $1,799 in LTIP expense (2016 – $2,356) relating to investment income from THP1 US that was paid in DSUs vesting equally over a five-year period commencing on the anniversary date of each grant. Compensation expense related to the grants is recognized on a graded vesting basis and for the year ended December 31, 2017 is comprised of $304 relating to the current-year entitlement and $1,495 relating to the prior-year entitlement. Under the DSUP, 114,132 DSUs were granted at $8.86 (C$11.35) per unit on December 15, 2017. The DSUs will vest in equal tranches on each anniversary of the grant date from 2018 to 2022.

Stock option plan

During the year ended December 31, 2017, 990,000 stock options were granted (2016 – 995,000), and 804,000 stock options were exercised (2016 – 42,000). For the year ended December 31, 2017, the Company recorded $1,078 (2016 – $1,014) in relation to granted stock options.

For the years ended December 31	2017	2016
Risk-free interest rate (%)	1.6	1.0
Expected option life (years)	4.4	5.3
Expected volatility (%)	23.62	28.93
Average share price (CAD) during the year	10.82	8.91
Weighted average exercise price (CAD)	11.35	8.85

The following table summarizes the movement in the stock option plan during the specified periods:

For the years ended December 31	2017		2016	
	Number of options	Weighted average exercise price (CAD)	Number of options	Weighted average exercise price (CAD)
Opening balance – outstanding	4,346,835	$ 8.53	3,398,835	$ 8.42
Granted	990,000	11.35	995,000	8.85
Exercised	(804,000)	8.89	(42,000)	6.99
Forfeited	(41,834)	9.41	(5,000)	10.57
Ending balance – outstanding	**4,491,001**	**$ 9.08**	**4,346,835**	**$ 8.53**

		December 31, 2017		
Grant date	Expiration date	Options outstanding	Options exercisable	Exercise price on outstanding options (CAD)
May 19, 2010	May 19, 2020	521,000	521,000	$ 6.00
August 3, 2010	August 3, 2020	49,000	49,000	5.26
November 22, 2011	November 22, 2020	20,000	20,000	4.16
May 17, 2013	May 17, 2020	650,334	650,334	6.81
November 25, 2013	November 25, 2020	150,833	150,833	7.74
March 16, 2015	March 16, 2020	533,166	344,329	10.57
November 17, 2015	November 17, 2020	756,668	488,330	10.03
November 14, 2016	November 14, 2023	820,000	266,666	8.85
December 15, 2017	December 15, 2024	990,000	–	11.35
Total		**4,491,001**	**2,490,492**	**$ 9.08**

AIP payable is recorded within amounts payable and accrued liabilities, and the equity component is included in the contributed surplus. The breakdown is presented below.

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
Amounts payable and accrued liabilities (Note 8)	$ 420	$ 529
Equity – contributed surplus	5,535	5,155
Total AIP	**$ 5,955**	**$ 5,684**

LTIP's liability and equity components are presented on the balance sheet as follows:

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
LTIP – liability	$ 15,224	$ 13,359
Equity – contributed surplus	9,877	9,553
Total LTIP	**$ 25,101**	**$ 22,912**

17. SEGMENTED INFORMATION

The Company has five reportable segments, as follows: Private Funds and Advisory ("PF&A"); and Principal Investing in Tricon Housing Partners ("THP"), Tricon American Homes ("TAH"), Tricon Lifestyle Communities ("TLC"), and Tricon Lifestyle Rentals ("TLR"). The reportable segments are business units offering different products and services, and are managed separately due to their distinct investment natures. These five reportable segments have been determined by the Company's chief operating decision makers.

In accordance with IFRS 8, Operating Segments, the Company discloses information about its reportable segments based upon the measures used by management in assessing the performance of those reportable segments. The Company evaluates segment performance based on the revenue and investment income of each investment vertical.

The corporate headquarters provides support functions in the areas of accounting, treasury, information technology, legal, and human resources, and therefore, it does not represent an operating segment. Such corporate expenses have been included below to provide a reconciliation to the overall results in accordance with IFRS 8.

The Company does not report balance sheet information by segment because that information is not used to evaluate performance or allocate resources between segments.

18. RELATED PARTY TRANSACTIONS AND BALANCES

The Company has a ten-year sub-lease commitment on the head office premises with Mandukwe Inc., a company owned and controlled by a current director and shareholder of Tricon. For the year ended December 31, 2017, the Company paid $283 in rental payments to Mandukwe Inc., including realty taxes, maintenance, insurance, and utility costs (2016 – $140).

Transactions with related parties

The following table summarizes revenue earned from related parties, including consolidated subsidiaries. These are contractual arrangements with investment funds managed by the Company, of which the Company is the general partner of the investment. In addition, the table includes investment income from related entities fair valued by the Company.

(in thousands of U.S. dollars)

For the years ended December 31	2017	2016
Contractual fees	$ 23,486	$ 24,518
General partner distributions	1,388	1,297
Performance fees	525	780
Total revenue	**$ 25,399**	**$ 26,595**
Investment income – Tricon Housing Partners	$ 18,209	$ 27,550
Investment income – Tricon American Homes	113,067	50,081
Investment income – Tricon Lifestyle Communities	7,381	5,108
Investment income – Tricon Lifestyle Rentals	12,391	2,066
Total investment income	**$ 151,048**	**$ 84,805**

Balances arising from transactions with related parties

The items set out below are included on various line items comprising the Company's consolidated financial statements.

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
Receivables from related parties included in amounts receivable		
Contractual fees receivable from investment funds managed	$ 1,609	$ 320
Other receivables	5,381	5,043
Employee relocation housing loans[1]	670	782
Loan receivables from investment in associates and joint ventures	21,903	21,101
Annual incentive plan	5,955	5,684
Long-term incentive plan	25,101	22,912
Dividends payable	320	302
Other payables to related parties included in amounts payable and accrued liabilities	2,261	6,705

(1) The employee relocation housing loans are non-interest bearing for a term of five years, maturing in 2018.

Revenues and receivables from related parties relate to general partnership distributions and contractual and performance fees for services provided by the Company. The receivables are unsecured and non-interest bearing. There are no provisions recorded against receivables from related parties at December 31, 2017 (December 31, 2016 – nil).

Key management compensation

Key management includes the Named Executive Officers (NEO), who are the Chief Executive Officer, Chief Financial Officer and the three other most highly-compensated officers or employees of the Company. Compensation paid and awarded to key management for employee services is based on employment agreements and is as follows:

(in thousands of U.S. dollars)

For the years ended December 31	2017	2016
Total salaries and benefits	$ 1,789	$ 1,776
Total AIP	5,689	3,960
Total LTIP	1,533	2,277
Total key management compensation	**$ 9,011**	**$ 8,013**

19. FINANCIAL RISK MANAGEMENT

The Company's activities expose it to certain financial risks during or at the end of the reporting period, as described below. The risk management function within the Company is carried out in respect of financial risks. Financial risks are risks arising from financial instruments to which the Company is exposed during or at the end of the reporting period. Financial risk comprises market risk (including currency risk and interest rate risk), credit risk, concentration risk and liquidity risk. The primary objectives of the financial risk management function are to establish risk limits, and then ensure that exposure to risks stays within these limits.

The Board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk and investing excess liquidity. Key financial risk management reports are produced frequently and provided to the key management personnel of the Company.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices, and the Company's investment risk. Market risk includes the risk of changes in interest rates, foreign currency rates and changes in market prices due to other factors, such as changes in equity prices or credit spreads. The sensitivities to market risks included below are based on a change in one factor while holding all other factors constant. In practice, this is unlikely to occur, and changes in some of the factors may be correlated – for example, changes in interest rates and changes in foreign currency rates.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company invests in debt instruments, the fair values of which vary depending on market interest rates. At December 31, 2017, if interest rates at that date had been 50 basis points higher or lower with all other variables held constant, interest expense for the year would have increased (decreased) by:

For the years ended December 31	2017		2016	
(in thousands of U.S. dollars)	50 bps increase	50 bps decrease	50 bps increase	50 bps decrease
Interest expense	$ 55	$ (55)	$ 58	$ (58)

Interest rate risk arises from the Company's financing arrangements (Note 7). Borrowings issued at variable rates expose the Company to cash flow interest rate risk. To limit its exposure to interest rate risk, the Company has a balanced portfolio of fixed rate and variable rate debt, of which the revolving term credit facility is the only debt instrument subject to a variable interest rate.

Foreign currency risk

The Company has exposure to monetary and non-monetary foreign currency risk due to the effects of changes in foreign exchange rates related to consolidated Canadian subsidiaries, investments in Tricon Housing Partners, Tricon Lifestyle Rentals, and cash and debt in Canadian dollars held at the corporate level. A 1% increase or decrease in the Canadian dollar exchange rate would result in the following impacts to assets and liabilities:

	December 31, 2017		December 31, 2016	
(in thousands of U.S. dollars)	1% increase	1% decrease	1% increase	1% decrease
Assets				
Investments – Tricon Housing Partners Canadian funds	$ 97	$ (97)	$ 95	$ (95)
Investments – Tricon Lifestyle Rentals	356	(356)	264	(264)
	$ 453	**$ (453)**	**$ 359**	**$ (359)**
Liabilities				
Convertible debentures	686	(686)	551	(551)
Mortgage	80	(80)	–	–
Derivative financial instruments	137	(137)	–	–
	$ 903	**$ (903)**	**$ 551**	**$ (551)**

The Company manages foreign currency risk by raising equity in Canadian dollars and by matching its principal cash outflows to the currency in which the principal cash inflows are denominated.

Credit risk

Credit risk is the risk that one party to a financial instrument will cause financial loss for the other party by failing to discharge an obligation. Management believes the credit risk on cash is low because the counterparties are banks with high credit ratings. The Company has no significant concentrations of credit risk and its exposure to credit risk arises through loans and receivables which are due primarily from controlled subsidiaries. The loans and receivables due from subsidiaries are subject to the risk that the underlying real estate assets may not generate sufficient cash inflows in order to recover them. The Company manages this risk by:

- Ensuring a due diligence process is conducted on each investment prior to funding;
- Approving all loan disbursements by management;
- Approving total loan facilities by the Investment Committee; and
- Actively monitoring the loan portfolio and initiating recovery procedures when necessary.

The Company assesses all counterparties, including its partners, for credit risk before contracting with them. The Company's maximum exposure to credit risk is detailed in the table below. The Company does not include any collateral or other credit risk enhancers, which may reduce the Company's exposure.

At December 31, 2017, the Company's maximum exposure to credit risk was $21,903 (December 31, 2016 – $21,101). Through the equity portion of its investments, the Company is also indirectly exposed to credit risk arising on loans advanced by investees to individual real estate development projects.

The Company provides loans to land developers, which are represented as debt investments. The credit quality of these investments is based on the financial performance of the underlying real estate assets. For those assets that are not past due, it is believed that the capital repayments and interest payments will be made in accordance with the agreed terms and conditions. No terms or conditions have been renegotiated.

As at December 31, 2017, the assets held by the Company are not past due or impaired (2016 – nil).

For the year ended December 31, 2017, no unrealized gains (losses) (2016 – none) are attributable to changes in credit risk of these debt instruments.

Concentration risk

Concentration risk arises as a result of the potential concentration of exposures, by country, geographical location, product type, industry sector or counterparty type. The following is a summary of the Company's concentration risk, based on the composition of the fair value of its investments – Tricon Housing Partners, Tricon American Homes, Tricon Lifestyle Communities, and Tricon Lifestyle Rentals balances:

(in thousands of U.S. dollars)

Province/State	December 31, 2017	December 31, 2016
Canada		
Ontario	$ 38,699	$ 30,109
Alberta	2,233	2,992
British Columbia	4,200	2,877
USA		
Texas	310,617	251,345
California	218,776	200,882
Arizona	200,196	104,503
Georgia	202,737	80,292
Florida	188,294	73,707
North Carolina	76,894	67,511
Nevada	62,502	46,318
Ohio	180	–
Indiana	18,740	18,536
South Carolina	17,983	17,654
	$ 1,342,051	**$ 896,726**

Liquidity risk

Liquidity risk is the risk that an entity will have difficulty in meeting obligations associated with its financial liabilities as they fall due or can only do so on terms that are materially disadvantageous. Prudent liquidity risk management includes maintaining sufficient cash on hand and the availability of funding through an adequate amount of committed credit facilities. The Company uses long-term borrowings to finance its investment strategy for Tricon American Homes, Tricon Lifestyle Communities and Tricon Lifestyle Rentals. Periodic cash flow forecasts are performed to ensure the Company has sufficient cash to meet operational and financing costs. Liquidity risk from the convertible debentures is mitigated by the Company's option, under the terms of the debentures, to settle the obligation with shares.

The maturity analysis of the Company's financial liabilities is as follows:

(in thousands of U.S. dollars) As at December 31, 2017	Demand and less than 1 year	From 1 to 3 years	From 3 to 5 years	Later than 5 years	Total
Liabilities					
Amounts payable and accrued liabilities	$ 11,273	$ –	$ –	$ –	$ 11,273
Dividends payable	6,906	–	–	–	6,906
Revolving term credit facility	–	161,500	–	–	161,500
Debentures payable	–	68,306	172,500	–	240,806
Mortgage	181	388	421	6,967	7,957
Derivative financial instruments	–	13,605	23,889	–	37,494
Total	**$ 18,360**	**$ 243,799**	**$ 196,810**	**$ 6,967**	**$ 465,936**

(in thousands of U.S. dollars) As at December 31, 2016	Demand and less than 1 year	From 1 to 3 years	From 3 to 5 years	Later than 5 years	Total
Liabilities					
Amounts payable and accrued liabilities	$ 10,892	$ –	$ –	$ –	$ 10,892
Dividends payable	5,459	–	–	–	5,459
Revolving term credit facility	–	113,750	–	–	113,750
Debentures payable	–	–	63,852	–	63,852
Derivative financial instruments	–	–	28	–	28
Total	**$ 16,351**	**$ 113,750**	**$ 63,880**	**$ –**	**$ 193,981**

During 2017, the change in the Company's liquidity resulted in a working capital surplus of $10,581 (December 31, 2016 – surplus of $20,920). As of December 31, 2017, the outstanding credit facility was $161,500 (December 31, 2016 – $113,750) and $203,500 of the credit facility remained available to the Company. During the year ended December 31, 2017, the Company received distributions of $97,855 (2016 – $212,658) from its investments.

The future repayments of principal and interest on fixed-rate financial liabilities is as follows:

(in thousands of U.S. dollars) As at December 31, 2017	Less than 1 year	From 1 to 3 years	From 3 to 5 years	Later than 5 years	Total
Principal					
2020 convertible debentures[1]	$ –	$ 68,306	$ –	$ –	$ 68,306
2022 convertible debentures	–	–	172,500	–	172,500
Mortgage[1]	181	388	421	6,967	7,957
Interest					
2020 convertible debentures[1]	3,825	5,738	–	–	9,563
2022 convertible debentures	9,919	19,838	14,878	–	44,635
Mortgage[1]	342	659	624	539	2,164
Total	**$ 14,267**	**$ 94,929**	**$ 188,423**	**$ 7,506**	**$ 305,125**

(1) 2020 convertible debentures and mortgage amounts were translated to U.S. dollars at the year-end exchange rate.

The details of the net current assets are shown below:

(in thousands of U.S. dollars)	December 31, 2017	December 31, 2016
Cash	$ 14,813	$ 17,780
Amounts receivable	13,506	16,892
Prepaid expenses and deposits	622	2,599
Current assets	28,941	37,271
Amounts payable and accrued liabilities	11,273	10,892
Dividends payable	6,906	5,459
Mortgage (Note 7)	181	–
Net current assets	**$ 10,581**	**$ 20,920**

20. CAPITAL MANAGEMENT

The Company's objectives when managing capital are: (i) to safeguard its ability to meet financial obligations and growth objectives, including future investments; (ii) to provide an appropriate return to its shareholders; and (iii) to maintain an optimal capital structure that allows multiple financing options, should a financing need arise. The Company's capital consists of debt (including revolving term credit facility and convertible debentures), cash and shareholders' equity. In order to maintain or adjust the capital structure, the Company manages equity as capital and may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets.

As of December 31, 2017, the Company is in compliance with all financial covenants (Note 7).

21. COMMITMENTS

The Company has four lease commitments on office premises as of December 31, 2017. The lessor of the Company's head office located at 1067 Yonge Street in Toronto is Mandukwe Inc., a related party (Note 18). The head office is expected to be vacated in 2018, when the Company relocates to its newly acquired office building (Note 12), and subsequently will be subleased until the lease expiration date in 2019. The Company also leases office equipment. The future minimum payments for the Company's offices and office equipment are as follows:

(in thousands of U.S. dollars)	Office equipment	Office leases	Total
2018	$ 26	$ 323	$ 349
2019	26	269	295
2020	26	187	213
2021	26	193	219
2022	–	199	199
2023 and thereafter	–	688	688
Total	**$ 104**	**$ 1,859**	**$ 1,963**

22. WORKING CAPITAL CHANGES

(in thousands of U.S. dollars)

For the years ended December 31	2017	2016
Amounts receivable	$ 3,386	$ (8,804)
Prepaid expenses and deposits	1,977	(57)
Amounts payable and accruals	381	3,271
	$ 5,744	**$ (5,590)**

23. FINANCING ACTIVITIES

			Non-cash changes			
(in thousands of U.S. dollars)	As at December 31, 2016	Cash flows	Foreign exchange movement	Fair value changes	Other[1]	As at December 31, 2017
Revolving term credit facility	$ 113,750	$ 47,750	$ –	$ –	$ –	$ 161,500
2020 convertible debentures	55,107	–	3,165	–	2,679	60,951
2022 convertible debentures	–	150,366	–	–	2,830	153,196
Mortgage	–	7,842	115	–	–	7,957
Derivative financial instruments	28	14,188	2	23,276	–	37,494
Total liabilities from financing activities	**$ 168,885**	**$ 220,146**	**$ 3,282**	**$ 23,276**	**$ 5,509**	**$ 421,098**

(1) Includes amortization of debenture discounts and issuance costs.

24. INDEMNIFICATION

Pursuant to Indemnification Agreements with certain General Partners of Limited Partnerships managed by the Company and certain shareholders of the Company (who are also officers and directors of the Company), the Company has agreed to indemnify the General Partner and those shareholders and, where applicable, any of their directors, officers, agents and employees (collectively, the Indemnified Parties) for any past, present or future amounts paid or payable by any of the Indemnified Parties to the Limited Partnership in the form of a capital contribution or clawback guarantee relating to performance fees for any claim or obligation, as set out in the Limited Partnership Agreements. There are no amounts payable in respect of this indemnification as of December 31, 2017 (December 31, 2016 – nil).

25. VARIABILITY OF RESULTS

The nature of our business does not allow for consistent year-to-year revenue comparisons. Revenues earned from a fund are dependent upon where the fund is in its life cycle. At the beginning of the fund's life cycle, consistent contractual fees and general partner distributions are earned to the end of the investment period. Subsequent to the investment period, contractual fees and general partner distributions start to decline as investments are realized. Performance fees that are earned at the end of the life cycle can vary significantly depending on fund performance, resulting in volatile revenue streams. Similarly, the performance of the Company's investments carried at FVTPL may not be consistent from period to period.

26. SUBSEQUENT EVENTS

On February 27, 2018, the Board of Directors of the Company declared a dividend of seven cents per share in Canadian dollars payable on or after April 15, 2018 to shareholders of record on March 31, 2018.

Subsequent to year-end, the Company repurchased 431,931 of its common shares for C$4,621 as part of its NCIB program approved by the TSX (Note 14).

Subsequent to year-end, the Company classified its investment in TLC as held for sale as a result of TLC initiating an active program to dispose of all of its underlying assets and liabilities. TLC has committed to a plan for the sale of the underlying parks, and it launched an official marketing process on January 8, 2018.
